

SHUNGITE POWDER

WHAT IS SHUNGITE POWDER?

Shungite powder or shungite sand is a shungite of fine fraction crushed with the special equipment. Currently on the market, you can find several fraction sizes of shungite powder. It is possible to mill shungite stones even into micron fraction. However, the most common sizes of shungite powder are 1-3 and 3-5 mm. These fraction sizes are more easy to produce and handle and suitable for almost any occasion.

Shungite is famous for its purification properties (mostly known for water purification) and is widely used in health care cosmetics. Shungite products include a complex of highly-active and natural anti-inflammatory, antibacterial, and analgesic components and are recommended to use as an effective adjuvant in treatment. Shungite health care products also intensively nourish and enrich you with vitamins, stimulate the synthesis of valuable elements, and promote rapid healing.

THE STORY BEHIND SHUNGITE POWDER...

The story behind the mechanics of Shungite is considered folklore by some, yet is documented in chronical records among the Judeo historical records. After Yeshua Jesus was died at Calvary and rose again after 3 days, many Jews and Christians alike fled out of Jerusalem. During the Babylonian era, many Jewish people were pushed into the Northern territories of Germany and Russia. In the Book of Genesis (Also known as the Torah to the Jewish people- the first five books of the Old Testament), God made a covenant with His people to redeem them from the Garden fall when Adam and Eve ate of the tree of good and evil. In Genesis 15, God made a covenant with Abraham and his seed, the Jewish lineage of God's people.

During the Babylonian Era when the Jewish people were pushed to the Northern territories of Russia, God's people cried out needing fuel to keep warm. God lead His people to areas in Russia where there was plenty of coal for fuel. The people cried our to God again needing their water purified. God answered the Jewish people by sending meteors from the Heavens. When the heat of the meteors hit areas of the coal, sandy soil, and water, God created Shungite mineral rocks. This mineral was then utilized to purify the water issues in the Russian areas and has been since utilized in external ways to help God's people. There is no protection in a stone, powder, or otherwise. Yet just like the manna that God sent to feed the children of Israel, God will send what is needed to take care of His children!

While sometimes God will supernaturally heal people or even feed people (like when He sent the manna to feed His children wandering in the wilderness for 40 years), sometimes God will send us a fishing pole and tell us where to find a patch of dirt with some worms to catch our fish. Yet in both provisions, God provides! Our hope and faith is found in the God of Abraham, Isaac, and Jacob and NOT in inanimate objects. Purchasing from this site not only helps to support our ministries, but each and every item sold is prayed over in the Might Name of Yeshua Jesus as we always seek to give ALL the glory to the Lord of Lords and King of Kings, our Abba Father in Heaven! Thank you for your support.

AREAS OF USEAGE:

Shungite powder has all the same unique protective and curative properties as shungite itself. This is exactly what define such a wide range of its use.

Primarily, shungite powder is used to create shungite paste, which may then be applied for a number of purposes. To make shungite paste you need to mix shungite sand with water at the ratio of 1:2 and thoroughly blend until the paste gets creamy.

CONSTRUCTION & DECORATION:

Thanks to its deep and attractive black color shungite paste is considered to be a stylish coating material and is widely used for decoration. Over the recent years, black color has become an integral part of interior design. Therefore, shungite powder can help you to create a stunning design with elegant black painted walls or some small black accents. Besides, in terms of construction shungite powder is also used to create conductive paint, mortars and plasters.

At the same time shungite powder is not just a means of decoration. If walls in your room are coated with shungite paste or paint you are fully protected from electromagnetic radiation. As you may know, regardless its form, shungite absorbs up to 98% of electromagnetic waves and brings the negative influence of EMF, both natural and artificial, close to zero. On this point shungite powder has a great advantage in comparison with shungite tiles or bricks. If shungite doesn't fit in well with the interior of your apartment you can just hide it underneath the wallpaper or parquet. In a word, shungite powder is an efficient and highly decorative way of your comprehensive protection.

HEALTHCARE & BEAUTY INDUSTRY:

Apart from construction, shungite powder, mainly, in the form of paste, is widely used in beauty industry and healthcare. Shungite powder has powerful antibacterial, anti-inflammatory effect and is recommended in case of acnes, inflammation, redness, rashes and some other dermatologic problems. Besides, since shungite improves metabolism and blood circulation, nourishes and regenerates tissues and has analgetic and calming effect, shungite powder is applied to treat osteochondrosis, radiculitis, sprains, strains and so on.

All shungite beauty and healthcare products are based on shungite powder. Besides, to repair your skin and other health problems you can make a shungite paste and apply it evenly to the problem area. Cover it with soft cloth and leave for 1-2 hours. Then wash it off thoroughly with warm running water or using cotton wool pad and olive oil. Also cosmetologists recommend adding shungite powder to your ordinary face or hand cream. Apply this mixture to dry and clean skin and rub it gently. Then whisk the cream off with the tissue. It enhances overall anti-aging effect and nutritional value of beauty products.

Moreover, numerous healing properties of shungite let use shungite powder as a filler of body pads. They help to reduce pain, and speed up the tissue recovery and other internal processes. Shungite-based body pads are believed to be an efficient adjuvant for physical therapy and treatment of soft tissue injuries, bruises, sprains, closed fractures and some other diseases.

WATER PURIFICATION:

Another major sphere of using shungite powder is water purification. Shungite sand is a widely spread filler for filters' cartridges, under-sink water filters and more sophisticated filtration systems. The common feature of all these filters is that contaminated water passes through shungite powder at a high pressure and all polluting elements remain behind. Thus, shungite powder is your access to crystal clear water.

AGRICULTURE:

What is more, nowadays shungite of fine fraction is comprehensively used in agriculture, mainly, as a fertilizer. Shungite powder mixed with other organic fertilizers accelerates plants' growth, regulates temperature and humidity conditions, stabilizes mineral composition of the soil and increases its fertility by 40%. In a word, if you are a passionate gardener or farmer and want to ensure rich and sustainable harvest maintaining the highest quality of soil shungite powder is a perfect solution for you.

OTHER SPHERES:

Speaking briefly about some other benefits of shungite powder, it is necessary to mention that it is applied in industry to produce ferroalloys, silica carbides, nitrides, and such polymer materials as, for example, fluoropolymer.

On top of everything, the popularity of shungite powder is currently on the rise due to the growing popularity of so-called orgone or organite items. Organite is the mixture of minerals, crystals, essential oils and other materials and it combines positive properties of all elements it contains. Organite items are believed to be a perfect tool for meditation and chakra balancing, emotional and spiritual healing.

All in all, as you may see shungite powder is applied almost in all spheres of our life. Due to its multifaceted nature it seems to be truly must have shungite item. With shungite powder, everyone will be able to satisfy his own demands.
