# CHALLENGE

**CHALLENGE**

**CHALLENGE**

**How do we recreate  
a classroom like this?**

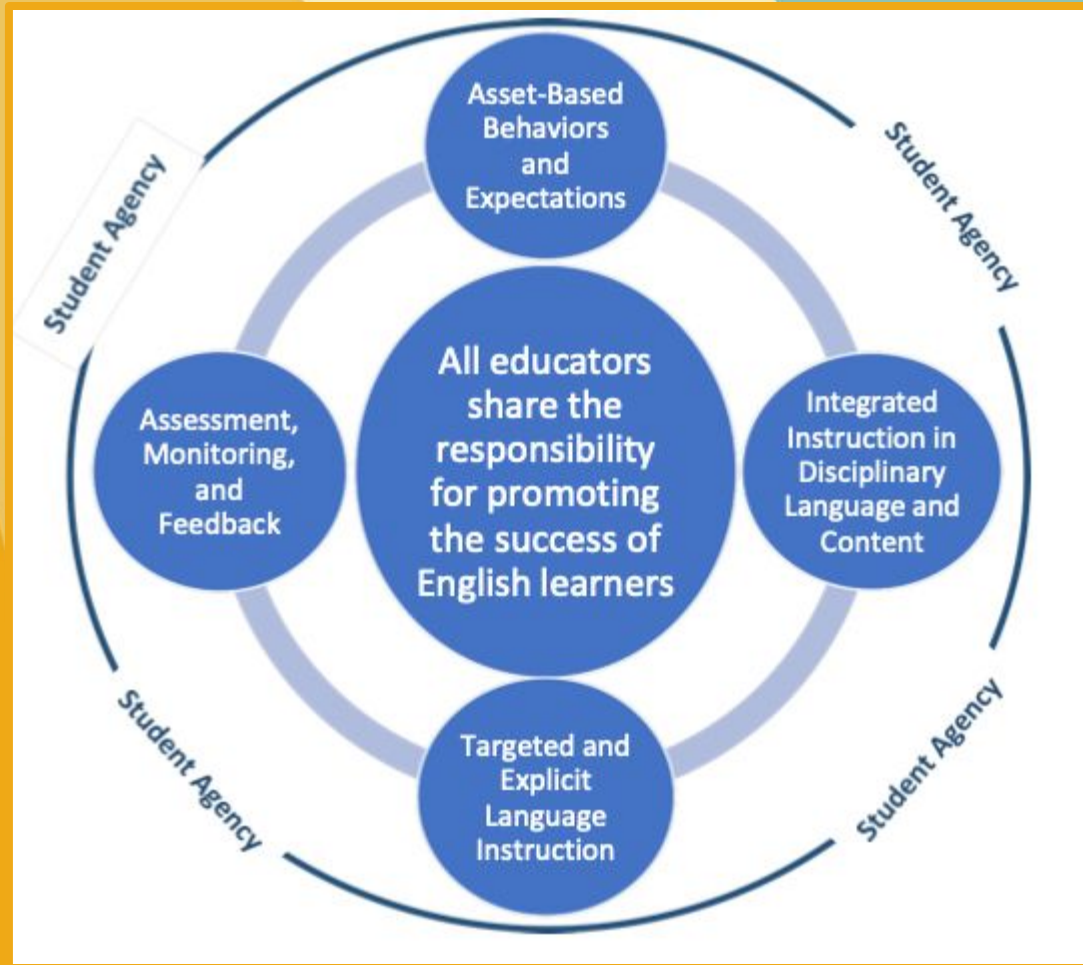

# Elements of Impactful ELD Instruction

- ❑ *create* opportunities to increase language production,
- ❑ *coach* students with specific language feedback,
- ❑ *cultivate* academic and content vocabulary,
- ❑ *connect* language instruction to content, and
- ❑ *challenge* all learners to think critically.

**Arizona's  
Language  
Development  
Approach**

# CREATE

# Create Opportunities to Increase Language Production

# Create Opportunities to Increase Language Production

From a classroom where...

- Teacher talk dominates
- A few students respond
- Students appear disengaged

# Create Opportunities to Increase Language Production

To a classroom where...

- **Students talk most of the time**
- **All students are held accountable**
- **Students are actively/cognitively engaged**

## Create Opportunities to Increase Language Production

What are some ways you increase language production in your classroom?

1. Jot down your responses on sticky notes
2. Share with a partner
3. Volunteers share

# Create Opportunities to Increase Language Production

## Ripple

1. Individual Response
2. Share with a Partner
3. Whole class

# Create Opportunities to Increase Language Production

## Turn & Talk

# Create Opportunities to Increase Language Production

## Mix & Mingle

# Create Opportunities to Increase Language Production

## Sentence Frames

universal

Same:  
My shape has \_\_\_\_\_ and your  
shape has \_\_\_\_\_.

---

different:  
My shape has \_\_\_\_\_ but your  
shape has \_\_\_\_\_.

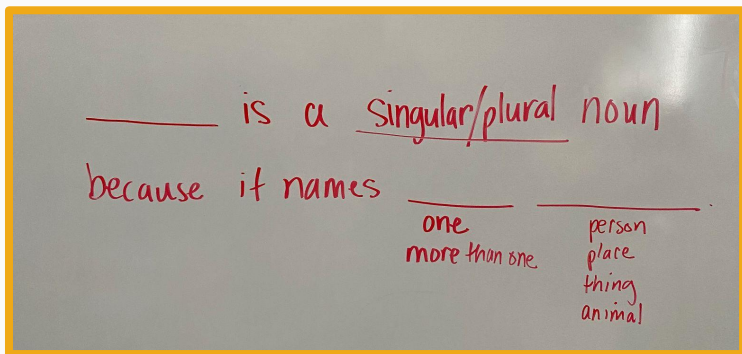

\_\_\_\_\_ is a Singular/plural noun  
because it names \_\_\_\_\_

one	person
more than one	place
	thing
	animal

# Create Opportunities to Increase Language Production

## Sentence Frames

*From:*

Number 2 is plural. (4 words)

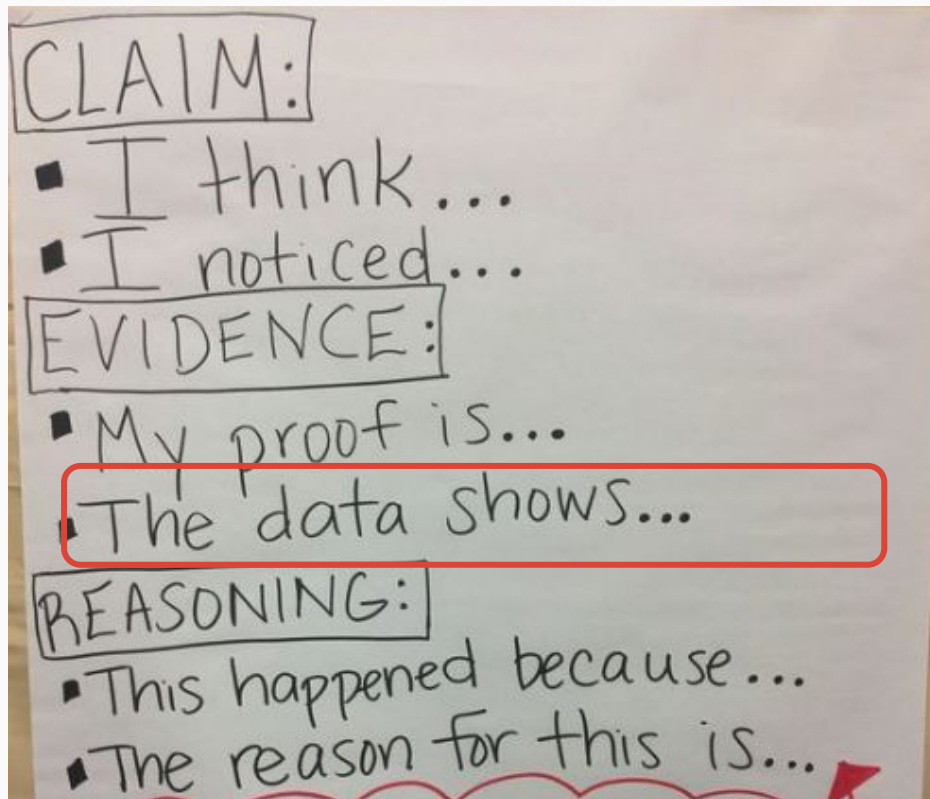

*To:*

The word puppies is a plural noun because it names more than one animal. (14 words)

## Sentence Stems

# Create Opportunities to Increase Language Production

## Prompts to extend language

- ★ Tell me more...
- ★ How do you know?
- ★ Yes, please explain with more detail...
- ★ Can you tell me what you were thinking when you...?

**How often ...?**

# Create Opportunities to Increase Language Production

10/2 Rule

10 minutes of instruction

2 minutes to process

How does this element of impactful instruction connect to *Arizona's Language Development Approach*?

### Principle Three: Targeted and Explicit Language Instruction

Explicit language instruction is a critical opportunity to intentionally support English learner (EL) students in developing the **discourse practices** they need to engage with rigorous, grade-level disciplinary content. Just as literacy and language should be integrated into content instruction, so should content and disciplinary practices be integrated into language instruction. Educators use the English Language Proficiency Standards with content material **to teach language.**

#### All educators:

- create opportunities for students to use language and reflect on their understanding across the four language domains (reading, writing, speaking, and listening) and in direct connection to rigorous, grade-level content.
- design instruction that fosters EL students' autonomy by equipping them with the strategies necessary to comprehend and use language in a variety of academic settings.
- immerse students in a language rich environment that fosters critical thinking and problem solving.
- utilize language supports, academic language development, and opportunities for academic discourse.
- provide age/grade level appropriate instruction & materials that are culturally and linguistically appropriate and aligned to the English Language Proficiency Standards.
- design explicit instruction that provides students with an understanding of how language functions with a content discipline lens.

Targeted and explicit language instruction will support the development of **student agency** when educators:

- provide choices or open-ended opportunities to select strategies and tactics for language acquisition.
- encourage independent learning by teaching effective strategies for learning language.
- encourage initiative by creating learning environments that increase motivation and engagement with language acquisition.

Through participation in targeted and explicit language instruction, EL students will develop a sense of voice, confidence, and self-efficacy around their language use.

**Principle Two: Integrated Instruction in Disciplinary Language and Content**

All educators share the responsibility for designing instruction that integrates language and literacy development with content learning. This is accomplished by using content standards to plan instruction along with the English Language Proficiency Standards to support differentiation by language proficiency level. Through the use of scaffolded supports, academic language development, and collaborative discussions, reading, and writing, educators help students develop disciplinary content knowledge, language, and autonomy.

**All educators:**

- differentiate disciplinary language instruction using the English Language Proficiency Standards.
- provide differentiated scaffolds to make grade level concepts comprehensible in receptive, productive, and interactive language and to support students to make informed and deliberate choices about language when speaking and writing.
- model learning approaches so students can construct meaning using metacognition strategies.
- immerse students in a language rich environment and engage in interactive and discussion-based learning tasks about the language of complex content-area texts.
- plan and provide opportunities for students to work together in intellectually rich and integrated learning environments around worthy and engaging inquiry questions, texts, and topics.
- support EL students' deep learning and ability to engage in extended academic discourse and abundant, authentic writing.

Integrated Instruction in Disciplinary Language and Content will support the development of **student agency** when educators:

- provide choices or open-ended opportunities to select strategies and tactics for mastery of language and content.
- encourage independent learning by teaching effective strategies for learning language and content.
- encourage initiative by creating learning environments that increase motivation and engagement with language and content.

Through participation in integrated language and content instruction, EL students will develop a sense of voice, confidence, and self-determination as they use content and language in tandem to meet their goals.

**How will you CREATE more opportunities that increase language production?**

# COACH

# Coach Students with Specific Language Feedback

# What is language feedback?

### Impactful ELD Instruction: Vocabulary

AZ ELP Standard 2: An EL student can determine the meaning of words and phrases in oral presentations and literary and informational text.

AZ ELP Standard 5: An EL student can adapt language choices to purpose, task, and audience, when speaking and writing.

#### Level 1: Teach the Word

- visual - show the word
- pronounce the word - slow it down
- students repeat the word
- clarify the part of speech (usually in math, the word will be a thing/noun or action/verb)
- provide synonyms (if any) and explanations
- give a visual non-linguistic representation
- rephrase the explanation, definition
- add to Word Wall
- list on current Word Bank
- connect to background knowledge: *What is something you have in **common** with a friend?*
- Refine the students' understanding

#### Level 2: Deepen Knowledge

- Retrieval Practice (pull the information from the students' heads)
  - Jeopardy-like questions: What names part of a whole number? A fraction
  - Matching or Multiple Choice questions: Does the numerator name the total or the parts of the whole?
  - Open-Ended Questions: What are some important vocabulary words to know about fractions?
- Spacing (spreading lessons and retrieval opportunities out over time – 8 times )
- Interleaving (mixing up closely related topics, encouraging discrimination between similarities and differences)
  - Non-examples and Examples
  - Semantic Mapping or Concept Mapping
  - Frayer Model
  - Complete a Sentence Stem: A numerator is \_\_\_\_\_ but a denominator is \_\_\_\_\_. The greatest common factor is helpful to figure out because \_\_\_\_\_

- model learning approaches so students can construct meaning using metacognition strategies.
- immerse students in a language rich environment and engage in interactive and discussion-based learning tasks about the language of complex content-area texts.
- plan and provide opportunities for students to work together in intellectually rich and integrated learning environments around worthy and engaging inquiry questions, texts, and topics.
- support EL students' deep learning and ability to engage in extended academic discourse and abundant, authentic writing.

Integrated Instruction in Disciplinary Language and Content will support the development of **student agency** when educators:

- provide choices or open-ended opportunities to select strategies and tactics for mastery of language and content.
- encourage independent learning by teaching effective strategies for learning language and content.
- encourage initiative by creating learning environments that increase motivation and engagement with language and content.

Through participation in integrated language and content instruction, EL students will develop a sense of voice, confidence, and self-determination as they use content and language in tandem to meet their goals.

## Principle Three: Targeted and Explicit Language Instruction

Explicit language instruction is a critical opportunity to intentionally support English learner (EL) students in developing the discourse practices they need to engage with rigorous, grade-level disciplinary content. Just as literacy and language should be integrated into content instruction, so should content and disciplinary practices be integrated into language instruction. Educators use the English Language Proficiency Standards with content material to teach language.

## All educators:

- create opportunities for students to use language and reflect on their understanding, across the four language domains (reading, writing, speaking, and listening) and in direct connection to rigorous, grade-level content.
- design instruction that fosters EL students' autonomy by equipping them with the strategies necessary to comprehend and use language in a variety of academic settings.
- immerse students in a language rich environment that fosters critical thinking and problem solving.
- utilize language supports, academic language development, and opportunities for academic discourse.
- provide age/grade level appropriate instruction & materials that are culturally and linguistically appropriate and aligned to the English Language Proficiency Standards.
- design explicit instruction that provides students with an understanding of how language functions with a content discipline lens.

Targeted and explicit language instruction will support the development of **student agency** when educators:

- provide choices or open-ended opportunities to select strategies and tactics for language acquisition.
- encourage independent learning by teaching effective strategies for learning language.
- encourage initiative by creating learning environments that increase motivation and engagement with language acquisition.

Through participation in targeted and explicit language instruction, EL students will develop a sense of voice, confidence, and self-efficacy around their language use.
