

Hummingbird is a new technological development.  
A multi-purpose tool created by farmers for farmers.  
Designed for multiple applications, to lower costs  
and increase productivity.

**HUMMINGBIRD**

HIGH PRECISION SYSTEMS

Developed by  
CORDOBA TECHNOLOGIES

**HUMMINGBIRD**  
HIGH PRECISION SYSTEMS

Every day it becomes more difficult to protect crops. Application timing, applicator availability, and complicated application regulations. Now there is a new way to apply crop protection chemicals -and foliar nutrition products- in an automated, labor-free and high precision manner.

• **BRAND NEW TECHNOLOGY**

We present a new high productivity multitasking tool for pivots and linear move systems that we call Hummingbird.

• **CORDOBA TECHNOLOGIES**

Has developed Hummingbird Technology. Hummingbird is a multi-purpose tool developed by farmers that wanted a way to apply products on demand and nearly labor free.

• **MULTI-FUNCTION**

New technology for multiple applications. Full circle chemical application at any hour, 24-7. Have an idea or sensor you want to pass over your field? We welcome your questions!

• **DESIGNED BY GROWERS, FOR GROWERS**

Designed by farm managers with crop protection experience on large agricultural operations.

• **EFFICIENCY**

Pivot runs dry – no irrigation. Droplet and spray patterns for any licensed product. Nozzles monitored while operational.

• **ULTRA LOW COST OF OPERATION**

Advanced engineering using food industry components, precision control, and near-zero maintenance (lubrication free).

• **SECURITY**

Easy to use, intuitive interface. 100% labor free during operation. Remote monitoring and control.

• **ANY BRAND, PIVOT OR LINEAR**

Hummingbird offers product application options beyond crop protection – carriage device can transport liquids, fiber-optic cable, air... the system height is adjustable for many devices and crops.
