## Boris's Climate Disaster - Update

Boris, man-made CO<sub>2</sub> has little or no effect on climate change compared to other natural factors and China's vast economic expansion is based upon fossil fuel.

Germany tried renewables and ended-up having to rely on importing natural gas from Russia after it became clear that weather dependent renewables cost too much and are unreliable.

Note: We are currently in an interglacial period during which the Earth's temperature rises and then falls at the onset of the next glacial period.

Looking at the differences in temperatures on cloudy and clear nights - the warming effect on cloudy nights is due to water vapour, some of which condenses to form clouds of small floating water droplets that scatter all wavelengths of light, a process known as "Mie Scattering" (after Gustav Mie) which show as white clouds ([link](#)).

Water vapour is very effective (100 times greater effect than CO<sub>2</sub>) at "trapping" the Infra-Red radiated energy from the ground as it cools.

The ground was initially heated by higher energy sunlight and the subsequent cooling of the ground surface takes place through the emission of longer wavelength lower energy radiation in the range of Infra-Red (IR).

On a clear night without water vapour (few or no clouds) the temperature falls as the lower energy IR from the heated ground escapes through the atmosphere into space.

This is not what the Climate alarmists claim would happen.

Whatever the present level of CO<sub>2</sub> in the atmosphere (>400 ppmV) it is not preventing that re-radiated lower energy IR from the warm ground surface disappearing into space in any measurable amount.

## Perspectives

Atmospheric gases Nitrogen (78.08%) and Oxygen (20.95%) and Argon (0.93%) plus trace gases are effectively, transparent as far as Infrared radiation and the IR sensitive CO<sub>2</sub> concentration is just 0.038% of the total atmosphere.

The effect of cloud cover and night-time temperatures has been carefully evaluated by a recent study by Exeter University which concludes that (as might be expected):

*"University of Exeter scientists studied warming from 1983 to 2017 and found a difference in mean annual temperature of more than 0.25°C between daytime and night-time warming in over half of the global land surface."*

*"Increased cloud cover cools the surface during the day and retains the warmth during the night, leading to greater night-time warming. Whereas, decreasing cloud cover allows more warmth to reach the surface during the day, but that warmth is lost at night." ([link](#))*

Why is the IR radiative energy from the ground surface "lost at night" under little cloud cover?

If CO2 is such a potent 'Greenhouse' gas as claimed, and that causes dangerous warming or acts as a 'blanket' or "like the glass of a Greenhouse" the Earth would remain warm.

Basically, the "Greenhouse" effect of CO2 is being greatly exaggerated.

Either CO2's "Greenhouse Effect" is not as dangerous as they want us to believe, or it has little or no effect in the Earth's atmosphere?

From the Vostok Ice Core data it is evident that heating occurs before the increase in CO2 not the other way around – this makes the most sense since the Oceans are the greatest repository for CO2 and a warmer ocean would release more CO2.

The idea of "Global Warming" came about from observations of Venus, our "Twin" planet - but its atmosphere is 95% CO2, it is closer to the Sun - and does not rotate like the Earth does.

The Earth is further from the Sun than Venus, only half of the surface is lit during the 24-hour day and warms - that half cools at night giving an average temperature between the two environments that we experience.

A Venusian day is equivalent to ~243 Earth days or approximately 243 x 24 hours or 5832 hours of sunshine for each Venusian day compared with 24 hours on Earth. It is a gigantic "stretch" to equate what happened on Venus to what they are claiming will happen on our planet with minuscule quantities of CO2 in the Earth's atmosphere (0.038%)?

Since water vapour has a far more potent effect on heat retention and distribution in the atmosphere - Boris's plan to use Hydrogen fuelled boilers which will generate only water vapour as the exhaust is at best bizarre.

A third consideration is that most CO2 emissions began after World War II industrialisation. *"Half of all human consumption of fossil fuels and cement production has occurred since the mid 1970s."*

*"Global temperature proxies (sediments, boreholes, pollen, oxygen-18, stalagmites, magnesium to calcium ratios, algae, cave formation, etc. over a wide geographical range) show a warming trend starting around 1700, with warming and cooling periods about the trend." ([link](#))*

In the End...

Boris, you are just selling the people of the UK the UN's "Agenda 21" and the World Economic Forum's "Great Reset". Which want to herd everyone into "smart" megacities with smart meters, mass surveillance, and the Internet of Things (IOT). They plan to take away all personal forms of transport apart from bicycles and electric scooters and deliberately reduce the world population from its current level by 2050.

The presence of Trotskyite 'Blair' in the orbit of the government at this time and his obsession with vaccines - does not bode well for the wellbeing of the UK population – at least the English.

It is not a dream Boris - it is a Communist Chinese Dystopia - also coming to the United States now that President Donald Trump has been removed under the cover of the "Wuhan Flu" Pandemic by US MSM, big business interests and the radical left-wing Democrats – forming an ongoing Oligarchy to replace the greatest Democracy on the planet, as part of the new Communist Chinese World domination facilitated by its Marxist supporters in the west.

The "Anthropogenic Global Warming (AGW) scam is just part of the Agenda 21 plan.

The pandemic was artificially made very much worse in the UK by you, SAGE, and the legacy of the last 48 years under the domination of the EU – diverting resources from the British taxpayer for the benefit of a foreign power intent on the destruction of the UK and the control over its population.

Britain could have developed, prospered, and outperformed practically every other country – if it had not been tethered to the neo-EUSSR since 1973 – and still not yet released completely.

You must be aware that most of the jobs in this new plot will be farmed-off overseas to EU and / or Chinese companies and British families will be made deliberately destitute trying to keep up payments to comply with your new totally unnecessary renewables blighting our countryside and way of life.

Look at what happened in Germany (2009 - 2017) – with no reduction in CO2 - see Blog below on this website:

***"Between 2009 and 2017 German electricity consumers paid 176 billion Euros for electricity with a market value of 5 billion Euros"; simply subsidising companies with no benefit to show for their own lives in this manufactured dystopia, where everyone except the elite is controlled from cradle to grave.***

Electricity bills in the UK will "skyrocket", and people will freeze as the supply is frequently disrupted by weather problems and network instabilities, local environments will be ruined for years to come, and insulation will be inadequate because of corruption and cost saving by companies given contracts without due diligence. Solve those problems first.

Germany have already been through the nightmare that you Boris, and Carrie Symonds have planned for the British people, by adopting the Chinese CCP dominated UN plan to turn the UK into a failed Communist state – as Biden and Harris push for the same fate for the USA.

**[What is the 'Green New Deal' Really About? \(link\)](#)**

**<https://www.c3headlines.com/global-warming-quotes-climate-change-quotes.html>**

**Truth or Fiction?**

***Quote by Paul Watson, a founder of Greenpeace: "It doesn't matter what is true, it only matters what people believe is true."***

***Quote by emeritus professor Daniel Botkin: "The only way to get our society to truly change is to frighten people with the possibility of a catastrophe."***

**Quote by Chris Folland of UK Meteorological Office:** "The data don't matter. We're not basing our recommendations [for reductions in carbon dioxide emissions] upon the data. We're basing them upon the climate models."

**Quote by David Frame, climate modeler, Oxford University:** "Rather than seeing models as describing literal truth, we ought to see them as convenient fictions which try to provide something useful."

**Quote by Richard Benedik, former U.S./UN bureaucrat:** "A global climate treaty must be implemented even if there is no scientific evidence to back the greenhouse effect."

### Redistribution of Wealth

**Quote by Ottmar Edenhofer, high level UN-IPCC official:** "We redistribute de facto the world's wealth by climate policy...Basically it's a big mistake to discuss climate policy separately from the major themes"

**Quote by Christine Stewart, former Canadian Environment Minister:** "No matter if the science is all phoney, there are collateral environmental benefits.... climate change [provides] the greatest chance to bring about **justice and equality** in the world."

**Quote by Club of Rome:** "In searching for a new enemy to unite us, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like would fit the bill... All these dangers are caused by human intervention....and thus the "real enemy, then, is humanity itself... believe humanity requires a common motivation, namely a common adversary in order to realize world government. It does not matter if this common enemy is "a real one or....one invented for the purpose."

**Quote by Maurice Strong, a billionaire elitist, primary power behind UN throne, and large CO2 producer:** "Isn't the only hope for the planet that the industrialized civilizations collapse? Isn't it our responsibility to bring that about?"

**Quote by Club of Rome:** "A keen and anxious awareness is evolving to suggest that fundamental changes will have to take place in the world order and its power structures, in the distribution of wealth and income."

**Quote by Gordon Brown, former British prime minister:** "A New World Order is required to deal with the Climate Change crisis."

**Quote by David Shearman, an IPCC Assessor for 3rd and 4th climate change reports:** "Government in the future will be based upon . . . a supreme office of the biosphere. The office will comprise specially trained philosopher/ecologists. These guardians will either rule themselves or advise an authoritarian government of policies based on their ecological training and philosophical sensitivities. These guardians will be specially trained for the task."

**Quote by Emma Brindal, a climate justice campaigner coordinator for Friends of the Earth:** "A climate change response must have at its heart a redistribution of wealth and resources."

**Quote by Michael Oppenheimer, major environmentalist:** "The only hope for the world is to make sure there is not another United States. We can't let other countries have the same number of cars, the amount of industrialization, we have in the US. We have to stop these Third World countries right where they are."

**Quote by Louis Proyect, Columbia University:** "The answer to global warming is in the abolition of private property and production for human need. A socialist world would place an enormous priority on alternative energy sources. This is what ecologically-minded socialists have been exploring for quite some time now."

## Getting Rid of People

**Quote by Ted Turner, billionaire, founder of CNN and major UN donor, and large CO2 producer:** "A total population of 250-300 million people, a 95% decline from present levels, would be ideal."

**\*Quote by David Brower, a founder of the Sierra Club:** "Childbearing should be a punishable crime against society, unless the parents hold a government license. All potential parents should be required to use contraceptive chemicals, the government issuing antidotes to citizens chosen for childbearing."

**Quote by Paul Ehrlich, professor, Stanford University:** "The addition of a temporary sterilant to staple food, or to the water supply. With limited distribution of antidote chemicals, perhaps by lottery".

**\*Quote by Bill Gates, Microsoft billionaire, and large CO2 producer:** "The world today has 6.8 billion people...that's headed up to about 9 billion. If we do a really great job on vaccines, health care, reproductive health services, we could lower that by perhaps 10 to 15 percent."

## Finally

In essence, "Climate Change" is just "Eco-Activism" - another part of the Marxist Frankfurt Schools "Critical Theory" playbook designed to bring about World Communism. From which BLM exploit Racial and Gender Activism. Eco-Warriors are exploiting the weather - a long held primitive fear among humans.

In 1750's Benjamin Franklin theorised and - possibly showed that it was true with a kite and a key - that lightning was just electricity and not the "Wrath of God" or "Ancestors' Displeasure" - but fear of the forces of nature and natural disaster are deeply ingrained in many people.

*(The current pandemic is a master class in how fear can be deliberately manipulated by the "authorities" to keep people under control - especially using mathematical models to produce predictions of mass deaths based upon limited and unreliable information.)*

Eco-Activism (as opposed to Ecology) resulted from the search by the Marxists to find a worldwide common "Danger", or "Menace" which the people would fear and only the Elite could rescue them from by reorganising society on a Global scale controlled through World Governance.

Global Warming caused by Human activity fits the bill perfectly - whether it is true or not has always been irrelevant. See comments above.

BLM are not primarily motivated by Racism. BLM are more about bringing down Capitalism and the Judeo-Christian system and installing Communism in the USA and UK through insurrection created by exploiting Racial differences which BLM is fomenting in the western school system with the application "Critical Race Theory".

Global Warming Alarmism has the same motivation, but it intends to bring Communism to the entire world through the destruction of Capitalism in the west by de-industrialisation accompanied by mass depopulation - driven by China and Russia et

**al., as they ramp-up their own industrialisation and increase their colonial expansion around the world – basically without interference once the USA has been neutered.**

**This plot should be resisted – otherwise we are on a spiral into oblivion – lobby you MP and stop Boris and Blair from destroying Britain.**
