- | | |

| <ul style="list-style-type: none">• Programs that can help reduce the impact of discrimination on your life may be gutted.• Your history may be whitewashed or erased.• The police may be further militarized and directed to target your communities. | <ul style="list-style-type: none">• If you are undocumented – or even if you ARE documented – you could be separated from your family, sent to an internment camp, or deported.• If you were brought to this country as a child by your parents and know no other home, you could still be subject to this same treatment. |

If You Are A Younger Person

- You will continue to **face gun threats at school**.
- Funds for your local public school may be diverted to religious schools. You may also face religious indoctrination in public schools.
- You may be forced to take a military entrance exam **as a public high school student**.
- There may be limitations in the books you can read — and distortions in the history and science that you are taught — at your school.
- There may be **no student loan debt relief or forgiveness** for you. Your monthly student loan payments could even double or triple.

If You Are An Older Person

- The safety net for your golden years will likely be shredded. **Social security funds** may be privatized and traditional **Medicare** may either be cut significantly or eliminated altogether.
- The part of the Inflation Reduction Act that allowed the government to **cap prescription drug costs for seniors** could be repealed. The cost of your medications may once again surge.

If You Are An American

- You will likely **pay much higher taxes** while a handful of billionaires gets major tax breaks.
- The already shaky ladder to home ownership, higher education, and financial stability will likely be pulled out from everyone but a fortunate few.
- Your ability to negotiate for higher wages as part of a union may be eliminated altogether.
- **The Affordable Care Act (ACA) will most likely be repealed**. If you are one of the 45 million people with health insurance through the ACA, you could lose the only health insurance you can afford.
- You could be one of 100 million+ people with pre-existing health conditions who could lose essential protections against discrimination.
- You will almost certainly **lose the right to vote** in anything but a sham election.
- **Your life could be under threat on a daily basis**. Under-regulated foods and drugs, viruses running rampant, an unchecked number of guns in our streets, and a police force militarized against anyone who speaks up against Trump or Project 2025 may become our daily realities.
- **The world you live in will become far less safe and stable**, as our international alliances crumble, rogue nations start wars, and our poisoned, rapidly warming environment gives rise to more frequent life-threatening disasters, climate migration, resource depletion, starvation, and illness.

BOTTOM LINE: Under Trump's Project 2025, only conservative white males, billionaires and evangelical Christians are safe. **The rest of us are in danger.**
