Alpha Tracker Client Portal

Why Choose Alpha Tracker for Your Enterprise

For Australian organisations managing asbestos, hazardous materials and compliance across multiple sites, the **Alpha Tracker Client Portal** provides secure, real-time visibility of your compliance position anytime, anywhere.

Designed for enterprise portfolios including government, education, healthcare, mining, utilities and commercial property, the Client Portal gives decision-makers, facilities managers and compliance teams instant access to the information that matters.
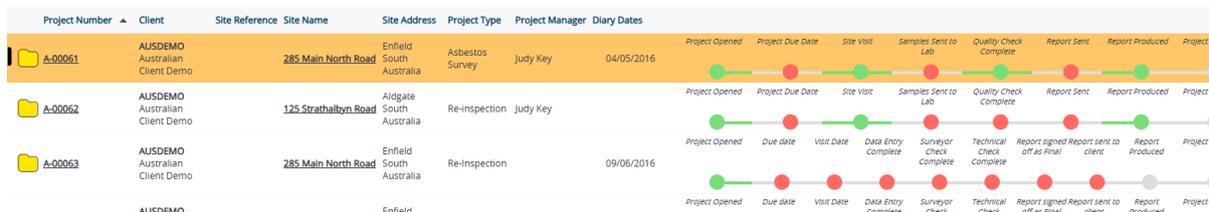

Enterprise Visibility Across All Your Sites

Project Pipeline

Track completed and outstanding milestones across your projects.
• Instantly see progress through each phase
• Filter open, closed or all projects
• Searchable and easy to navigate

Perfect for national portfolios requiring oversight across states and territories.

Site List & Compliance Summary

A consolidated view of your properties with compliance indicators at a glance.
• Drill down to Registers, Summaries and Notes
• Identify inspection status and upcoming actions
• Quickly spot high-risk or overdue items

Ideal for organisations operating under Safe Work Australia and state WHS regulations.
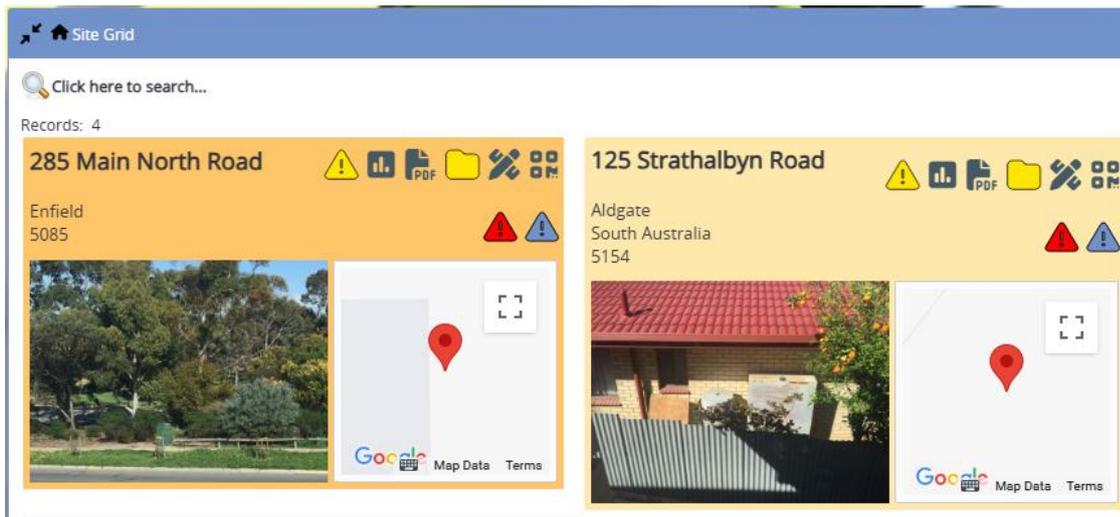

Site Grid – High Impact Visual Overview

A powerful enterprise view displaying:
• Site photos and map locations
• Direct access to Registers, Reports and Plans
• Upload folders and QR codes
• Multi-property comparison in one screen

Whether managing assets in Sydney, Melbourne, Brisbane, Perth or regional Australia, the Site Grid provides clarity in seconds.

Executive Dashboard for Decision Makers

The customisable Dashboard delivers:
• Graphical compliance overviews
• Risk summaries
• Report statistics
• Recommendation tracking

Board-level reporting becomes straightforward, with clear data to support governance and audit requirements.

Complete Register Access

Access the full suite of registers including:
- HazMat & Asbestos Register
- Non-HazMat Register
- No Access Register
- Removed Register
- Remediation Register

All registers are searchable, filterable and exportable, ensuring compliance documentation is always audit-ready.

Reports & Data Extracts

Enterprise-grade reporting functionality includes:
- Report Grid and Report List views
- Pending and Archived reports
- PDF downloads
- Management Information reports
- One-click Excel exports

Perfect for procurement teams, auditors and compliance officers requiring structured reporting.

Secure Document Management

Upload and manage supporting documentation including:
• Policies & Procedures
• Training records
• Contractor documentation
• QR codes for on-site access

All documents are securely stored and accessible via role-based permissions.

Built for Australian Enterprises

The Alpha Tracker Client Portal supports organisations that require:

✓ Multi-site, multi-state compliance visibility

✓ Secure cloud access

✓ Enterprise scalability

✓ Clear audit trails

✓ Real-time reporting

✓ Simple navigation for non-technical users

Why Enterprises Choose Alpha Tracker

• Centralised compliance management
• Reduced administrative burden
• Improved governance and transparency
• Faster response to risks and remediation
• Clear accountability across teams

The Alpha Tracker Client Portal transforms compliance data into actionable intelligence.

Take Control of Your Compliance Portfolio

If your organisation manages asbestos, hazardous materials or compliance obligations across multiple properties, the Alpha Tracker Client Portal delivers the enterprise oversight you need.
