

Lightspeed Restaurant is the **fast, flexible platform** that **simplifies your processes** and **connects your teams** so you can focus on what matters.

Lightspeed Inventory

Take full control of your stock, recipes and margins with automated inventory management that helps you order what you need, reduce waste and improve menu profit. **Seamlessly integrated with Lightspeed Restaurant.**

Help save money by keeping your inventory costs under control.

Boost your profits with **automated inventory management** that reduces hours spent managing stock, reduces waste with **smart planning** and **purchasing tools** and helps you make better purchasing decisions based on costs.

Save time ordering stock and chasing deliveries.

Reduce time spent stocktaking and ordering by setting up **automated recurring orders to your suppliers** and getting automatic stock up to PAR levels. **Save valuable time** by having your batches prepared in advance and all recipes kept in one place.

Help maximize profits and understand how menu items impact your bottom line.

Maintain **consistent quality and healthy margins** with intuitive recipe building and suggestive menu pricing. Plus, **easily view recipe costs** as ingredient prices change and always **have stock on hand** so you can maximize your profits and never run out of ingredients.

Manual inventory management takes time. Lightspeed Inventory does it for you.

- ✓ View current stock levels on hand and current stock value in real time per location.
- ✓ Manage your suppliers in one place, map items to suppliers, automate POs and order to PAR.
- ✓ Create recipes based on individual ingredients with recipe costing, suggested menu pricing and prep instructions.
- ✓ See accurate purchase price histories for your ingredients, record the cost of an item when sold and track actual gross profit %.

Inventory allows us to have an accurate stock count across our five franchised locations as well as our sales channels. We've got a three way interaction with our customers: through the app, on the retail side in the shops and when having a glass or bottle in the shop. We have our in-house sales and then our app sales, which are digital. Being able to have these two separate sales points speaking to each other, and amalgamate the sales data, makes Lightspeed is a very powerful tool.
