

FRAMEWORK ALIGNMENT & IMPLEMENTATION

Alignment and Implementation of Risk, Security, Privacy, and AI frameworks

Risk

- NIST RMF
- ISO 27005

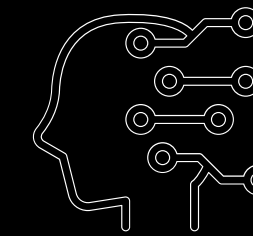

Cybersecurity

- NIST CSF v2
- NIST 171
- CIS

Privacy

- NIST Privacy Framework

AI

- NIST AI RMF
- ISO 42001
- IAPP AI Governance

Adopting a framework is a strategic move that can significantly strengthen an organizations posture around security, privacy, or risk. Frameworks provide a structured approach to managing risks and ensures your efforts are aligned with your business objectives.

As part of our vCISO offering, SR2 is able to manage those programs where companies want to outsource
