

# Auditory Processing Disorder Program

Does your child exhibit any of the following symptoms?

- Doesn't pick up nursery rhymes or song lyrics?
- Has trouble following directions?
- Doesn't remember details of what's heard?
- Appears to be listening but not hearing?
- Has difficulty understanding speech in noisy environments?

Has trouble learning to read and spell?

Finds it hard to follow conversations?

Finds it hard to express himself clearly?

Frequently says "HUH"?

You are not alone in this journey! If you have been told that there is no hope for improvement, give us a call and speak to a new patient advocate to determine if something may have been overlooked.

INFORMATION

- If so, an Auditory Processing Disorder may be the cause.
- Auditory processing disorder is the inability to process certain sounds. While it does not affect hearing, it can interfere with a child's ability to learn and develop the critical skills required for reading, language and comprehension.
