

ELEMENTS™ ESSENTIALS

PLAYGROUND FAVOURITES

3

WOW

This great ESSENTIALS playground appeals hugely to children's play desires. With a multitude of classic climbing challenges and fun slide rides, children will want to try it out immediately. All children are highly intrigued by the age appropriately built structures. The pre-schoolers love the double slide unit, which supports their innate love of activity and social interaction. The school-agers have truly challenging climbs up, via the Jacob's ladder, and truly rewarding, fast, high slide rides down. The all ages products have higher platforms and slides taking two directions, to support turn-taking skills.

STAY

The fun, age appropriate playground makes children want to go again and again. Tirelessly, they will climb and slide to be rewarded with the amazing thrills of going higher and sliding faster. These ESSENTIALS play structures give children across different age groups a chance to aim for the next level. The variety of levels, climbs and slides guarantees that there is always a next level to aim for.

DEVELOP

The playgrounds boast lots of climbing up and sliding down. Apart from being great fun, this stimulates children's cross-body coordination and their senses of balance and space. These are important sensory motor skills that scaffold children's ability to move confidently and securely around the world and, for instance, judge distances when in the street. The loops of climbing and sliding train major muscle groups and cardio. The fun of playing with peers on the ESSENTIALS structures builds important life skills such as turn-taking and empathy, helping children make friends.

ELEMENTS™ ESSENTIALS

Physical play in premium quality

Sometimes, children need a place to burn off energy and explore their physical abilities through play. ELEMENTS™ ESSENTIALS is all you need to create a fun and physically developing playground for children of all ages.

The series is loaded with physical play that draws on classic play activities like crawling through, climbing up and sliding down, ensuring long play-times, high physical activity and all-round physical development of the child.
