FAQ

- Are you open?
 - Yes, we are. We are an essential service providing health care to an at-risk population.
- I am on an immune suppressant drug, should I stop taking it?
 - No, as long as you are not ill. Staying on the medication improves chances of staying and remaining healthy.
- I am having trouble getting Plaquenil, why?
 - Stockpiles have been diverted by the Government for testing, etc. this may cause temporary shortages.
- I am on Plaquenil, will this slow down, cure or treat COVID-19?
 - Early data is hopeful but in no way proof that this is true. It cannot be trusted at this time. More on this soon.
- I am worried about running out of Plaquenil, what can I do?
 - Reduce dosage to 1 tab daily unless it is dangerous to do so. Please contact the office if you have concerns.
- I am on infusions, should I still come in?
 - Yes, it will help you to remain healthy and give you the best chance to remain that way.

Please call the office with any specific questions you may have. We are always happy to help.
