

# Images for Dating Profiles

## Things to keep in mind...

**Smile and be approachable:** Choose images where you are smiling naturally and appear friendly. A warm and inviting smile can make you more approachable and increase your chances of getting matches. You only have ONE chance to make a first impression – make it a great one!

1. **Use high-quality images:** Make sure your images are clear, well-lit, and in focus. Avoid using blurry or grainy pictures as they can give off a negative impression.
2. **Include a variety of photos:** Use a mix of close-up and full-body shots to provide a well-rounded view of yourself. This can help potential matches gauge your appearance and get an accurate representation of you.
3. **Be authentic:** Choose photos that represent your true self. Avoid using overly edited or filtered images as they can create unrealistic expectations and disappoint your potential matches when you meet in person.
4. **Avoid selfies if possible:** While selfies can be convenient, try to include images taken by someone else or at least use a timer to take a more natural-looking photo. This can help you avoid the "selfie" stereotype and make your profile stand out. Be mindful of the background: Pay attention to the background of your images. Make sure it is clean, clutter-free, and not distracting. A clean and simple background can help keep the focus on you. Trust an experienced professional photographer to create images that represent you in your best light.
5. **Dress appropriately:** Select images where you are dressed appropriately for the type of relationship you are seeking. Dressing well and looking put together can leave a positive impression. Suit/tie... Suit open shirt collar jacket, Jean or slacks sweater/shirt/ Think – color – think condition --- think comfort--- and BE YOU. **\*\*PLEASE BRING YOUR CLOTHING ON HANGERS**, we do have a steamer, if you need a touch-up that can't be fixed in post-processing. **We want your images to represent YOU on your best day!**
6. **Showcase your personality:** Include images that highlight your hobbies, interests, or passions. This will help potential matches get a sense of who you are beyond just your looks.
7. **Remember to update your photos regularly:** Keep your profile fresh and up-to-date by replacing old photos with new ones. This will show that you are active on the dating platform and give potential matches a more accurate representation of your current self.
