- 🌰 Accessible education mission
- 🌰 Playground/accessibility goals
- 🌰 Community impact

Ensuring individualized education is available for all families

Testimonials

"90% of our stress came from our son's school situation: the social issues, the educational issues, the emotional issues, the hopelessness and helplessness we all felt about him ever knowing success and being able to graduate and find a place for himself in the world... You and Great Oaks have provided us with all of this change, hope, and support. It is because of you and your dream that i feel like i have my life back and that my child might get his back too."

"GOL has been a wonderful alternative to public school for my child that doesn't fit in a "box". Ms. Sarah and her staff get to know each child and work with group and individual needs for success. Its small size allows the children to develop friendships and get the socialization they need. I can feel good about sending my child to GOL, I know she is not only in a safe, nurturing environment but also happy to be there."

Our Beginning

Great Oaks Learning began not as a business idea but as a calling. Over and over, I met children who were capable and full of potential - but discouraged, anxious or convinced they weren't good at school.

As a special educator, a sister of an amazing woman with special needs, and a parent of "out of the box" thinkers, I felt strongly that the differences we possess and learn are what makes us wonderful, and that education should reflect that truth. Great Oaks was built on the belief that every child deserves to be known, supported and nurtured exactly as they are - academically and emotionally.

Our Mission

To provide individualized, relationship-centered education that nurtures the whole child, academically, socially, and emotionally.

Small Ratios (1:5 in academy setting)

Personalized Instruction

Inclusive, welcoming environment

What Makes Great Oaks Different?

- 🌱 Small class sizes
- 🌱 Personalized Learning plans
- 🌱 Social-emotional focus
- 🌱 Flexible pathways
