ALEXANDRIA BUSINESSWOMAN HOPES TO SAVE THE WORLD

Why is Marci Weis so passionate about her newest adventure of sharing the innovative Aqueous Ozone Sanitizing Spray Bottle?

Alexandria, Virginia - "Being able to help people, what greater gift is there," stated Marci Weis, as she emotionally explained why she is passionate about her newest adventure of sharing the innovative Aqueous Ozone Sanitizing Spray Bottle. Marci is introducing the community to a revolutionary sanitizing spray bottle that turns ordinary tap water into a virus killer, and is on a mission to help educate others on how they can stay safe, and keep money in their pockets.

Marci's passion for the bottle comes from the fact that this product is safe, eco-friendly, and can be used to kill viruses. The bottle achieved a 99.9% virus reduction within 30 seconds against the Human Coronavirus SARS-CoV-2 (*the virus that causes COVID-19*).

"The idea that I could make the bottle available to a population that was suffering from extraordinary pain with the virus, was pretty overwhelming. I felt that it was a tremendous obligation to do what I could to help, and the quicker the better," said Marci.

Marci urges her peers to take everything they know about cleaning and throw it out the window because the spray bottle will replace all of your cleaning products! Simply by adding tap water, and a pull of the trigger, the aqueous ozone is activated inside the bottle to create low-concentrated aqueous ozone that breaks up germs and bacteria without leaving a residue. The eco-friendly bottle is safe for all ages and all surfaces! With the sanitizing spray bottle there's no need to have chemicals in your cabinets ever again!

Marci's goals for Save the World are to present an offering that, in a non-toxic way, kills germs, pathogens, viruses and bacteria. "This new way of protection will eliminate the use for previously used chemical methods. The bottle is an incredibly simple and obvious alternative," said Marci.

The sanitizing spray bottle's \$199 price tag comes with the added benefits of only using one cleaning product with tap water that can be reused for up to 600 refills. Along with saving the world, the magical bottle will also save you hundreds of dollars. To learn more about Marci Weis and Save the World, LLC, visit www.SaveTheWorldLLC.com.

The Aqueous Ozone Sanitizing Spray Bottle (manufactured by Enozo Technologies, Inc.) is classified as a pesticidal device under EPA regulations. It has demonstrated effectiveness against viruses similar to SARS-CoV2 (COVID-19) on hard non-porous surfaces employing test methods recognized as scientifically valid in the field.
