	Salt & Pepper Rock	\$76.99	\$49.99	\$5.99
	Mega Salt & Pepper Rock	\$76.99	\$49.99	N/A

How to calculate how many cubic yards needed:

Multiply how LONG your area is by how WIDE your area is:

Length x Width = \_\_\_\_\_ Square Feet

THEN:

Find your depth in inches (see chart below) - divide by the number in the opposite row

Depth	Divide by
1"	<b>324 sq. ft.</b>
2"	<b>162 sq. ft.</b>
3"	<b>108 sq. ft.</b>
4"	<b>81 sq. ft.</b>
5"	<b>65 sq. ft.</b>
6"	<b>54 sq. ft.</b>
12"	<b>27 sq. ft.</b>

**Example:** Your garden is 22 feet long and 10 feet wide.

Multiply 22 times 10 to find your total square footage to be 220. You want to add 4 inches of soil to the top, and the chart (see left) says to divide by 81 if you put it 4 inches thick. You divide 220 (the size of your garden) by 81 (how much area will be covered by 1 cubic yard if you do a 4" depth). Your calculator says 2.72.

Puyallup Bark says to round up, so you order 3 yards of soil for delivery!
