

Our services:

Cortisone/Steroid Injections

Cortisone or steroid injections deliver powerful anti-inflammatory medications directly to the site of pain, providing targeted relief and reducing swelling in joints, nerves, or soft tissues.

Whether you're experiencing joint pain from arthritis, inflammation from a sports injury, or nerve-related discomfort, our skilled specialists utilise ultrasound or CT guidance to precisely administer steroid injections. By choosing steroid injections, you can experience significant pain relief reducing the need for oral medications or invasive procedures.

Radiofrequency Ablation (RFA)

At IPGC we are the leaders in imaging guided Radiofrequency Ablation (RFA). RFA has the potential to provide longer-lasting pain relief, if steroid injections have failed.

This minimally invasive technique utilises radiofrequency energy to target and disrupt the nerves responsible for transmitting pain signals. By precisely heating the nerve tissue, RFA can provide significant and often prolonged relief from chronic pain conditions such as arthritis, back pain, neck pain, and more.

With our skilled specialists and state-of-the-art technology, we can help you find relief and regain control over your life. Experience the transformative power of Radiofrequency Ablation. Contact IPGC today to learn more about this innovative procedure and find out if it has the potential to help you.

Ultrasound and CT Guided Procedures

At IPGC, we understand the impact that pain can have on your life. That's why we are dedicated to helping you find relief and regain control over your well-being. Led by a highly experienced radiologist, our clinic employs advanced techniques and state-of-the-art equipment to ensure accurate diagnoses and precise treatment delivery.

Our mission is to transform the way patients are treated by offering specialised care and attention at our dedicated facility.

Why choose us?

Expert Care from a Team of Specialists

Our clinic is operated by a team of experienced individuals who are passionate about improving your quality of life. With their expertise in ultrasound and CT-guided procedures, they ensure accurate diagnoses and precise treatment delivery, offering you the best chance of achieving long-lasting pain relief.

Comprehensive Approach to Pain Management

We take a comprehensive approach to pain management, focusing on identifying the root causes of your pain. By utilising advanced imaging technology and conducting thorough examinations, we gain a deep understanding of your condition to develop targeted treatment plans that address your unique needs.

Compassionate and Supportive Environment

At IPGC, we prioritise your comfort and well-being. Our caring and compassionate staff create a welcoming environment, providing the support you need throughout your treatment journey.

How to make an appointment

Our clinic ensures a streamlined booking process, making it easy for patients to obtain an appointment.

It's as easy as:

One | Get a referral from your GP or Specialist

All referrals on any letterhead will be accepted.

Two | Email, call or book your appointment online

Please see the contact details below.

Three | Let our friendly booking staff and experienced team take care of the rest!
