

Earth's Main Harmonic

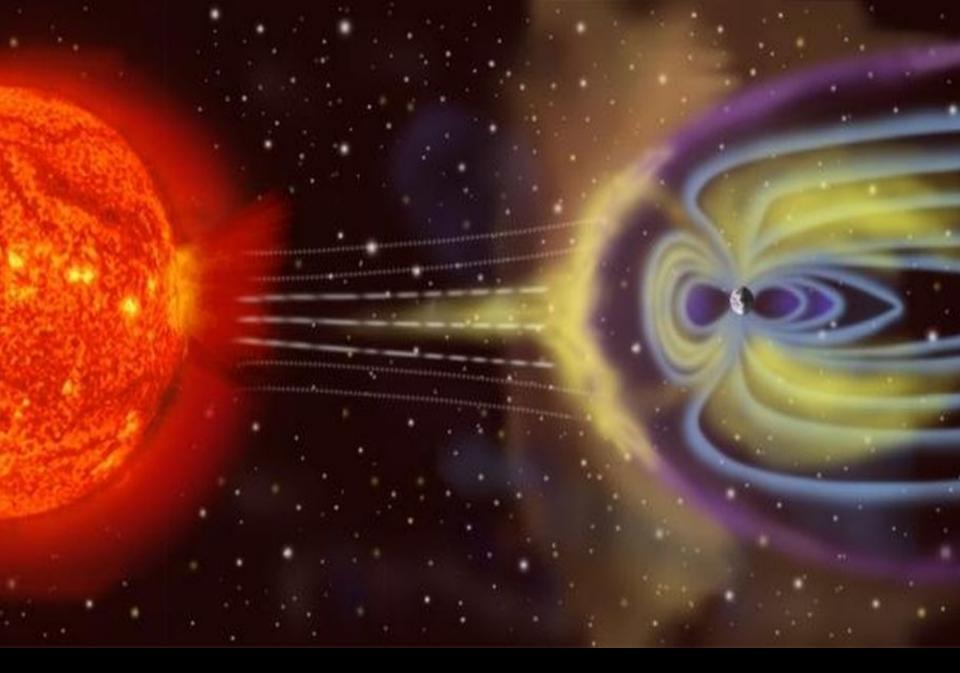

Is a series of frequencies
-Schumann resonance

"For years was a steady 7.83 Hz

In June 2014 it jumped 10% to 8.5 Hz

Constantly fluctuating as high as 16.5 Hz.

Earth's Magnetic Field Could Flip Much Faster Than Previously Thought

David Bressan Contributor ①

Science

I deal with the rocky road to our modern understanding of earth

f Our Sun emits a constant stream of radiation and particles into space.

Fortunately, Earth's magnetic shield shields most of this solar

bombardment from the surface. This field is constantly changing in

intensity and can even switch direction – turning the Magnetic North Pole

Quantum Physics and Q-Link

Q-Link® has been the front-runner in the research and development of resonating frequency technologies for more than 30 years.

Quantum physics showed that information, energy, and consciousness were all woven together in a mysterious way. - and Q-Link products have become a leading example.

Even early prototypes affected the rate of growth in plants and improved water.

This technology improved both biological and chemical systems, then it could possibly support the functionality - the human being.

Q-Link products are programmed with natural frequencies that result in an effect similar to the healthy, energizing experiences we have in nature, in positive interactions with others, and when participating in self-balancing and restorative activities.

All this taking less effort and energy to maintain

Take control of your world

Grounded in these scientific discoveries, at the very heart of all Q-Link® products is the proprietary crystalline core which we call Sympathetic Resonance TechnologyTM(SRTTM).

It is this SRT-core that reinforces the body's resonance, returning it to a clearer and more balanced natural state.

When two objects interact sympathetically, just like two similarly tuned tuning forks, or two friends coming together, their energies interact and amplify each other.
