NOTES to PEPU Developers:

- Having launched two tokens on the PP, I've run into the need to edit the token's image, website, & social media link but don't see how to do this. If I own the token, I need to be able to edit it's properties. Please provide this capability and add to your documentation.

EDITOR's DESK – Day 15...

PEPU Army - Ignore all the FUD and stay focused. Keep buying PEPU while the price is low, stake and hold. I'm splitting out the newsletter into a few pages. I'll post separately online, but they are all one .PDF file posted to the yotfb.io web site for easy viewing. I'll keep a main page for general news, journal page to track changes, roadmap/ecosystem page and a software development page. We'll see how this goes... If it is too much, just say so.

I found a coingecko.com **2024 Annual Crypto Industry Report** and posted that under the **YOTFB NEWS** page. The significant piece was #7 – Solana Overtook Ethereum... I think this gave rise to PEPU and the need for a Ethereum-based Pump Pad. Now we have it, so lets build on it.

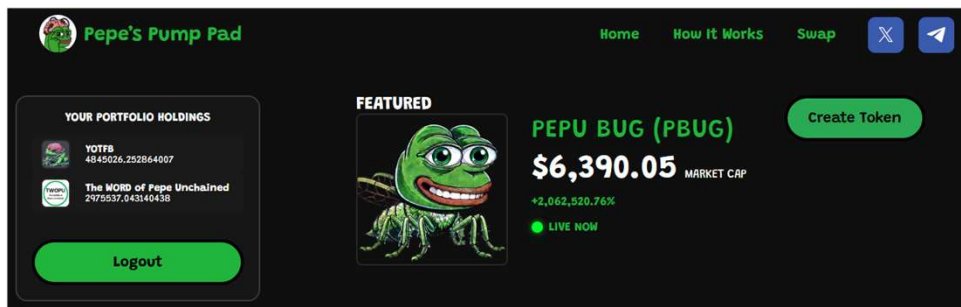

In the past day, I've begun exploring **Thirdweb.com – the development platform for PEPU**. There is an incredible amount of information on the thirdweb.com youtube channel on how to design and build your own Web3 applications. I really think this is the key to our long term growth. We need to more developers and projects onboard. And I'm talking about some serious projects and not just games. We need to be instructing and training the next generation of software developers as the sky is the limit. https://www.youtube.com/@thirdweb_ Think about it, your wallet is your identity, no one has access to it except you (provided you keep the keys a secret). Web 3 apps can use crypto wallet for wallet-based authentication. Apps no longer require username and password, just connect your wallet and sign the request. Perfectly safe and legitimate and proper authentication is assured that's the power of Web 3.0. This is powerful and "Thirdweb Auth" is proprietary as it was developed and is maintained by thirdweb. Looks like a really good development platform choice for PEPU. I'm pumped!
