

DEFENDER

## HOW IT WORKS

The Foot Defender is scientifically proven to off-load up to 50% more pressure from the bottom of the foot compared to other protective boots.

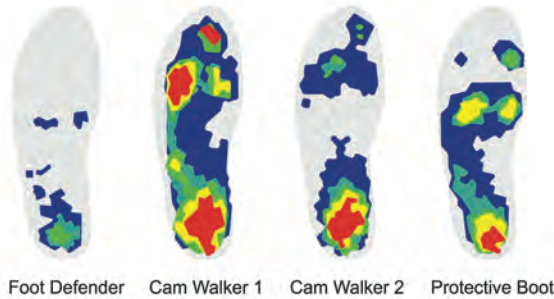

### FOOT DEFENDER

A faster path to healing

Learn how the Foot Defender is the best way to heal your Diabetic Foot Ulcers quickly and safely.

### STANDING STATIC

Average maximum pressure  
200 lbs male with a size 12 shoe standing for 30 seconds

### REDUCING FORCE

With a full-length brace at the rear of the boot and a removable semi-rigid front panel, the Foot Defender decreases force on the bottom of your foot when standing or walking.

### PROTECTION THAT FEELS GREAT

Foot Defender's cutting-edge technology is influencing how people feel about wearable devices for diabetic foot wounds.

This high-end protective device was created by a team of patients, medical professionals, engineers and a former Nike designer.

For more information ask your healthcare provider about the Foot Defender.

DEFENDER

## DESIGNED FROM THE GROUND UP

The Foot Defender is engineered from the ground up to protect your foot. It off-loads the forces that prevent wounds from healing.

## BECAUSE EVERY STEP MATTERS

## SHOES CAN'T HEAL YOUR WOUND

Your everyday shoes can prevent healing.

The Foot Defender creates the environment your foot needs to heal.

Someone loses their leg in the United States due to a diabetic foot ulcer every 20 seconds.

Millions of Americans will have a diabetic foot ulcer this year. With clinically proven results Foot Defender is the answer.

Get back to doing the things you love, ask your medical professional about Foot Defender.
