## VITA TV

After much effort, VITA TV went live again. Shown here on a digital TV set via livestreaming youtube. The setup was clumsy, but we did manage to get a three-hour AMOC special up. One of the content was a piece to camera about the spiritual aspects to AMOC.

AMOC—Atlantic Meridional Overturning Circulation—is a global ocean current that distributes heat around the world that is slowing down due to global heating. Ironically, if it stops, it threatens to cast Western Europe into a new ice age.

 Guy Lane: author Vita Sapien Philosophy @guylane.bsky.social · 10mo

Today, I went to Frinton-on-Sea to buy a power cable for my laptop, and while I was there I visited the beach where I recorded a piece to camera about AMOC & Ecological Spirituality.

## Once a Synodic Month

The Vita Sapien Moon Rise Poem—Once a Synodic Month—was set to music.

### Full Moon Rise Poem

An initiative of Vita Sapien

**Once a synodic month**  
The Full Moon Rise

**The loom enters your view**  
Before the Moon  
An entrée diaphanous  
Ahead the main opaque

**Photons form the loom**  
Forged by Sun, bounced off rock  
Distorted in the bubble of air  
That keeps us safe from space

**Once there was Earth**  
Then along came Theia  
Now there's just  
Earth and Moon

**She's up there alone**  
Scorched by daylight, frigid by starlight  
Her same-face always toward us  
Watching-over big sister Earth

**Moon is full when celestial bodies align**  
Sun-Earth-Moon, a sensuous syzygy  
On that night and on either side  
A Full Moon rise

**After loom comes illusion**  
Astronomy & psychology combine  
On horizon, the Full Moon seems  
Much larger to our eyes

**The time between Full Moon rises is about 29.53 days. This is called a Synodic month. Slightly different to a calendar month.**

**The Full Moon rise is first visible by a glow around the Moon called the loom. The loom is diaphanous which means translucent (see through), and the Moon is opaque i.e. you can't see through it. In a restaurant, the entrée comes before the main course.**

**The loom is comprised of photons which are 'particles' of light that are emitted by the sun, reflected from the rocky surface of the Moon, then distorted by Earth's atmosphere (air bubble) to create a glow.**

**The main theory about the origins of the Moon is that 4 billion years ago, Earth was struck by a planet called Theia. The debris orbited Earth before congealing into a ball that became the Moon.**

**There are no people on the Moon. With no atmosphere, the surface of the Moon is about 127° Celsius on the sunlit side, and -173° Celsius on the dark (starlit) side. As the Moon's rotation is in phase with Earth, we always see the same side of the Moon.**

**The Moon is full for a brief instance when the Sun, Earth and Moon come into perfect alignment. The alignment of three celestial bodies is called a syzygy. For most places in the world, the Full Moon rise takes place some hours after the so-called 'Syzygy Moon'.**

**After the loom, the Full Moon becomes visible, causing an optical illusion called the Moon illusion in which the Moon seems much larger than it really is.**

**Moon illusion invokes Amazement, Wonder & Awe**

**An inspired chapter**

**Once a synodic month**

**By light & gravity, the lunar phase**

**Shapes the sphere of life**

**Did LUCA evolve in tidal pools**

**On the shore of an ancient sea?**

**Spawn of coral**

**Sprout of seeds**

**Beach-hatched turtles**

**Nocturnal bees**

**Migrating birds overfly**

**Moon-lit hunting fields**

**Observing Full Moon rise**

**Is ecological spirituality**

**That is why we gather tonight**

**Time to reflect in reflected light**

**We've entered a dangerous phase**

**A time of heat and chaos**

**How long this lasts is now unknown**

**That depends on the sapient ones**

**If we are to survive & thrive**

**We need to sync with natural cycles**

**And we can do that**

**Every 29 days**

**Once a synodic month**

**The Full Moon rise**

**The Moon illusions fosters a spiritual enlightenment in people, a peak experience provided free by nature once a month. Thanks nature!**

**The Moon has a profound influence on life on Earth. One theory is that life on Earth evolved in pools of water left behind by the rise and fall of ocean tides, the result of the Moon's gravity. LUCA is the Last Universal Common Ancestor.**

**Many other biological phenomena are triggered by the Moon phase. Creatures spawning, seeds sprouting, etc.**

**When a spiritual enlightenment comes from nature, this is called Ecological Spirituality. Advancing Ecological Spirituality is Vita Sapien's primary mission.**

**Moonlight is sunlight reflected from the Moon. The dangerous phase is the onset of climate & ecological collapse, what we refer to as the Anthropocene Crisis.**

**Sapient means wise. We need wisdom to think our way out of the Anthropocene Crisis. We also need to connect spiritually with nature, to become present to her natural cycles.**

**Once a month, the Full Moon rises, giving us an opportunity to gather together and reaffirm our commitment to protecting our only home.**

**Vita Sapien innovates at the intersection of environmental science & ecological spirituality.**

## Cyclone Alfred

Vita Sapien provided a running commentary on Cyclone Alfred as it bore down on Brisbane and the Gold Coast through a Ko-ii blog. Alfred was something of a fizzle after a very long build up. Lots of rain. Some flooding. But no significant devastating winds and storm surge.

Later, Guy Lane interviewed climate scientist Paul Beckwith and asked how long before a Category 5 cyclone took out the Gold Coast like Hurricane Otis did to Acapulco, Mexico in October 2023.

Otis was notable as went from a tropical storm to a Category 5 Hurricane in less than 72 hours leaving no time for Acapulco to prepare for the destructive force of the storm.

Some of the interview was cut into a piece of Vita Sapien music to create a video titled Alfred Today Otis Tomorrow. The lyrics are formed from the science paper *Trajectories of the Earth System in the Anthropocene*.

## Vita Sapien Art

While the world uses AI for Karate Cat videos, Vita Sapien judiciously uses it to convey Vitan Themes. Here Gya meets the Planetary Boundaries.

Gya is the supernatural being in Vita Sapien Philosophy representing the totality of life on Earth—plus the ocean, atmosphere and soil—as a single living organism.

The Planetary Boundaries represent the nine biophysical systems that must be maintained to ensure a safe operating space for humanity and the Living Planet.

16 July, 2025

## Earth New Year 2025

A small cohort of aficionados gathered in Orleigh Park for the New year Celebration.

As per the plan, the Gadget detonated at 9.29pm AEST.

However some hapless planning led to a technical failure and there was no LED torch placed behind the Gadget.

As a result there was no bright flash of light to accompany the deer-scaring bang!

Earth New Year—9.29pm AEST—commemorates the Alamogordo bomb test—as per the movie Oppenheimer—as a defacto date for the beginning of the Anthropocene Epoch.

Earth New Year has been practiced annually since 2018.

30 July, 2025

## Koalas Don't Read Maps

Vita Sapien visited forest governance expert Dr Tim Cadman in Bellingen. We took a trip into the forest to map the big trees and search for evidence of koalas in the path of the Forestry Corporation bulldozers.

There, we shot a short video in front of a tree stump that marked a coup that held the highest concentration of koala in the known universe. The video was posted to Vita Sapien youtube and got 1,000 views.

Guy Lane: author Vita Sapien Philosophy @guylane.bsky.social · 4mo

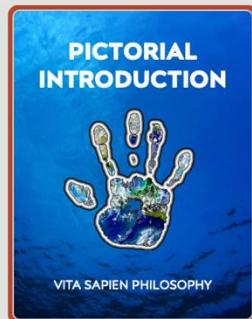

I had the honour of accompanying Dr Tim Cadman on a mission to the place where koalas congregate in greatest numbers than any place in the known universe. And you know what the Australian NSW Government wants to do to that place: cut it down for pulp and timber.

## Join Vita Sapien – 5 minute pitch

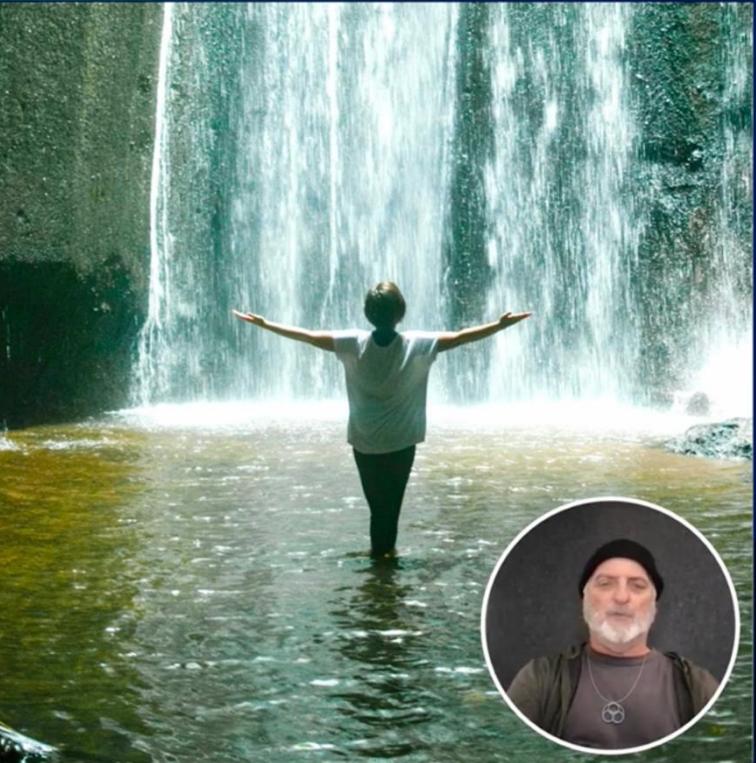

Five minute youtube video introducing key aspects of Vita Sapien Philosophy.

At Vita Sapien we continue to improve upon our video production quality and content. Despite lacking professional equipment and studio space, we produce reasonable content.

<https://www.youtube.com/watch?v=FGwj69nwyGU>

### SPIRITUAL RECONNECTION

Today there are **8.2 billion humans** on Earth, most of whom hold spiritual beliefs that do not teach that the biosphere is a **sacred life-support system**. These unsustainable beliefs are a root cause of the climate and ecological crisis that threatens to undo us all. Vita Sapien Philosophy helps people **reconnect to our innate, nature spirituality** despite living modern lives.

## Interviews with Nigel Grier

In 2025, Guy sat two interviews with Nigel Grier from Grier and Associates. Nigel is a Vita Sapien ally who has a world of experience in Earth Work.

The image shows a YouTube video thumbnail. At the top, the channel name 'VITA SAPIEN' is displayed in white on a blue background. Below the channel name are two video stills: on the left, a man with a shaved head and a dark shirt; on the right, a man with long white hair and a beard, wearing a dark t-shirt and a necklace. The video title 'Nigel Grier talks to Guy Lane about Vita Sapien' is centered below the stills. The channel stats 'Vita Sapien 370 subscribers' are at the bottom left, and 'Analytics' and 'Edit video' buttons are at the bottom right. The background of the thumbnail is a blue underwater scene with bubbles.

## **Ecosystem Spirituality**

Recognising that Eco-spirituality, Spiritual Ecology and Ecological Spirituality are flawed concepts, Vita Sapien set mind to create a new framing of the spiritual connection to nature that would serve humanity in advancing the Verdant Age.

Thus was born the concept of **Ecosystem Spirituality** in draft form. A two-page dossier was drafted and some artwork produced.

## Ecosystem Spirituality

### Ecosystem Spirituality

**Ecosystem Spirituality** refers to a human being having a spiritual bond with life on Earth.

**Ecosystem Spirituality** is framed through four dimensions:

- SCALE
- TIME
- SCOPE
- DEPTH

#### SCALE

**Ecosystem Spirituality** describes spiritual relationships across the dimension of distance and size:

- At the lesser scale, the micro-flora ecosystem within us
- Local ecosystems: in your fish-tank / your backyard / the path of a walk that you take / the places you visit in your daily life
- Place-based spirituality in a bioregion e.g. indigenous worldview
- The global ecosystem that includes planet-wide considerations such as climate change and ocean acidification

1

## Ecosystem Spirituality

#### TIME

**Ecosystem Spirituality** includes considerations over time:

- The now
- Transition to a sustainable civilization over the 21<sup>st</sup> Century
- Contemplation of abiogenesis and giga-year evolutionary processes of the past
- Maintaining the integrity of Earth's ecosystem for a Galactic Year - 230 million Earth years - into the future

#### SCOPE

Scope is the consideration of human systems that interact with ecosystems and put pressure on the Planetary Boundaries. These include economy / politics / infrastructure / belief, etc.

#### DEPTH

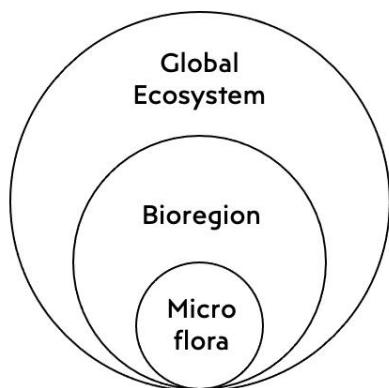

Depth recognises spirituality as a part of a matrix of interconnected cognitive capabilities that allows for intellectual, emotional, and sensory interactions with ecosystems. Depth transforms awareness of ecosystems into lived experience and meaningful engagement and fosters intent for pro-ecosystem lifestyles.

**Ecosystem Spirituality**  
is the spiritual philosophy of

## New Vitangelist Cards

Ahead of Vita Sapien attending Rising Tide protestival in Newcastle, new Vitangelist Cards were designed and printed.

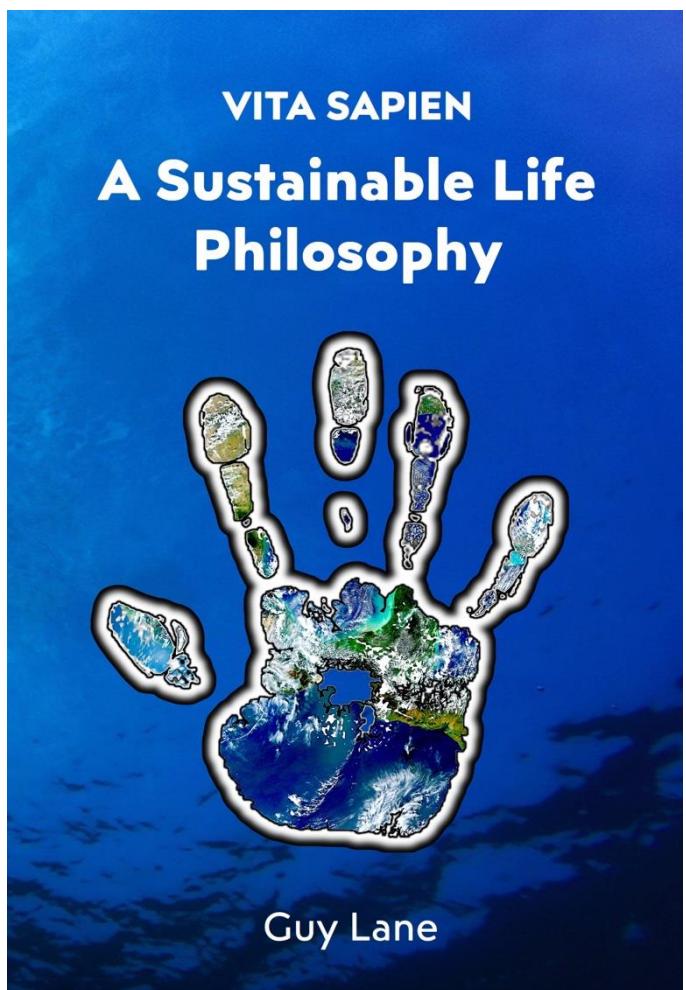

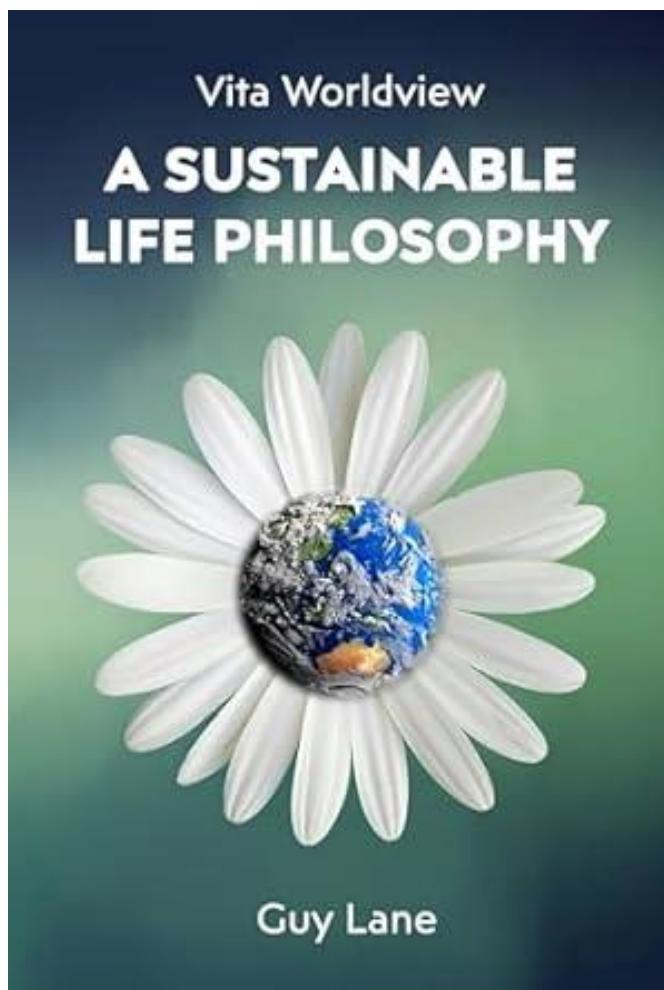

# October, 2025

## Vita Sapien Pocketbook

The Vita Sapien Pocketbook had two major edits in 2025. The first followed an edit pass by ally David A Hood who also sponsored the production of 42 copies that were gifted to people who showed an interest. This had a revised version of the Daisy Earth cover.

The second, root and branch transformative edit was guided by an AI called Claude. I asked Claude was missing, what is contradictory, what reduces the chance of achieving the broader objective. Besides the depth and wisdom of the responses, Claude delivers its answer a million times faster than human thought—it's a digital v neuronal thing.

Vita Sapien Philosophy has all the hallmarks of a complete philosophical system. It also advised a more 'hands-on' cover design.

# October, 2025

Another major change in the Vita Sapien Pocketbook was the inclusion of the **Stockdale Paradox** as a foundational concept that helps explain Vita Sapien's insistence on staring into the climate& ecological abyss while also maintaining faith that humanity will prevail the Anthropocene Crisis and enter the Verdant Age.

US Navy Commander James Stockdale was captured in the Vietnam war and endured years of hardship in prisoner of war camps. He saw many of his countrymen perish and noticed that those who survived held a contradictory philosophy that is now referred to as the *Stockdale Paradox*:

*"Retain faith that you will prevail in the end, regardless of the difficulties. And at the same time confront the most brutal facts of your current reality, whatever they might be."*

*This is the philosophy that will help people endure what's coming under climate & ecological collapse and keep working towards a sustainable future.*

## Don't Go to Mars

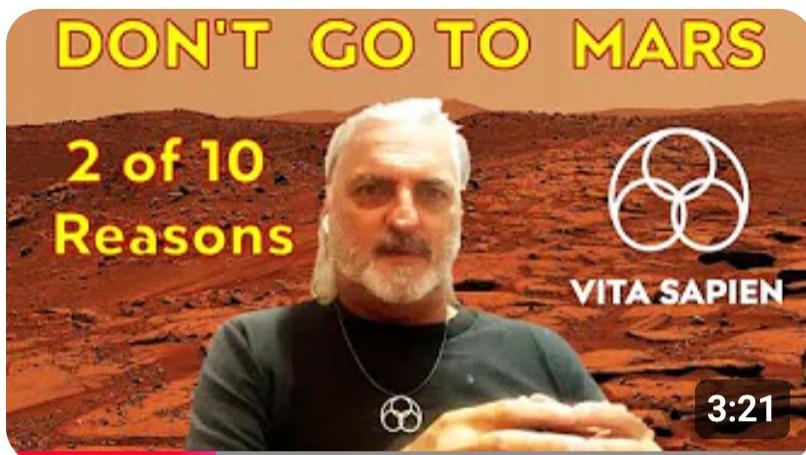

Guy Lane records a piece to camera on two of ten (or more) reasons we should not even try to send a human being to Mars.

There is an argument that we should eventually try to settle Mars as the Sun ages and swells into a Red Giant that will eventually burn-off all life on Earth. Vita Sapien refers to this as **biofinalis**. However, the Red Giant isn't expected for around two billion years, so it is hardly a pressing concern.

Meanwhile Mars mission produce extensive environmental pollution and ecosystem harm—SpaceX built a rocket launch platform next to a turtle rookery. Mars is also soaking up vast troves of cash, minerals, and engineering talent when they ought to be directed to restoring the integrity of the biosphere—our planetary life support system.

Perhaps we should go to Mars, one day, but not until the health of our Living Planet is assured. Let's put the idea on pause for a millennium—at least.

Vita Sapien holds that running interference on manned missions to Mars is a sacred duty.

<https://www.youtube.com/watch?v=BdH8hGQDcKE&t=43s&pp=0gcJCU0KAYcqIYzv>

## Looking Good Under Quenn

Guy was in Noosa Civic shopping centre and met Italian Paolo who commented on his Quendant.

Guy sold the Quendant to Paolo and she was very happy with it. Later, Guy gifted Paolo a copy of the Vita Sapien pocketbook.

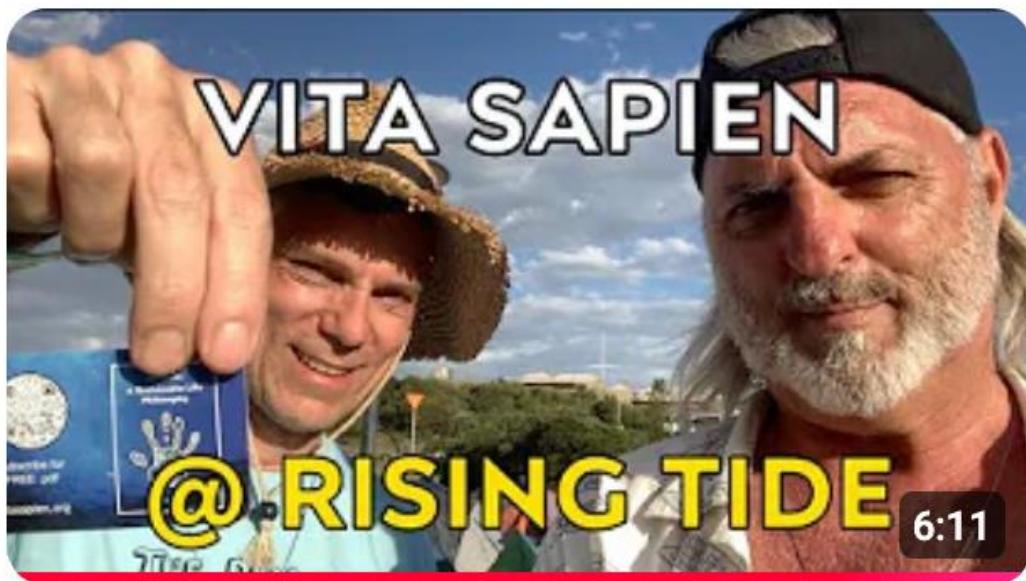

In such a manner does Vita Sapien Philosophy spread in the community.

27 November – 2 December, 2025

## Vita Sapien at Rising Tide

Nick and Guy drove Motel Prius to Newcastle to contribute to the Rising Tide protestival where hundreds of people risked life and liberty to oppose the export of coal. There were over 170 arrests of people running interference on coal ships.

Nick and Guy reflect on Rising Tide

⋮

27 November – 2 December, 2025

27 November – 2 December, 2025

## Vita Sapien Flag

For Rising Tide, a Vita Sapien flag was produced by ally Melissa.

This is a white flag with a black Quenn flying high let everyone know that Vita Sapien was in town. One flew in the camp, the other flew on the beach.

THis version is made of polyester (dead fish), but subsequent flags will be made of a type of cotton that won't fly so well, but will at least not shed nano- and micro-plastics into the local ecosystem as it disintegrates in under the sun and wind.

# 6 December, 2025

## **Vita Full Moon Moon Party**

The Full Moon party at Emporium Hotel, Southbank was a success. An awesome moonrise and some great conversations were had by all. Some of the usuals suspects including a few we roped in from the crowd.

The Emporium offers a commanding view of the Moon Rise, but as a public bar it is too noisy to conduct ceremonies.

## Ikigya as a path to Gyanthropoiesis

Ikigya is the Vita Sapien version of the Japanese idea of ikigai which helps people find meaningful careers. Gyanthropoiesis is the idea of humans developing the systems necessary to be self-sustaining on earth. These ideas are fused in this essay published in December on LinkedIn.

<https://www.linkedin.com/pulse/ikigya-path-gyanthropoiesis-guy-lane-40ssc/>

The business community doesn't have to contribute to the annihilation of life on Earth. There is an alternative path.

## Ikigya as a path to Gyanthropoiesis

# Iron Ocean Fertilization for Climate Restoration

Vita Sapien hosted Chairman Emeritus Peter Fiekowsky to share his plans to restore the climate. Iron ocean fertilization involves fostering the growth of phytoplankton by adding iron compounds into places in the ocean that are limited in this essential life element.

This technique can potentially drawdown billions of tons of CO<sub>2</sub> on a path to restore the climate to its pre-industrial condition.

## CLIMATE RESTORATION

A Vita Sapien initiative

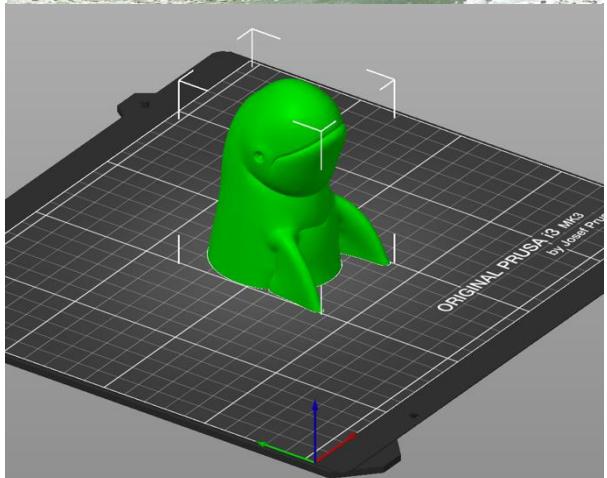

## Orcaella

On return from Rising Tide Nick and Guy talked about a totem animal for Vita Sapien to be cast in beswax.

After some contemplation, it was decided that the coastal dolphins of southeast Asia and northern Australia needed representation: genus Orcaella.

Pushpendra in India was commissioned to make the 3D print file from a collection of photos.

This was then 3D printed in PLA on a Prusa printer at Cooroy library and a silicone mold was made.

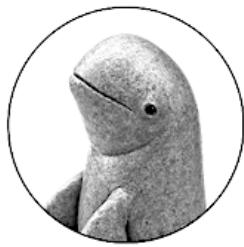

# 16 December, 2025

In the genus *Orcaella* are two species *breviostris* and *heinsohni*: the Irrawaddy and Snubfin dolphins.

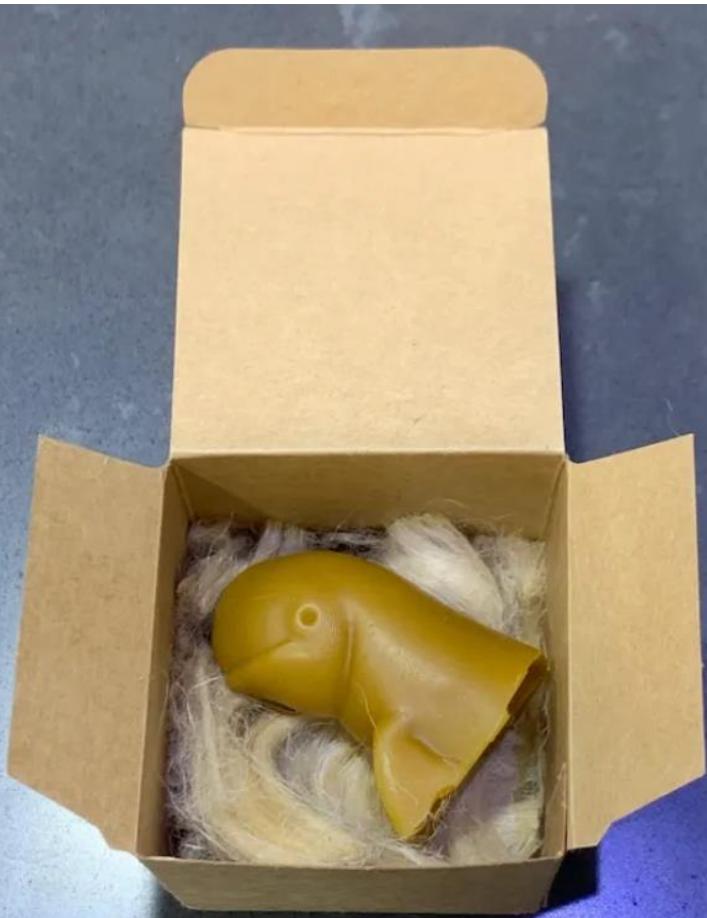

The first beeswax Ella was produced on 16 December. The first two Ellas were sold for \$30 each, and the rest of the first dozen or so were given as gifts.

As 2025 draws to a close, we may have found a stockist for Ellas in a herbal shop in Nimbin.

Orca  
Ella

The name *Orcaella* refers to two types of dolphins: the Irrawaddy dolphin of southeast Asia and the Snubfin dolphin of northern Australia. We should all work towards a world where dolphins are safe because our wellbeing is interconnected.

# 29 December, 2025

Nick and Guy took a pilgrimage to meet Steve Posselt, the protector of climate and trees. We had the privilege of touring the property on off-road mobility scooters.

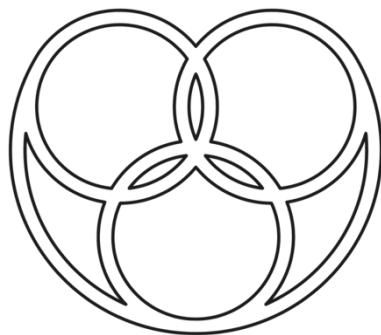

## The Vitorri

The idea of the Vitorii came back to life. Vitorii is the Vitan version of the Japanese Shinto Torii archway that signifies that what lies beyond has Kami – a spiritual reverence. The idea was inspired by a piece of street art in Mullumbimby, pictured.

It was proposed to install Vitorri made of corten steel at the entrance of national parks to try and create a spiritual connectivity to the park.

The Vitorii is formed from part of an inverted Quenn symbol.

Next step in the process is to find a structural engineer who can prepare engineering drawings so we can get a price to build the first unit.

## Flower of Gya

The Flower of Life is an ancient symbol made of overlapping circles. It is believed to date back as far as the Temple of Osiris 6,000 years ago. It is subsequently found associated with Buddhism and early Christian traditions and New Age spirituality that makes all manner of fascinating claims about its potency.

Vita Sapien has adapted this symbol by swapping the circle with the Quenn and tessellating or overlapping them. This has opened up a dizzying array of patterns that help expand the graphic design elements for the Vita Sapien Movement.
