

Autism Support for families

Capri Support is a unique service which offers a 1:1 bespoke service for families of children who are currently awaiting an assessment for autism or have a confirmed diagnosis. We provide hands on support to help families to confidently implement strategies and interventions for home, school, and the wider community.

Through an initial assessment we can help to identify the area of need/s such as:

- Social interaction
- Social skills
- Anxiety, stress
- Repetitive behaviours
- Autodidactic learning
- Sensory needs
- Access learning through meeting individual needs
- Behaviours that challenge
- Emotional regulation
- Independent and life skills

From this initial assessment a programme of support will be developed and implemented by ourselves focusing on the main areas of need. We will help to ensure that you and your family are confident in the strategies and resources needed that will help to support the individual needs of your child.

In addition to this we can also work collaboratively with yourself and school to put in place strategies which are consistent and thus will have the greatest impact on meeting your child's needs.
