STANDARD MUSIC LIST 2017

Event: _____

Event Date: _____

Instructions

Sorry about the specificity of the instructions but it is how I can keep the time I spend in my office & rates down.

- If you would rather send me a separate list of up to 2 dozen songs you now have the option to ignore this list, using it just for reference. If you choose to do so, your list needs to have the artist name 1st then title such as; Beatles: Twist & Shout.
- However, if you do want to build your requests into this list, **in order to avoid the additional \$75 upgrade fee**, it would be best to save, work & use the formatting as designed on your computer as color coding & directions must be followed.
- This list contains only artists & titles that are my *best suggestions* for *party dancing* & *slow dances*.
- If you don't want to spend a lot of time on this, after skimming over the artists in the category, just highlight **categories** you generally favor & leave the rest to me.
- If you wish, you can take the next step by highlighting **artists** if I can play almost all their music &/or **titles** that you specifically want played for listening, dancing *or for any "special activities"*.
- And if you want to be more involved, if you see an artist you want but not the title, type just the title directly next to the artist name, **not under**, & as long as it displays in **purple**, you're OK but in the event you enter more than 1, create some separation between titles.
- Change font color to **red** for any **category**, **artist** or **title** you **do not want played under any circumstances!** If a guest requests a category, artist or title that has been rejected, I **may** send them to you for an OK.
- **There is a space at the end to place unseen or artists with their titles or additional music you don't want played under any circumstances.**
- Although I do not play songs with explicit lyrics, some songs have *content issues* (language, sexual, violence, drugs, etc.) & are so indicated with **[ci]**.
- ***Only about 15 to 20 songs per hour*** can be played ***so don't get carried away.***
- Save & return via email when done without changing any formatting.

Thank you for your consideration. Continue to list.
