Letter from the President

Just back from a family vacation to the Outer Banks of North Carolina.

Sunday was a beautiful, sunny day with pleasant temperatures and gentle breezes – a perfect day for a wild horse safari. Bouncing along the sand dunes in the back of a Hummer beyond the end of paved roads is a good way to look for wild horses (or to send one off seeking a chiropractor).

As usual, we managed to schedule a visit at the same time that hurricane Maria was passing by offshore in a huff (and puff). Luckily, no significant storm damage or rains, just gusty winds. Trips to the beach were limited by high surf, rip tides, blowing seafoam, and risk of being sandblasted. (Good thing that the sun wasn't out or our shadows would have blown loose!)

A few showers fell on Tuesday and Wednesday, but not enough to drown you if you looked up.
Letter from the President

“It’s May, the lusty month of May.” So sang Julie Andrews in Camelot, and so say I. Thus far, we have had sun, clouds, and the promise (threat?) of rain on the 1st day of May. Last weekend we had wind, rain, and shadow-loosening wind gusts. If it happened today, Noah’s flood would only take a week of rain before the storm sewers backed up. Last I looked, the weather forecast predicted rain almost every day for the coming week. You may want to make sure your ark is ready to float free. Just sayin’ . . .

Assuming that the weather relents, there are lots of fun activities coming up in the parks: Show and Tell on the Farm, Great Week of Birding, and Rivercon are just a few of the coming attractions. See you in the parks!

Bill Walker, President FOMPBC

Upcoming Events

Show and Tell on the Farm

Come out and enjoy Show and Tell on the Farm at Chrisholm MetroPark. Topics this month include: May Day, Farm Games, Magnificent Moms, Rainbow Gardens, ABC’s of Farm Life, Busy Bees, 3-Sisters Garden,

Fun on the Farm is on Thursdays from 6:30-7:30pm and Sunday’s from 2:00-4:00pm

Rivercon

Come experience where Star Wars and the Great Miami River meet. At this new event, guests will have the chance to participate in a Star Wars costume contest, a 5-mile Star Wars costume bike ride or 5K walk on the Great Miami River Trail (pre-registration required). But, that's not all! Train like a Jedi with a variety of fitness activities and learn how to stay safe with water-related demonstrations. And don't forget to check out all the local vendors - from Franklin to Hamilton! ...plus much more! FREE May the 4th be with you

This is the launch event for the Great Miami Riverway’s Tour de Way. To find out more about the 100 mile passport program (and to win prizes) visit

https://www.greatmiamiriverway.com/welcome/tour-de-way.php

RiverCon is co-sponsored by MetroParks of Butler County, Miami Regionals, and Great Miami Riverway with help of program sponsors, Middletown Visitors Bureau and Spoken Bicycles. #MayTheRiverBeWithYou

Saturday. May 4, 9:00 AM-2:00 PM

Bicentennial Commons
Let’s Go Hiking! Spring Birding Hike

It’s a very exciting time of year-Spring migration! Watch for the vibrant warblers and tanagers as they make their way North with the warming temperatures to begin their breeding season. Join us at Harbin Park as we watch for our feathered friends. If you have binoculars, we encourage you to bring them!

FREE and open to all ages.

Meet at the Overlook Shelter. Registration is requested by calling 513.867.5348. Walk-ups are welcome!

Saturday, May 18, 10:30 AM-12:00 PM

Harbin Park 1300 Hunter Road Fairfield Ohio 45014

Did You Know

Kroger Community Rewards Update

**FOMPBC organization # TM866**

Kroger is committed to helping our communities grow and prosper. Year after year, local schools, churches and other nonprofit organizations earn $4 million in Greater Cincinnati, Dayton and Northern Kentucky through their Community Rewards program. FOMPBC is one of the Many wonderful organizations that benefit from this program.

**How Can YOU Help Us?**

In April 2017 Kroger’s updated their Community Rewards process and software. As of April, supporters will no longer have to re-enroll their Kroger Plus Card to earn dollars for your organization. This will make it easier for you to support us! Please take a moment and make sure you are enrolled and supporting FOMPBC.

[https://www.kroger.com/account/enrollCommunityRewardsNow](https://www.kroger.com/account/enrollCommunityRewardsNow)

Once you’re enrolled you will earn rewards for FOMPBC every time you shop and use your Plus Card.

Amazon Smile

**What is Amazon Smile?**

Amazon Smile is a simple and automatic way for you and your family to support FOMPBC every time you shop from Amazon, at no cost to you. Instead of shopping at Amazon.com you go to [https://smile.amazon.com](https://smile.amazon.com). You will find the exact same low prices, vast selection and convenient shopping experience as Amazon.com, with the bonus that Amazon will donate a portion of the purchase price to FOMPBC.

To make a reservation please see the annual meeting invitation in the April issue of the Voice. Or, call 513.593.2735, or email [kochtrees@gmail.com](mailto:kochtrees@gmail.com).

Ohio’s Spring Wildflower: The Great White Trillium

While hiking through the trail systems in the Metro Parks this spring, visitors may notice a variety of spring wild flowers emerging from their winter sleep. One that particularly stands out is the great white trillium (*Trillium grandiflorum*), Ohio’s state wildflower. With almost all its’ parts coming in threes, the petals, sepals, and leaves, it practically introduces itself to those who take notice. One single white flower sits on a stock, standing
anywhere from 15cm to 45 cm tall, which can be seen as a lone plant, or as many in a colonial community linked by the rhizomes (underground root stock). A perennial, it will come back year after year, and may live up to 25 years, though can take several years for the first bloom to appear. [1]

Image source: Photo: JackFrost2121
https://commons.wikimedia.org/wiki/File:The_Great_White_Trillium.JPG

This trillium is native to most of eastern North America, found mostly in woodlands in rich soil. It begins to grow before trees have gained their leaves in late March and through April, taking advantage of the sunlight shining through the tree’s bare branches. Blooms may be viewed as late as June though. As the plant ages the flower will often take on a pinkish color as well. [2]

Picking the flower can be extremely damaging to the plant, potentially killing it, and at best setting it back to the point that it may not bloom again for several years. In some states and in parts of Canada it is protected due to declining populations and can even be illegal to pick the flowers or harvest the plant for home use. It is highly encouraged that hikers appreciate this and other wildflowers with only their eyes, no matter where they are hiking. [3]

The biggest threats to this beautiful spring ephemeral besides humans is the increasing deer population, which enjoy browsing on the plant. Other threats include invasive plants such as honeysuckle which can shade out spring wildflowers by developing leaves much earlier than native shrubs and trees. Control of invasive is paramount to the biodiversity and survival of our spring wildflowers, as well as many other species of plants which in turn can have negative effects on wildlife as resources they depend on are diminished. [2] [4]

Other wildflowers that can often be viewed blooming alongside white trillium are jack in the pulpits, dutchman’s britches, and may apple. Great white trillium and many other wildflowers can also be grown in wildflower gardens at home as a native alternative to many traditionally grown flowers. Growing wildflowers at home is not only delightful to the gardener, but also to the native wildlife in the area that have developed alongside one another for millennia. In many cases, growing native plants is also easier and cheaper than growing non-native plants, as natives are adapted to local conditions [5]. Just make sure that seed and plant sources are grown sustainably and are not dug up from natural areas that could harm the biodiversity of different areas. For more information on native plants visit: http://ohiodnr.gov/gonative

Invasive Plants and Why We Care

Invasive plant species occur in a variety of habitats, such as forests, wetlands, and prairies. These are generally nonnative species brought to a new region by accident or for horticultural purposes. Since they do not have any natural predators in introduced areas, their populations are not kept in check and can increase rapidly. Within a short amount of time the invasive species can overtake a habitat, and in return interrupt the entire ecosystem.
Impact on Native Plant Species

Some invasive plant species are more aggressive than others. For example, common dandelion is not native to North America, yet they typically only compete with lawn species. On the other hand, Tree of Heaven can grow in a variety of habitats and reproduce at a rapid pace through seeds or their root system. When this happens, the invasive plant outcompetes native plants for nutrients and growing space. This includes all types of natives, from spring wildflowers to the biodiversity of trees within a forest.

Impact on Wildlife

Ohio's state bird, the Northern Cardinal, is one of many wildlife species that is negatively impacted from invasive species such as honeysuckle. Even though honeysuckle provides berries for birds to eat, they lack the nutrition that native berries have to keep birds healthy.

An Ohio Miami University professor conducted a study comparing areas that had dense patches of the invasive Amur Honeysuckle to areas where honeysuckle was purposefully removed. Where honeysuckle was present, native tree seedling survival rate was reduced up to 70 percent. The result was most likely due to the shade from the honeysuckle.

This becomes a problem in reproduction when female Northern Cardinals chose a mate by the brightness of his red plumage. The bright plumage is typically an indicator of a healthy bird that has found nutritious food. However, honeysuckle berries contain more pigments, but less nutritious value than native berries. As a result, females choose the brightest mate even though he may not be fit or resourceful enough to raise a successful brood with her. The effect on the species may not be immediate, but over time this issue could negatively impact the species.

Many insects have evolved to use specific native plants during their larva stage. A classic example would be the monarch butterfly larva and milkweed. When an invasive species takes over an area by outcompeting these host plant species, not only do the insects suffer, but so do the birds that prey upon the insects.
Honeysuckle can quickly take over a forest, leaving only honeysuckle leaves to fall onto the forest floor and nearby streams. Macroinvertebrates, which live in the streams and are an essential part of the ecosystems food web, feed upon fallen leaves. However, honeysuckle leaves breakdown faster than native leaves, resulting in less food for macroinvertebrates and other animals such as tadpoles.

Conclusion

The honeysuckle invasion has come with many issues, and effecting every corner of the ecosystem including plants, trees, wildlife, and water quality. It is easy to focus on honeysuckle since there has been extensive research done due to its aggressive nature, but there are many other invasive species that should be noted. For example, wetlands have purple loosestrife and phragmites, prairies have common teasel and Canada thistle, and woodlands have multiflora rose and autumn olive. If you would like to view a larger list of local invasives, visit http://ohiodnr.gov/invasiveplants/publications.

Each of these invasive species, and many more, compete with native plants for space, sunlight, and nutrients. Fewer native species results in a negative impact to other species that have evolved with and relied on the natives. For this reason, there is a huge effort between different groups, agencies, and concerned citizens to control and reduce the spread of invasive species. Unfortunately, many invasive species were brought to this region for landscaping purposes. The Ohio Division of Wildlife has provided a thorough list of alternative native plants to invasive species at the following link: http://ohiodnr.gov/portals/0/pdfs/invasives/Alternatives_to_Ohio_Invasive_Plant_Species.pdf

Shanti, Shanti, Shanti
(Peace in Body, Speech & Mind)

Namaste,

Want to improve your flexibility, respiration, energy, and vitality? Practicing yoga can do just that along with many other benefits. We’re taking yoga out on the trail again this summer at Rentschler Forest with instructor Laura Lejeune. Harmonize your breath with the rhythm of nature and unwind from your busy day as we practice mindful movement with traditional yoga poses along the meandering forest trail. All body shapes, sizes, and experience levels are welcome. This is truly something you need to experience to appreciate!

FOMPBC Annual Meeting
Photo Walk: Composing the Perfect Picture

Susan Milankovich, from West Chester Photography Club, showed attendees at Forest Run MPX tools for composing the perfect photograph. After classroom training, the group adjourned to the grounds to practice the lesson.
Edible and Medicinal Wild Plant Walk

Shawnee Banks led a group of hardy hikers through muddy trails at Governor Bebb MetroPark to learn how to identify plants that can be used for food or medicinal purposes. After the hike, the use of herbs and spices to make flavored sugars was demonstrated.

Friends of MetroParks of Butler County

Our Mission

To improve and preserve the parks for future generations, to educate and inform the public about the unique qualities of each MetroPark, and to encourage individuals and groups to participate in volunteer programs.

Member Benefits

- Invitations to Member-only events
- Opportunity to apply for funding to support MetroParks programs and projects
- Attend Annual Meeting and have a voice in Friends activities and direction

Who Are We?

Private citizens who have come together to:

- Sponsor programs & activities, promoting the use of MetroParks for conservation, education and recreation
- Encourage volunteerism toward support of MetroParks of Butler County
- Identify and implement improvements to the park
- Assist in raising funds, securing donations, and obtaining grants monies to further MetroParks’ mission
