PREFACE

The information has been prepared to give parent's easy references to the policies, goals, philosophies and expectations of Penny Lane Daycare, a state licensed center.

PROGRAM PHILOSOPHY AND GOALS

Penny Lane exists to provide the community with a service of preschool and licensed child care facility combined into one. All children are accepted from age 6 weeks to age 10 and are given the best possible care that we can provide for them. Our program addresses the special needs and interests of all children, including those with disabilities. We strive to provide them with the right to be included with their peers in all age-appropriate activities. Penny Lane promotes an inclusive program and maintains daily routines for every individual child, regardless of their disability or special need. Every child is an individual with lots of capabilities not yet explored. Penny Lane uses all the developmental areas; physical, cognitive, social-emotional and language to help children and families experience their needs in a natural environment that is safe, healthy and developmentally appropriate. As a private corporation that is not-for-profit, we have a financial goal. The center must operate in a responsible manner to provide to the community a caring program with instructional guidance as economically possible.

MISSION STATEMENT

Working with young children is rewarding and challenging because there are many family lifestyles to take into consideration. Knowing that Penny Lane Daycare can make a difference in one child's life is a great feeling of accomplishment. Our goal is to watch children grow and learn in all the developmental areas needed. We want to give children the opportunity to help them succeed in life; and a positive attitude in order to be prepared for the challenges that will occur in the future.
