## ARTIST LIST

- It would be best to save & work on this list on your computer as a Word file instead of this PDF file.
- Highlight **categories** &/or **artists** that you want played for listening, dancing or for any *special activities*.
- If you want a specific title by an artist, type directly next to the artist name (not under) & should display in **purple**. In the event you enter more than 1, create some separation between titles.
- Change font color to **red** for any **category** or **artist** you **do not want played under any circumstances!** If a guest requests a category or artist that has been rejected, I may send them to you for an OK.
- **Please wait until the end to place unseen artists & their titles.** Although it is best to use this list, you can send me a separate list of artist/titles. If you send me more than the 25, I may not play them all.
- **Only about 15 to 20 songs per hour** can be played *so try not to get carried away*.
- *Artist names & titles are sometimes abbreviated to save space so please asks for any assistance if needed.*
- Please return as is when done without changing any formatting.

### A} Specialties

Titles in italized **green** & **blue** are very popular. If you don't see what you want here, you may find what you want farther down in the list.

[you can type over the **purple** for items not seen specific to this grouping, Artist: title]
