

VS Player DVR/NVR

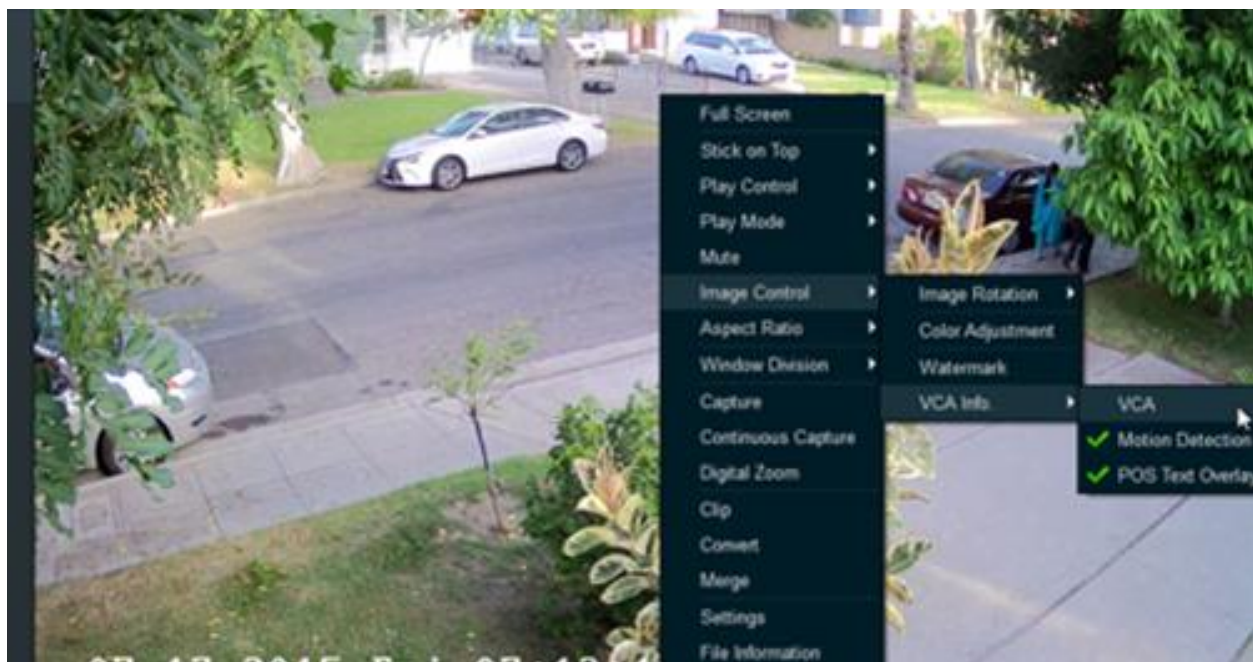

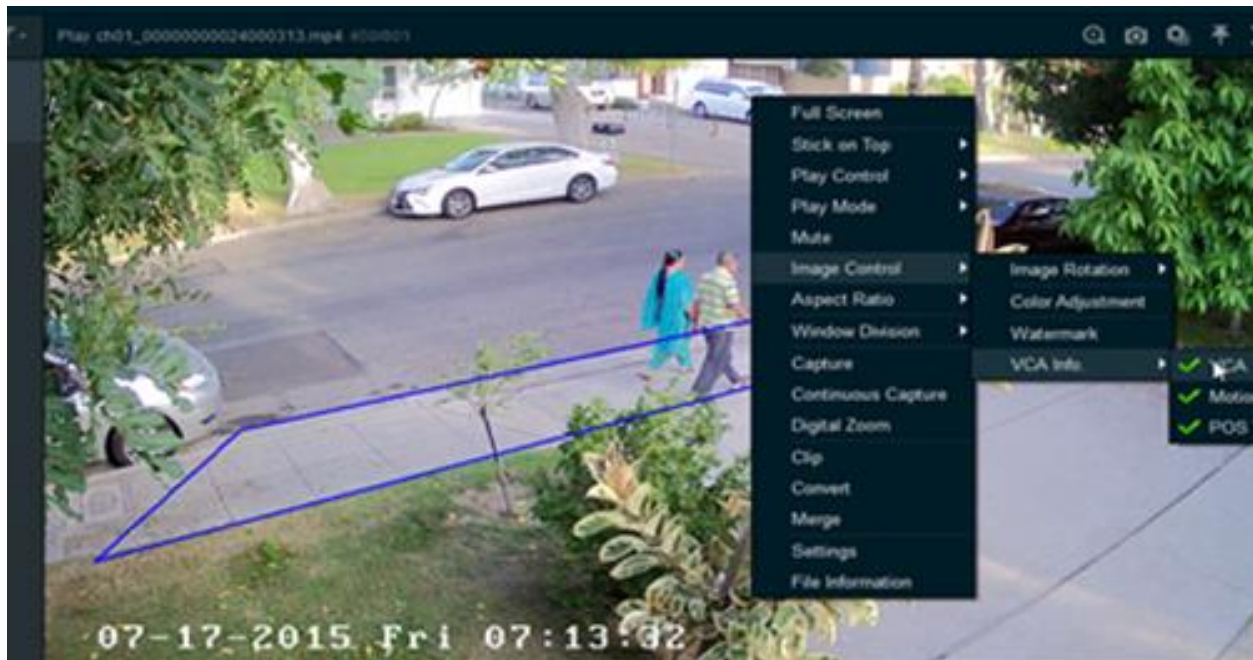

1. The new design player for Platinum DVR/NVR System supports several new features the previous version doesn't provide:

- Image Control: Supports POS txt overlay, support enable/disable VCA line/Motion line.
- Supports multiple layout in the same player
- Supports more converted video formats

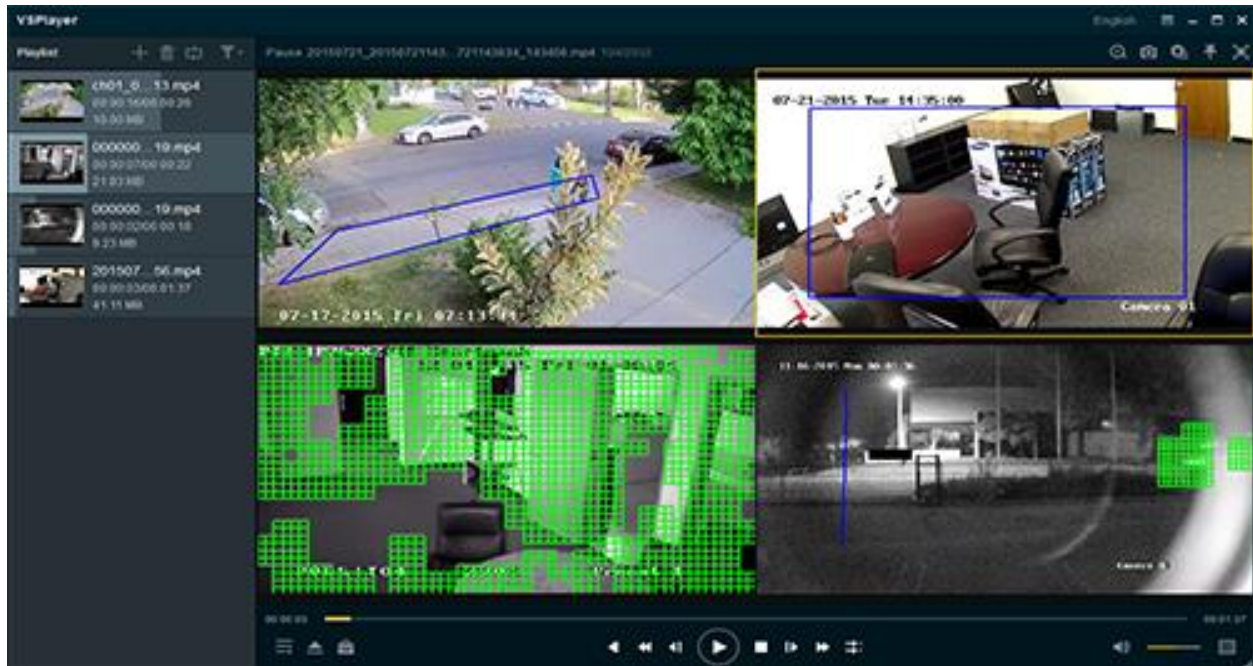

2. Right click on the Video portion.

3. Go to Image control -> VCA Info, then the Green check is enable.

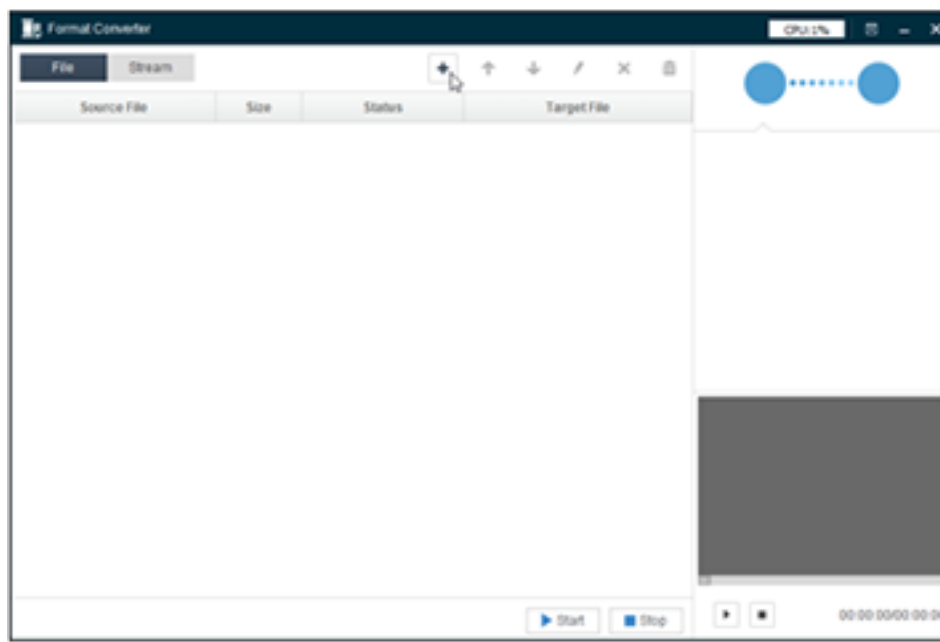

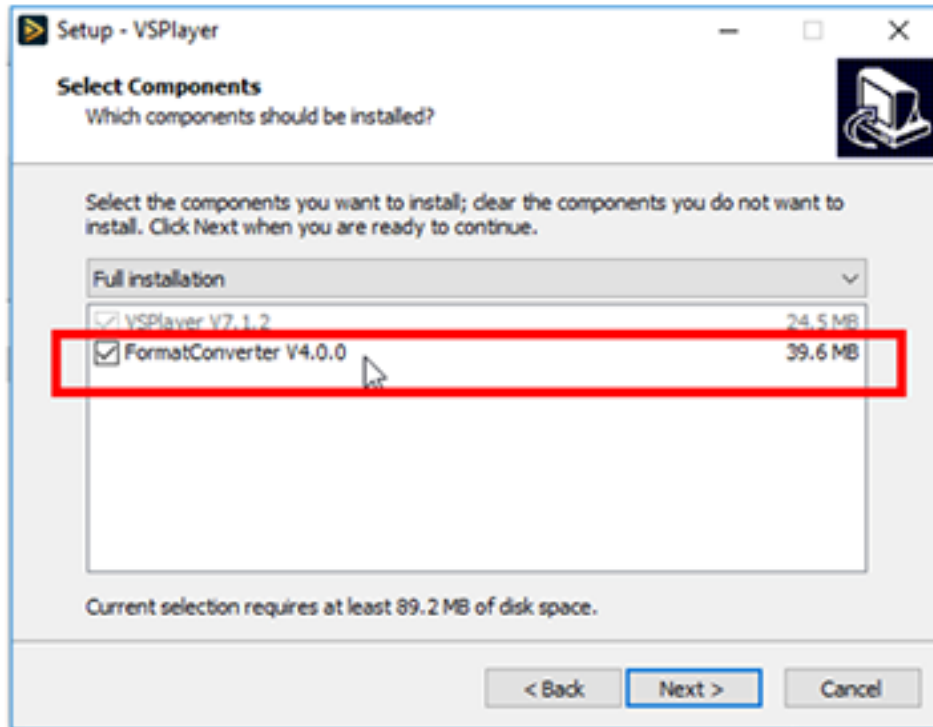

4. On the bottom right you can change display layout.
5. Then, drag and drop your video file into the window.

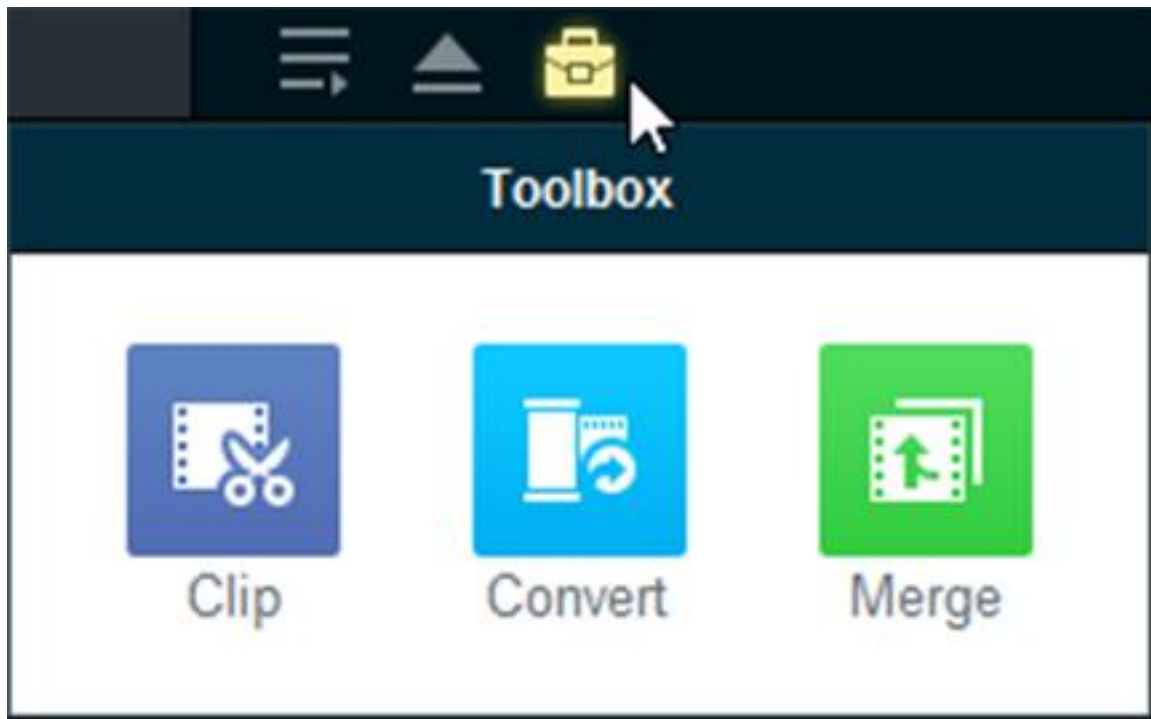

Video Conversion

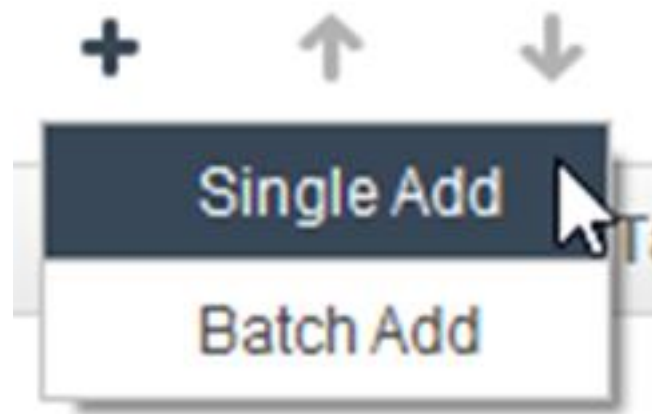

1. In order to use this feature, you need to install the component.

2. Select Toolbox icon and choose convert

3. Select [+] to add

4. Click [...] to browse your source video file

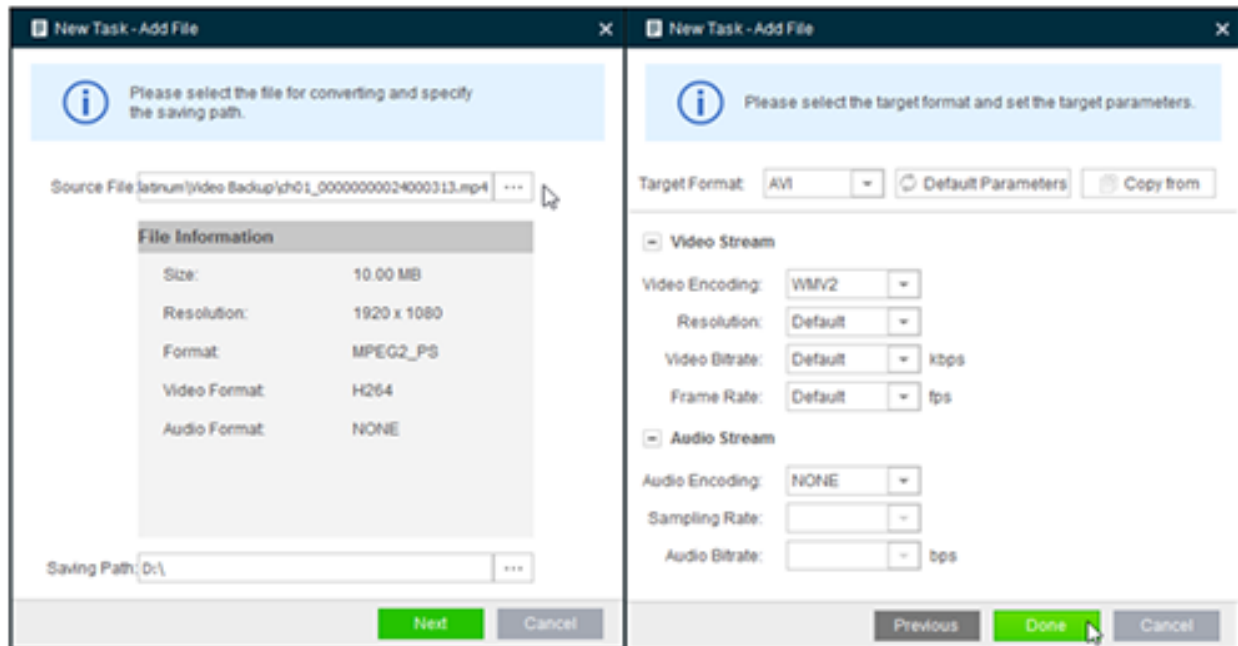

5. Change Saving Path. D:\

6. Click **Next>**

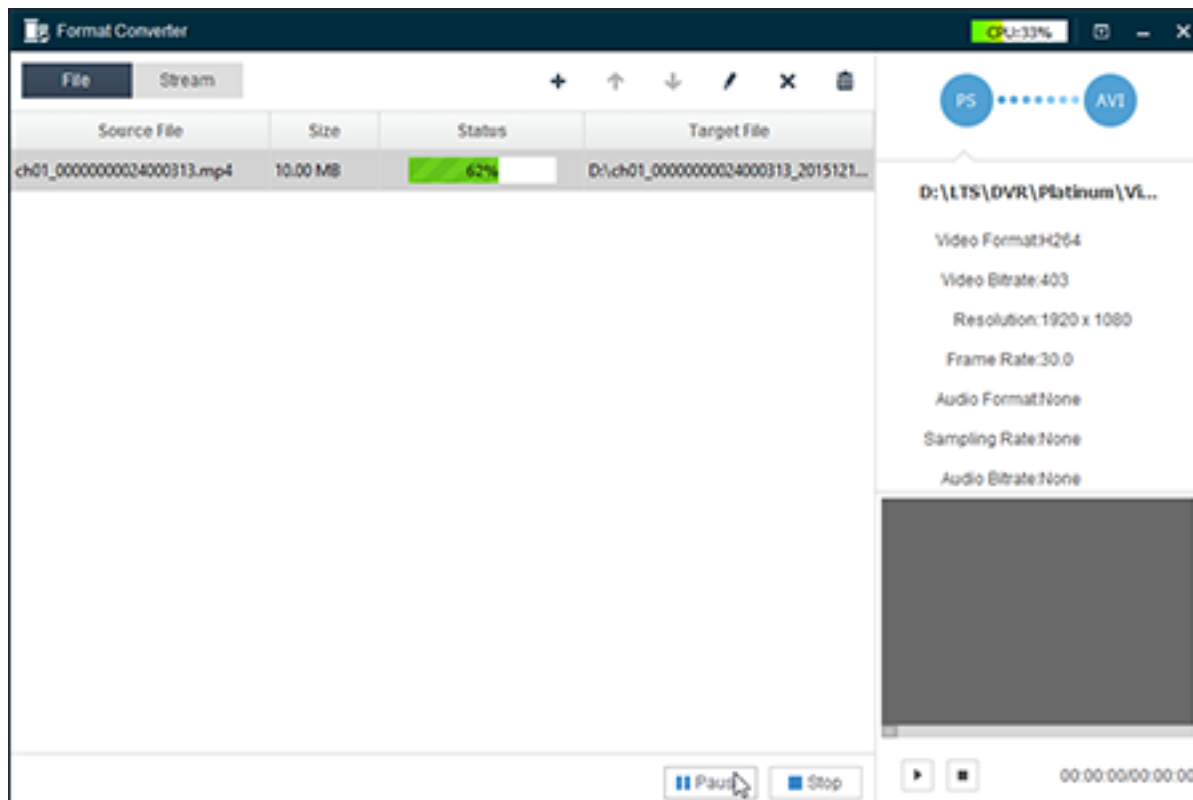

7. Change to different Format and then Click Done when finished.

Example: AVI

If you want to open easily from the Windows Media Player, suggest changing the encoding to WMV2

8. Click Start to begin

9. Go to the saved location and test the video file.
