

# Microsoft Windows 11 Helps Your School Achieve More by Understanding the Needs of Everyone

Education leaders are solving their biggest problems across all institutions by implementing the right technologies with Windows 11 . Windows 11 devices are affordable, easy to deploy, help minimize the distractions of hybrid learning, address Internet connectivity concerns, and keep students engaged in lesson plans.

Windows 11

**Students** want solutions that adapt to them. Windows 11 devices use built-in adaptive software to deliver a more symbiotic learning experience. The fresh, calm, and modern user experience connects students to what they love, and adapts to how they want to learn and work.

**Educators** desire products that are cloud ready, but not cloud dependent. Windows 11 devices have tools that minimize distractions along with HD cameras, clear audio, and long battery life. Teachers can rest assured that the focus will be on their lesson plans.

**IT Managers** need devices that are easy to deploy, manage, repair, and secure. Windows Autopilot paired with Windows 11 devices are designed with this in mind—all while featuring the industry-leading security features that IT expects.

**School Administrators** require technology that's affordable, accessible, and meets the ever-increasing demands of hybrid learning. Microsoft's cloud services, like Microsoft 365, provide schools greater control over their technology and lessen the need for expensive infrastructure to manage it.

Contact us about how Windows 11 devices and apps will help your education institution achieve more!

# Reimagining Learning Environments with Windows 11

75% of schools say they would ideally offer digital tools, like one laptop per student, and 87% of teachers expect to use more technology to teach this year. Those expectations will only increase, so stay ahead of expectations with Windows 11 solutions.

## Windows 11:

Several Windows Device options were crafted with education and hybrid learning needs in mind:

- Affordable laptops and tablet options, starting at \$219
- Special licensing pricing for Microsoft 365 Education, which includes Microsoft Teams
- Easy to deploy, manage and repair
- Free training, tools, and workshops to build confidence in teaching and learning
- Accessibility tools for vision, hearing, and speech

## Windows 11 SE:

Inclusivity and equity are important to Microsoft—that's why they've designed a unique, built from the ground up OS specifically for education.

- Streamlined and secure with a simplified user experience
- Optimized for online and offline work
- Compatible with the best of Microsoft 365
- Improved accessibility with touch screen and voice typing
- Optimized for cloud managed services, providing greater control over technology and lessening the need for expensive management infrastructure

Microsoft Learning Tools have more than 7 million monthly active users across Word, OneNote, Outlook, Microsoft Edge, and Office Lens<sup>2</sup> and is supported in more than 30 languages. Learning Tools increase reading speed and comprehension for students of all abilities, leading to test scores that are 10 percent higher than students who did not use Learning Tools.
