

STREAM

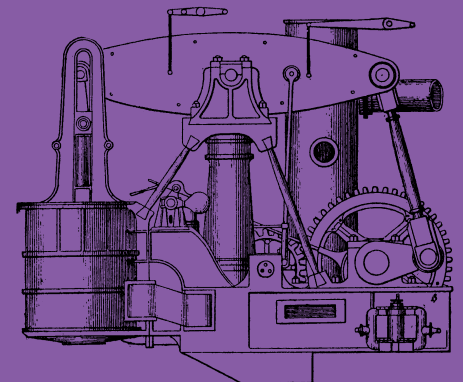

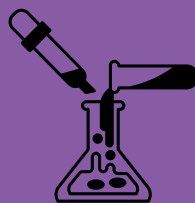

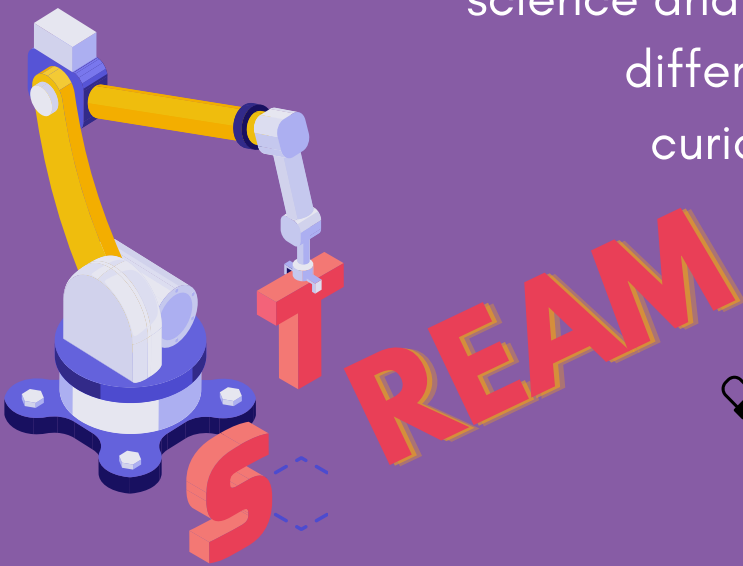

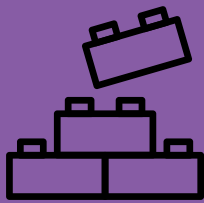

In our Catholic School!

Inspire student to think creatively, collaborate, and solve problem while incorporating our SLEs and mission statement..

Projects include guided building (often themed around biblical topics) and imaginative inventing to help the less fortunate. Introduction to critical and logical thinking through robotics. Topics often aligned with science and math curriculum. Students explore different projects to help stimulate their curiosity, creativity and collaboration.

St. Mary's Catholic School prepares students to be leaders in worship, work, and the world through Roman Catholic teachings, rigorous academics, and service to others.
