

## INSTRUCTIONS

**\*\*\*WARNING\*\*\* Gel polish causes heat spikes that may cause your fingers to be hot. To avoid heat spikes, cure for 3 seconds and remove from lamp for 5 seconds, then cure for 60 sec.\*\*\***

- Wash your hands.
- Push cuticles back using metal or wooden cuticle pushers.
- Gently file away any dead skin around the cuticle using the 180 grit nail file included in your kit. (This area of the nail is extremely delicate so be careful not to scrape the live skin).
- Remove the shine from the nail surface by filing the entire nail surface gently using the 180 grit file. Remove all dust from the nail.
- Spray alcohol on nails.
- Wipe nails with Ojima Nails Combo Nail Cleanser & Dehydrator. Be sure not to get on your skin.
- Apply base gel to the entire nail surface sparingly (too much will compromise adhesion). Cure for 3 seconds and remove nails, wait 5 seconds, and cure for 60 sec LED 2 min UV.
- Apply gel polish to nail as desired. Cure for 3 seconds and remove nails, wait 5 seconds, and cure for 60 sec LED 2 min UV. Please try not to get the product on your skin.
- Apply top coat gel to the entire nail surface. Cure for 3 seconds and remove nails, wait 5 seconds, and cure for 60 sec LED 2 min UV.
- Apply Ojima Nails Cuticle oil to the cuticle area of your nails and ENJOY!
