What is the MPRP?

The Maryland Piedmont Reliability Project, or **MPRP**, is a proposed 70-mile-long electrical transmission line by PJM Interconnection.

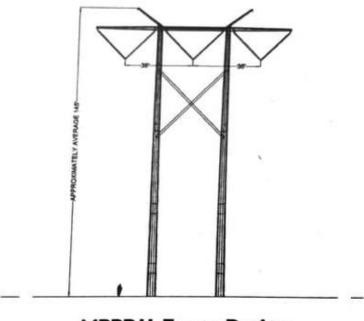

PJM Interconnection selected Public Service Enterprise Group (PSEG) for the Maryland Piedmont Reliability Project (MPRP) through a competitive bidding process.

The proposed routes, identified by PSEG, will almost exclusively use private and protected land, including homes, farms and businesses, for this new transmission line.

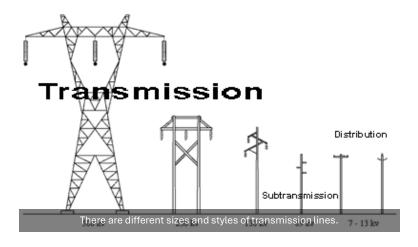

What kind of power lines does PSEG plan to install?

- The transmission line will be 500,000 Volts which is more than 2 times more powerful than most common existing transmission lines.
- The larger the power load, the more harmful the side effects.
- With more power, comes more negative impact. These high transmission power lines will cause significantly more destruction to property, more harm to the environment, and continue to come into question for causing more negative health impacts than existing power lines.

¹Importantly, there are viable alternatives with less potential impact that should be fully vetted, explored, and considered.

Maryland Piedmont Reliability Project - Public Comme

Stop MPRP, Inc.

July 9th was PSEG's first "public information session" and the first time many of us in Baltimore, Carroll, and Frederick counties in Maryland heard of the MPRP and discovered a company out of New Jersey was planning on taking private land for these new transmission lines.

A group of concerned residents, citizens, and farmers quickly connected with a single goal: Stop the MPRP.

We realized the best way to Stop the MPRP was to bring everyone together under one nonprofit organization to coordinate our efforts.

Stop MPRP, Inc. was founded.

Stop MPRP, Inc.

- Stop MPRP, Inc. is a nonpartisan, nonprofit organization dedicated to advocating for the residents, landowners, farmers, and local businesses across Baltimore, Carroll, and Frederick counties in Maryland. We are a grassroots, volunteer-driven organization committed to protecting our communities and preserving private land from the MPRP.
- Stop MPRP, Inc. is a 501(c)4 membership organization working to stop the Maryland Piedmont Reliability Project which poses a threat by proposing the installation of high transmission power lines on private land throughout these three counties.
- You can read more about us at www.stopmprp.com

Board Members

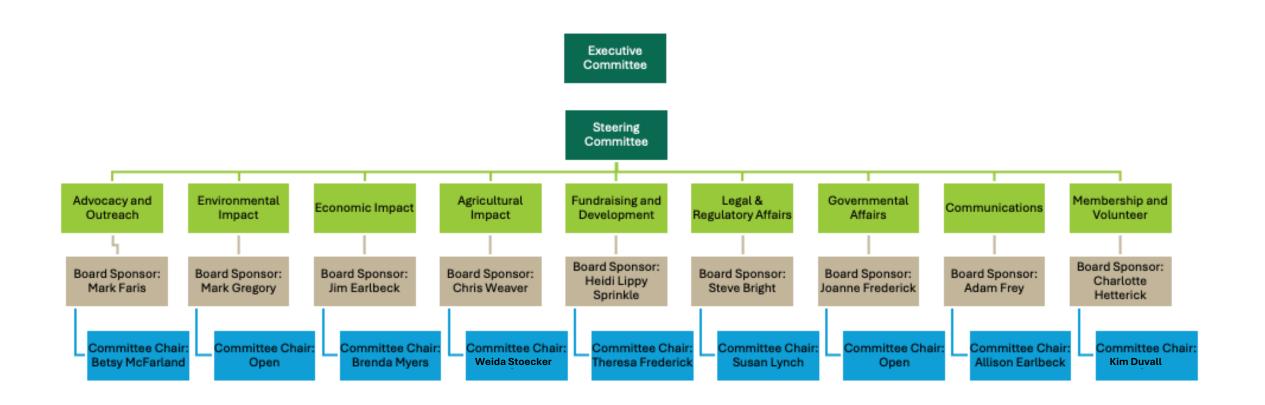

We have organized the Stop MPRP, Inc. board to have equal representation from each county. Our board members are:

- Steven M. Bright, Esq. (Frederick County)
- Jim Earlbeck (Baltimore County)
- Mark Faris (Frederick County)
- Joanne M. Frederick (Baltimore County)
- Adam Frey (Frederick County)
- Mark Gregory (Baltimore County)
- Charlotte Hetterick (Carroll County)
- Heidi Lippy Sprinkle (Carroll County)
- Christopher Weaver (Carroll County)

Stop MPRP, Inc. Mission Statement

At Stop MPRP, Inc., our mission is to protect and preserve the natural beauty and private lands in Maryland. We are dedicated to opposing the Maryland Piedmont Reliability Project (MPRP) and preventing the installation of high voltage power lines across privately owned land.

Through community engagement, education, and advocacy, we strive to uphold property rights, protect our farmland, safeguard our environment, and promote energy solutions that respect both our landowners and the well-being of our communities. Together, we stand committed to ensuring a future where progress and preservation go hand in hand.

Stop MPRP, Inc.'s Beliefs

Unfair Financial Burden - Maryland ratepayers shouldn't subsidize some of the largest and wealthiest corporations in the world. Every resident will feel the financial impact.

Better Alternatives Exist - Proven, viable solutions are available that don't rely on outdated transmission technologies.

Collaboration with Data Centers - Data centers are essential, but they should be required to generate or source their own power responsibly.

No Comprehensive Energy Plan - Maryland lacks an integrated energy plan, leading to critical gaps in our strategy for sustainable development.

Out-of-State Interests at Play - This project is driven by out-of-state companies, bypassing the needs of Maryland's communities.

Protecting Maryland's Agricultural Heritage - Maryland's farmers play a crucial role in preserving our agricultural legacy, food security, and economy.

Threat to Natural and Historic Landscapes - The proposed power lines will cut through Maryland's natural beauty, including farmlands, protected conservation areas, and historic sites.

Financial Update as of 9/17/24

Financial Summary (17 September 2024)	
Receipts	57,302.73
Expenses	29,142.08

Certificate for Public Convenience and Necessity (CPCN) Timeline

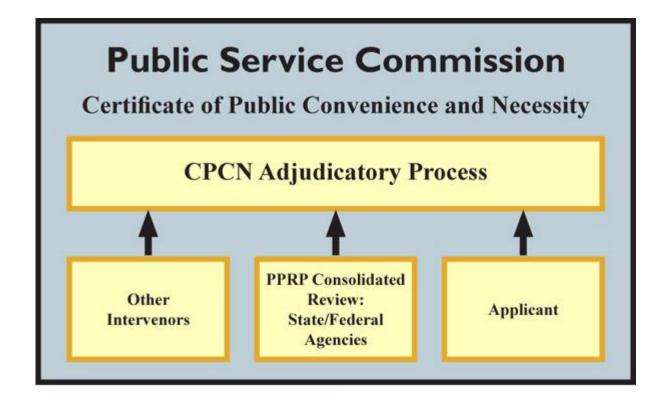

Filing as an Intervenor before the PSC

Maryland PSC Notice of Opportunity to Intervene: Once PSEG submits their request to PSC for their Certificate of Public Convenience and Necessity, you will have an opportunity to file as an intervenor.

Please make sure you are signed up for our emails so that we can notify you of the instructions when that time comes.

Know Your Rights

Understand Eminent Domain: The Maryland Piedmont Reliability Project (MPRP) has not yet been fully approved, and eminent domain cannot be used until it is. You are under no obligation to sign any agreements- especially before a permit has been issued.

Survey Agreements Can Be Destructive:

Allowing surveys can lead to damage to your property, including clear-cutting and use of heavy equipment. You have the right to deny survey access until they provide a court order or proper permits.

Beware of Pressure Tactics: Land agents may try to rush you into signing easements or survey agreements. Do not be pressured—tell them to come back when they have the necessary permits.

Consult Professionals: Before signing any agreements, consult with an attorney and tax consultant to protect your rights and interests. Please contact Stop MPRP, Inc if you need a referal to legal counsel.

www.stopmprp.com 28

Be a Holdout

Do Not Give In: Land agents want to avoid costly and lengthy eminent domain lawsuits, but we will not waver, so don't feel pressured into early agreements. Even if the permit is issued, we will still fight the MPRP until it is stopped.

Refuse Investment Group Offers: Some of those impacted have received offers from investment groups which may have nefarious intentions.

- 1. Exploiting Fear- aiming to "buy low" and "sell high" after we succeed in stopping the MPRP
- 2. Facilitating Easements- Some of these buyers could be aligned with PSEG and could be attempting to purchase key properties.

www.stopmprp.com 29

Key Actions

Demand Accountability: If you feel a land agent is using deceitful tactics or violating ethical standards, you can report them to the PSC.

Keep Records: Document all communications with land agents and keep copies of any agreements or offers. Get everything in writing. Everything.

Contact Stop MPRP, Inc.: We will provide support and guidance. We are compiling tactics that have been successful in other projects, and will share them IF needed. .

How You Can Help

Become a Member

• Visit stopmprp.com/membership

Donate*

- Online at GoFundMe gofundme.com/STOPMPRP
- Via mail to: Stop MPRP, Inc. P.O. Box 329 Parkton MD 21120. Please write "Donation" in the memo line of your check.
