

Toronto Animal Health Partners emergency and speciality Hospital (AHP) is seeking applications for a fourth board-certified small animal intensivist to provide clinical services and support for our speciality practice. The successful applicant will join our team of veterinary specialists offering services in 24/7 emergency medicine, critical care, anesthesia, oncology, diagnostic imaging, neurology, cardiology, and surgery.

AHP is currently under construction with a goal to open in February of 2019. When fully complete, the clinic will be a state of the art facility with advanced imaging including a 32 slice Somatom CT and a 3Tesla MRI. AHP will be introducing a linear accelerator for radiation oncology. Advanced surgical equipment will include neuronavigational surgical equipment from 7D Surgical. Photodynamic therapy will be available on site. A full range of flexible and rigid endoscopic equipment will be available. Cardiac ultrasounds will be performed by a boarded cardiologist and abdominal ultrasounds will be performed by board-certified specialists.

AHP mandate is to increase the quality of care for companion animals through knowledge transfer among and between human and veterinary clinicians, together creating leading patient care outcomes. We will adopt a team-based approach to offer compassionate treatment, offering novel protocols and therapeutics. We have established a joint comparative oncology program which will encompass radiology, radiation, surgery and pathology. There will be ample opportunities for research-oriented clinicians to be involved in clinical research with thought leaders in both veterinary and human medicine.

Toronto is a thriving multi-cultural metropolitan city, amazing to wander through and discover. The sights, sounds and smells of the city are quite remarkable. A safe and wonderful place to live and raise a family. Toronto has a lively arts, music and theatre scene. To be sure, there are world class restaurants, but the real treasures are the smaller, ethnic restaurants which can be found in every neighbourhood. Toronto hosts major sports teams in hockey, baseball, soccer and basketball.
