UNLIKE YOUR ESPRESSO

SECURITY IS NEVER PERFECT!

1 There is absolutely no absolute security. Unlike your espresso, it'll never be perfect. And that's OK. It's about understanding and managing risks to businesses, people and society that arise from security issues related to people, process and technology.

SECURITY IS NEVER PERFECT!

2 Cyber Risk is not a security vulnerability. It's not an attack vector. It's not an internal or external threat. Cyber Risk is the impact of a security issue on businesses, people or society as a whole, due to intentional or unintentional abuse by a threat.
