

Notes. These parts are direct replacements for the kit parts

Suggested colour scheme for seat

Remove hatched area, and clean up bottom of seat. Wash resin seats before painting and construction.

If you are building the model with the canopy (6H) closed, check that the canopy will close before gluing the seats in the cockpit tub (10A). The seat may need to be trimmed to fit to achieve this.

Further reference for these seats can be found at www.martin-baker.com & www.ejectionsite.com
