<u>Quantity/Quality Hardship</u>	<u>Yes/No</u>	<u>Additional Information</u>
Is there an operating well that currently supplies the house?		
Is the well deeper than 60'?		
Has the well ever been deepened, re-drilled, or fractured?		
Does the well periodically go dry? How often?		
Have additional water storage facilities been added? Describe.		
The well on the property produces how many gallons per month?	N/A	
Has the production of this well been tested by a qualified contractor within the last 6 months? Who was the contractor?		

indian hills water district

<p>Has the water from the well been tested for potability within the last 6 months? By Whom?</p>		
<p>Did the water tests come back as unsafe to drink?</p>		
<p>Did the water test high for chloroforms?</p>		
<p>Is the water being treated? If treatment would make the water safe, is there an estimate of the cost of the treatment?</p>		
<p>Did the water test result show the presence of e-coli?</p>		
<p>Did the water test unsafe for any other contaminants? Please describe.</p>		
<p>Are there any other water quality problems?</p>		

Note: Please include all documentation regarding your hardship. Applications to be considered for hardship must have supporting documentation from qualified water experts. Specifically, documentation must be attached as proof of any well production or water quality testing. This testing must have been done within the last six (6) months and be performed by an accredited water testing contractor. The Indian Hills Water District may, at its discretion, have the testing re-done by its own contractors in order to validate the applicants test results.

In addition, a detailed written statement describing the reasons for hardship considerations should be completed by the applicant and attached to this application.
