

These photos illustrate the beginnings of the  
Oeleta Learning Center Project.

The Oeleta  
Learning  
Center  
Project

This is the finished  
center for the  
community.

The  
Oeleta  
Learning  
Center

The Learning Center is now used by the entire community, particularly becoming a place for children to finish their after-school work, learn supplementary skills that aid their families's income, and spend time with others in their community.

The  
Oeleta  
Learning  
Center

Our team was able to recruit teachers, doctors, and other volunteers to visit the Oeleta Learning Center to further enhance the children's academic and physical development.

Oeleta  
Learning  
Center

Lastly, we know emotional well-being is incredibly important for these children and their families, so The Learning Center puts on events designed for these children to experience several modes of creativity filled with laughter and excitement!

The  
Oeleta  
Learning  
Center

Though the project has expanded immensely thanks to your contributions and faith in this organization, there are still other issues we must tackle within the village of Oeleta. For example, most of the village is employed within the agriculture sector; however, due to long drought seasons, many families are unable to profit from the agriculture sector and experience little return. With your contribution, we could build an aqueduct well that would provide and collect water for the village. Not only would this provide running drinking water, but it would also sustain business practices, allowing prosperity through natural resources.
