

ASTRAL®

FOOTWEAR | SPRING SUMMER 2021

CANADA

# TRAIL

Astral Trail Shoes are a unique vehicle for traveling in the wilderness.

They are all built on the principle that shoes must respect our body's perfect biomechanics while enhancing grip and protection in rugged terrain.

Astral trail shoes are level from heel to ball.

They have a wide forefoot.

They dry fast and let your feet breathe.

The traction and grip is unbeatable.

They are as light as possible and engineered for durability.

Enjoy Nature with Astral Trail Shoes.

# TR1 SCUFFLER (MEN'S)

Built on our high performance TR1 chassis, this is our most rugged and versatile trail shoe. TPU overlays fight abrasion while a synthetic suede harness supports and protects the midfoot. Seamless lining and foam provide Cadillac-like comfort for cruising through any terrain. If you want a new-school "rugged outdoor shoe", we suggest the TR1 Scuffler.

ASTRAL

## FEATURES

### BALANCED GEOMETRY™

Our Level Footbed® and a wide toe-box allow feet to be in their natural position for predictable balance and proper biomechanics.

### RUGGED AND SUPPORTIVE EXTERIOR

TPU overlays at toe and heel fight abrasion while a microsuede harnesses at midfoot and rigid heel counter provide support.

### COZY INTERIOR

A seamless lining, light foam at collar and tongue and removable insoles provide "Cadillac" level comfort.

### TOP SHANK™

A rigid shank near the foot reduces fatigue while the EVA and rubber absorb impact and conform to the ground for a smooth ride in rugged terrain.

## SPECS

### INTENDED USE

Walking, Hiking, General Use

### UPPERS

Quick drying ripstop 2D mesh; protective TPU overlays at heel, toe and quarter; padded collar and tongue; rigid toe and heel counters for protection and support; removable Polygiene® treated insoles combat odor.

### MIDSOLE

Level heel to ball, with Top Shank™ to reduce foot fatigue.

### OUTSOLE

Our TRAIL GRIP™ outsole is crafted from G.15® rubber for astounding grip and traction. 5mm directional lugs bite into soil, while forefoot flex groves reduce weight and increase flexibility for the smoothest and safest ride.

### WEIGHT

# TR1 LOOP (WOMEN'S)

We've come full circle with our latest women's design, the Loop. Our 100% recycled polyester mesh upper is engineered for a seamless interior and provides maximum comfort. Like all Astral shoes she is water ready with quick draining and fast drying features. Her level footbed and balanced geometry is the same DNA you'll find in our entire Astral line of shoes. Whether you're going for a quick outing in town or for a long jaunt in the woods, the Loop will help you get there and back in comfort and performance.

## FEATURES

### BALANCED GEOMETRY™

Our Level Footbed® and a wide toe-box allow feet to be in their natural position for predictable balance and proper biomechanics.

### ENGINEERED MESH CONSTRUCTION

Using 100% recycled Polyester, we custom engineered the upper for exceptional breathability. This special process allows for a single layer, seamless construction that reduces weight and provides amazing level of comfort.

### COZY INTERIOR

A seamless interior, light padding at tongue and collar, and removable insoles create a welcoming place for feet... with or without socks!

### WATER READY™

With drainage for water, hydrophobic materials that dry fast, and unequaled wet grip these shoes delight in watery activities.

### TOP SHANK™

A rigid shank near the foot reduces fatigue while the EVA and rubber absorb impact and conform to the ground for a smooth ride in rugged terrain.

## SPECS

### INTENDED USE

Walking, Hiking, Running, Water

### UPPERS

100% recycled 3D engineered mesh with TPU frame, protective toe and heel cap, padded collar and tongue, supportive heel cup and removable Polygiene® treated insoles.

### MIDSOLE

Level from heel to ball, with Top Shank™ to reduce foot fatigue.

### OUTSOLE

Our TRAIL GRIP™ outsole is crafted from G.15® rubber for astounding grip and traction. 5mm directional lugs bite into soil, while forefoot flex groves reduce weight and increase flexibility for the smoothest and safest ride.

TRAIL GRIP™ OUTSOLE

MSRP \$180

# TR1 MESH

Our turbo ventilated and ultra-light hiker with sticky G® Rubber outsoles allow you to move quickly and confidently through both desert canyons or tropical trails.

## FEATURES

### TRAIL GRIP™ OUTSOLE

Carefully crafted 5 mm directional lugs increase traction in steep terrain and bites into loose soil. Open channels reduce weight and increase flexibility, creating a comfortable and natural feeling on or off the trail. Textured lugs maximize grip on smooth or wet surfaces.

### WATER READY™

Holes in front of midsole drain water while the mesh at uppers vent hot air.

### G.15™

This G® Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

### BALANCED GEOMETRY™

Level footbed and a wider toe-box allow feet to be in their natural position for excellent balance and proper biomechanics. Foot to ground distance is 21mm heel, 20mm ball.

### TOP SHANK™

Reduces foot fatigue while EVA and rubber absorb impact and conform to the ground.

## SHARED SPECS

### INTENDED USE

Hiking

### UPPERS

Ripstop 2D Mesh with TPU overlays at toe and heel cap. Supportive EVA heel cup. Removable Polygiene® treated insole. Heel tab. Includes alternate color laces.

### MIDSOLE

EVA, level heel to ball with Top Shank™ to reduce foot fatigue.

### OUTSOLE

Aggressive 5mm self-cleaning lugs with flex grooves. G.15™ high friction G® Rubber compound, non-marking.

# WATER

We started by making footwear for our friends and pro kayakers. We needed a single shoe that we could wear to work and in class V whitewater on the same day. Every day, all summer long.

They had to have the best grip and allow the best balance. They had to dry quickly, wash easily and sufficiently protect the foot in rocky, rooty terrain.

# LOYAK AC

Our best shoe for a water and sun based lifestyle. Ultra-fine ripstop mesh breathes deeply while keeping debris out. Our level footbed, wider toe-box and sticky G® Rubber outsoles promote ninja-like performance in slippery places.

## FEATURES

### FLEX-GRIP™ OUTSOLE

This rubber allows excellent flexibility and sensory feedback for heightened grip and balance. Maximized surface area for high friction on smooth surfaces. Divided lugs for substantial grip on loose dirt. Razor-sipping maximizes edges that bite into surfaces upon flexion.

### G.15™

This G® Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

### WATER READY™

Holes front and back of midsole drain water while the mesh at uppers vent hot air.

### BALANCED GEOMETRY™

Level footbed and a wider toe-box allow feet to be in their natural position for excellent balance and proper biomechanics. Foot to ground distance is 12mm heel, 11mm ball.

## SHARED SPECS

### INTENDED USE

SUP, Training, Sailing, Fishing.  
Not recommended for heavy whitewater use.

### UPPERS

Ultra-fine ripstop mesh, with TPU reinforcements to guard against abrasion. Sock-like entry with laces for security.

### MIDSOLE

Drop-in, 7mm thick 45 C closed cell EVA Foam with massage pods.

### OUTSOLE

Flex-Grip™ is non-marking, draining, super flexible, razor sipped, and has 3 mm lugs. Made with G.15™; our sticky, high abrasion compound.

# HIYAK

Astral's view of a proper bootie. It offers ground-conforming stability, foot protection and insulation without neoprene. The result is a lighter, more durable, fast drying water-boot with phenomenal gripping powers.

## FEATURES

### FLEX GRIP™ OUTSOLE

Maximum sole-to-surface contact for highest friction on smooth surfaces like boat docks, rafts, and tile floors. Razor-sipping increases quantity of edges that bite into a surface. Thin profile provides excellent feedback, and enhances grip and balance.

### G.SS™

This G® Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

### INSULATING AIRMESH

Like neoprene, the 3mm quilted Airmesh traps air between you and the waterproof shell and our mesh dries overnight instead of a month. It's also a much more environmentally responsible material.

## SHARED SPECS

### INTENDED USE

Water, Boat

### UPPERS

Hydrophobic canvas with 1060D ballistic nylon reinforcement rand. High top padded ankle protection with semi-rigid heel cup. Reflective logo at heel and tongue. Water-resistant laces hidden with Velcro over-flap.

# PERFORMANCE CASUAL

Our line of “casual” shoes are designed to be easy on the eyes for sure. They also perform in ways that most casual shoes do not.

Firstly, they respect the bodies perfect biomechanics. This means your feet are allowed to comfortably be in their natural position, which is level with room to move your toes. Most “casual” shoes jack up your heel and scrunch your toes.

Secondly, they all use our proprietary G® rubber outsoles which provides excellent grip on rocks, roads, or boat decks.

Thirdly, they are made from functional, high performance, low impact materials like hemp and recycled polyester.

Step out of the ordinary, and into the Astral realm of casual shoes.

# HEMP LOYAK

We combined our super soft Hemp Canvas upper and our low profile, high performance G® Rubber outsole to give you a stylish remix on our classic shoe. Ready for travel, an unexpected adventure, or just kicking it around town.

## FEATURES

### FLEX-GRIP™ OUTSOLE

This rubber allows excellent flexibility and sensory feedback for heightened grip and balance. Maximized surface area for high friction on smooth surfaces. Divided lugs for substantial grip on loose dirt.

### BALANCED GEOMETRY™

We believe that a foot's position in a shoe should be similar to when barefoot. This allows excellent balance and biomechanically natural lifestyle. Foot to ground distance is 12mm heel, 11mm ball.

### G.15™

This G® Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

# HEMP PORTER 2.0

The sails and ropes aboard explorer's ships were made from Hemp due to its durability and resistance to rotting. We thought it'd make sense for deck shoes too - we tried and it's awesome! Hemp uppers combine with a low-volume, high performance outsole to create a longer lasting, superior deck shoe.

## FEATURES

### FLEX-GRIP™ OUTSOLE

This rubber allows excellent flexibility and sensory feedback for heightened grip and balance. Maximized surface area for high friction on smooth surfaces. Divided lugs for substantial grip on loose dirt. Razor-sipping maximizes edges that bite into surfaces upon flexion.

### G.15™

This G® Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

### RESPONSIBLY SOURCED MATERIALS

Hemp requires a lot less water to grow versus cotton. It's grown without pesticides, herbicides or fertilizers. Our G® Rubber is 80% natural rubber and 20% synthetic. (We're working on that 20%).

### BALANCED GEOMETRY™

Level footbed and a wider toe-box allow feet to be in their natural position for excellent balance and proper biomechanics. Foot to ground distance is 12mm heel, 11mm ball.

## SHARED SPECS

### INTENDED USE

Casual, Travel

### UPPERS

77% hemp / 23% recycled polyester. Semi-rigid heel cup with padded ankle collar. Polygiene® treated insole; water-resistant laces.

### MIDSOLE

7mm thick, 45C closed cell EVA foam

### OUTSOLE

G.15™ high friction G® Rubber compound. Flex-Grip™, sipped and non-marking.

# HEMP BAKER

We mixed style, performance, and sustainability to create this super comfortable everyday shoe. Durable and naturally odor-resistant Hemp Canvas upper is stitched to a flexible and grippy G® Rubber outsole.

## FEATURES

### MARINE GRIP™ OUTSOLE

Maximum sole-to-surface contact for highest friction on smooth surfaces like boat decks, rafts and tile floors. Thin profile provides excellent feedback, and enhances grip and balance.

### G.15™

This G® Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

### BALANCED GEOMETRY™

Level footbed and a wider toe-box allow feet to be in their natural position for excellent balance and proper biomechanics.

# HEMP CHUKKER

Our take on the classic style worn by polo players. We use Hemp uppers on a performance midsole and sticky G<sup>®</sup> Rubber outsole. This versatile style wears well casually, at work, or during impromptu adventures.

## FEATURES

### RESPONSIBLY SOURCED MATERIALS

Hemp requires a lot less water to grow versus cotton. It's grown without pesticides, herbicides or fertilizers.

Our G<sup>®</sup> Rubber is 80% natural rubber and 20% synthetic.

(We're working on that 20%).

### BALANCED GEOMETRY™

Level footbed and a wider toe-box allow feet to be in their natural position for excellent balance and proper biomechanics. Foot to ground distance is 17mm heel, 16mm ball.

### GRANITE-GRIP™ 2.0 OUTSOLE

This rubber allows excellent flexibility and sensory feedback for heightened grip and balance. Maximized surface area for high friction on smooth surfaces. Divided lugs for substantial grip on loose dirt.

# PISGAH

This performance casual boot is inspired by the mid-20th century jungle boots worn by the French and Vietnamese military. It is waterproof, breathable, quick dry and made from recycled polyester canvas.

## FEATURES

### QUICK DRYING

Our years of experience building shoes for river guides gave us the skills to perfect the art of making shoes that dry fast.

### eVENT

We chose eVent because of its proven ability to breathe best in saturated conditions.

### TOP SHANK™

Reduces foot fatigue while EVA and rubber absorb impact and conform to the ground.

### TRAIL-GRIP™ OUTSOLE

Carefully crafted 5 mm directional lugs increase traction in steep terrain and bite into loose soil. Textured lugs maximize grip on smooth or wet surfaces.

### G.15™

This G® Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

## SHARED SPECS

### INTENDED USE

# HALESTORM

Supremely functional, stylish, and sustainable; we pair our aggressive Trail Grip™ outsole with an upper that balances waterproofness and breathability. The full wrap WeatherGuard shields bottom of the boot from rain or slush while the supple, sustainable hemp upper provides comfort and durability. For trail or town, this boot is the best for both worlds.

## FEATURES

### TRAIL GRIP™ OUTSOLE

Carefully crafted 5 mm directional lugs increase traction in steep terrain and bites into loose soil. Open channels reduce weight and increase flexibility, creating a comfortable and natural feeling on or off the trail. Textured lugs maximize grip on smooth or wet surfaces.

### G.15™

This G® Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

### BALANCED GEOMETRY™

Level footbed and a wider toe-box allow feet to be in their natural position for excellent balance and proper biomechanics. Foot to ground distance is 19mm heel, 18mm ball.

### WEATHERGUARD

Using the same material used in drybags, we encase the lower part of the boot with a water and snow resistant protective layer, to guard you from mud, water, snow and slush.

### SUPER SUSTAINABLE HEMP UPPERS

UV and abrasion resistant, naturally anti-microbial, and grown without pesticides.

## WHY HEMP?

### ENVIRONMENTAL BENEFITS OF HEMP

Petroleum-Free! Only needs soil, water and sun to grow.

Typically grown without pesticides, herbicides, or fertilizers.

Ecological footprint is 47% lower than conventional cotton, and 9% less than polyester.

Requires 79% less water to grow than cotton.

Improves the soil.

### PERFORMANCE BENEFITS OF HEMP IN FOOTWEAR

Extremely durable. Better abrasion, tensile, tear and UV resistance than cotton.

Naturally antimicrobial.

Does not rot or stink.

Highly breathable.

Gets softer with age.

Totally washable.

# FILIPE & ROSA

We've "Astral-ized" the beloved flip-flop. We use super-sticky G<sup>®</sup> Rubber on outsole and footbed to seriously reduce foot slippage. They instantly convert into a "sandal" via a simple accessory strap. Hike, swim, climb a dune, run around, whatever! This is the ultimate flip-flop.

## FEATURES

### ANKLE STRAP ATTACHMENT

Converts to an action sandal. 15mm polyester webbing with acetal ladder lock.

### G.15™

This G<sup>®</sup> Rubber compound is formulated for premium grip while also providing excellent abrasion resistance. Its low durometer means the rubber is softer and therefore conforms well to the ground.

### FLIP GRIP™ OUTSOLE

Maximized sole-to-surface contact for superior friction on smooth surfaces such as boat decks. Razor-sipping increases edges for gripping. Lug pattern aids in flushing debris from the sole to keep it looking and feeling fresh.

### BALANCED GEOMETRY™

Level footbed and a wider toe-box allow feet to be in their natural position for excellent balance and proper biomechanics.

## SHARED SPECS

### INTENDED USE

Casual, Travel

### UPPERS

Cushioned Synthetic leather with embroidery and emboss details. Soft, wicking knit liner, reflective star at center and soft nylon webbing toe post.

### MIDSOLE

Dual density EVA with G.15™ Rubber pods at foot bed.

### OUTSOLE

G.15™ high friction G<sup>®</sup> Rubber compound. Sipped and non-marking.
