

# Autism Support for Schools

Capri Support is a unique service as we will work with pupils who are both currently awaiting an assessment for autism and pupils with a confirmed diagnosis. We work closely with schools to confidently implement strategies and interventions which will help the children's social, emotional and academic well-being.

## Individual pupil support:

Through an initial assessment we can help to identify the area of need/s such as:

- Social interaction
- Social skills
- Anxiety, stress
- Repetitive behaviours
- Autodidactic learning
- Sensory needs
- Access learning through meeting individual needs
- Behaviours that challenge
- Emotional regulation
- Independent and life skills

From this initial assessment a programme of support will be developed and implemented by ourselves focusing on the main areas of need.

## Other areas of support we provide:

- We can support you to adopt a whole school approach to implement an inclusive teaching environment
- Consultations
- Design and deliver individual or small group intervention support
