A petition was initiated on 2/7
requesting Binance & Coinbase
list PEPU
(see chng.it/M2LXyyH2v4)

As of 2/20 7:33am we are at
101 signatures. Let's pump it up!

EDITOR's DESK - The YOTFB Project.

MAIN NEWS PAGE (1A):

PEPU Army - Welcome to the YOTFB newsletter. Ignore all the FUD and stay focused. Keep buying PEPU while the price is low, stake and hold. We have a great future with this coin and platform. Look at the price dips as buying opportunities to load your bag with PEPU. Look at this L2 ecosystem as a platform. It is only 2 months in. It will evolve and improve over time, so stay strong and hold/stake ☺ Yesterday, we hit 101 signature mark on our petition drive: chng.it/M2LXyyH2v4 Today, we observe a 24% jump in the number of PEPU addresses on the blockchain. In one day, this is significant. We'll be watching the blockchain stats closely.

Social Media (1A):

I mentioned this yesterday - **YOTFB Project is joining forces with PepuArmy! - To build a BIGGER ARMY. Check them out at <https://pepuarmy.com>**

PEPU TIMELINE (2A):

Some day by day notes of our journey...
As we peer into the Block Explorer, we are identifying additional data points to collect, aggregate and report on. Keep an eye on <https://www.pepuscan.com/stats>. Notice the # of PP tokens on the rise. **There have been 6,230 tokens created on the PEPU Pump Pad. 70 new tokens in the past 24hrs... this this is growing.**

ROADMAP/Architecture (3A-D): The big picture (mission-roadmap) and plans/architecture. I have a Visio diagram of my vision and YOTFB components. It's evolving...

APP DEVELOPMENT (4A-B): Info about our PEPU ecosystem application development project: **TWOPU (word game)**

Looking at thirdweb.com information - learning about in-app wallets, what they are. See why PEPU developers chose thirdweb platform.

COMMUNITY & Training (5A-B): Info and thoughts from community contributors. The Pepu Army has a web site, TG channel and Pump Pad Token...

PumpPad (6):

Any news about the Pepu Pump Pad
Our online petition requesting BINANCE and COINBASE list PEPU is getting some traction. We are up to 101 signatures as of today. Let's keep pumping and pushing the petition (chng.it/M2LXyyH2v4)

I'm getting well versed in using the pump pad to buy and invest in some of the new PP tokens: \$PEPUArmy\$, MatrixFrog and VITALIK, just to name a few. Just throwing around some FREE / claimed PEPU tokens... ☺

PEPU Block Explorer(7):

I'll remind everyone that on day 1 of the launch of the PEPU Pump Pad, I created YOTFB token. If you want support this newsletter, go buy some of these tokens to show support. That's all I'll say about that. Below we look at some PEPU L2 blockchain data and noted the PP token count has not increased in the past 24 hrs. This looks like an anomaly but given the price drop, it's possible it didn't

The YOTFB Project (Year of the Frog Brain)	Web Site: https://yotfb.io	Section 3A YOTFB Roadmap	Thursday, February 20th, 2025 (Day 25)
We devote this section to the YOTFB Project Roadmap:			

MISSION

Simple. To grow the PEPU Ecosystem and in turn grow the PEPU token price thru education and adoption. We will grow PEPU and boldly go where no token has gone before. The more PEPU holders, the bigger the market capitalization and the higher the PEPU token price (with deflationary Pump Pad burns occurring as well).

Our niche is PEPU education. This will include social media, newsletters, petitions, use of pump pad, investing & trading, documentation How-To's, Youtube video training and of course software / app development. We will collaborate with other PEPU projects and communities and build everyone up.

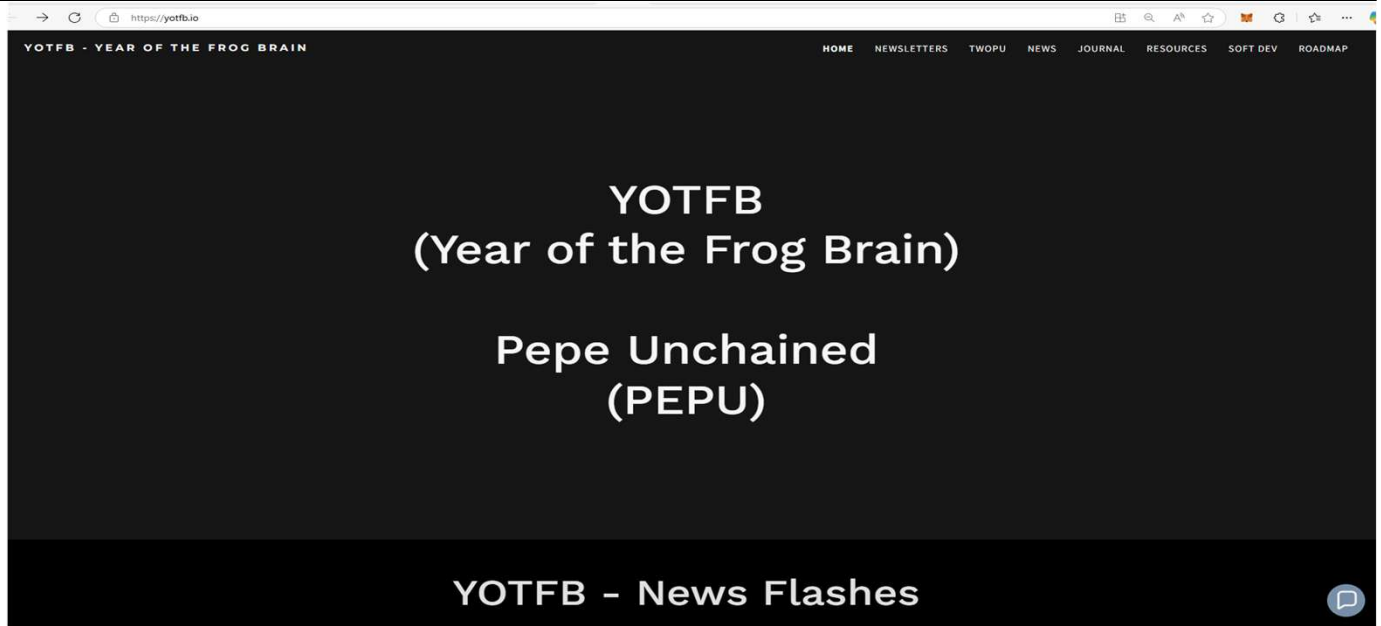

We will learn all we can day by day about the current and developing features of the PEPU L2 ecosystem (and it's Ethereum foundation) and build on top of it. We have a strong security core with Ethereum. Now we have speed, low cost and efficiency with PEPU on the Layer 2.

We launched a token called YOTFB on the first day the PEPU Pump Pad was launched. Those who wish to see this project grow and succeed can help support the effort by buying some of these YOTFB tokens. Project costs are small right now and involve domain registration fees, web hosting fees, purchased productivity apps. It's mostly time to research, gather, organize and develop the content and build apps. We will ensure our application development efforts can contribute to the cause and burn PEPU tokens in the process. PP Token creation is now burning PEPU, but the apps we develop can also do the same.

ROADMAP

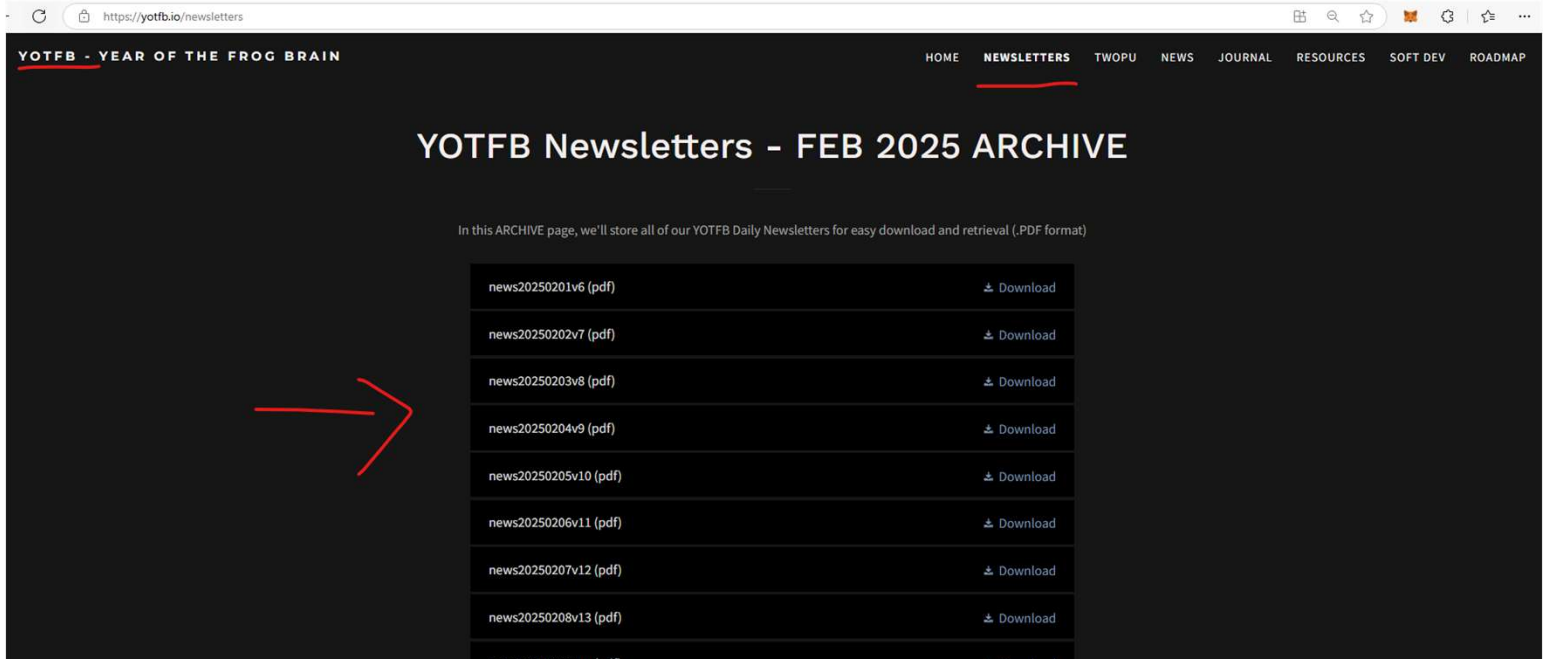

Phase 1: (2025 Q1) • Newsletter (Daily). • Social Media Site Setup. CoinmarketCap, X.com, Telegram, Youtube • Public Web Site Setup. • Launch YOTFB token on Pump Pad. • PEPU community engagement. • Learning the thirdweb dev platform. • Launch TWOPU token on Pump Pad for app project.	Phase 2: (2025 - Q2/Q3) • Application launch 5-letter word game Web3 app on top of PEPU L2. • Continued Newsletter content development. • Develop YOTFB, TWOPU tokens. • Youtube training videos.	Phase 3: (2025 - Q4) • Further TWOPU application development and burn mechanism. • Design next application design... • Development application development training and documentation.

In-App Wallets in Web3 Applications

An in-app wallet is a cryptocurrency wallet integrated directly into a Web3 application, allowing users to store, manage, and interact with their crypto assets without needing an external wallet like MetaMask or Ledger. These wallets streamline the user experience by providing seamless access to blockchain functionalities inside the app itself.

How In-App Wallets Work

User Onboarding

Users can create a wallet within the app using their email, social login (Google, Apple), or a passwordless method like magic links.

The app often handles key management to make onboarding easier.

Key Management

Non-Custodial: Users retain full control over their private keys, often stored on the device or secured via MPC (Multi-Party Computation).

Custodial: The app or a third party manages the private keys for a smoother user experience.

Transaction Signing

Users can sign transactions directly within the app.

Gas fees may be abstracted or covered by the app (via meta-transactions).

Blockchain Interactions

The wallet enables users to buy, sell, stake, swap, or interact with smart contracts within the app. It may support multiple blockchains (Ethereum, Solana, PEPU Layer 2, etc.).

Benefits of In-App Wallets

- ✓ Seamless UX: No need for external wallet extensions or apps.
- ✓ Frictionless Transactions: Users can interact with dApps effortlessly.
- ✓ New User Friendly: Simplifies onboarding for non-crypto-savvy users.
- ✓ Cross-Platform: Works on web, mobile, or even embedded in games.
- ✓ Gas Abstraction: Some wallets cover transaction fees to improve usability.

Examples of Web3 Apps Using In-App Wallets:

Coinbase Wallet SDK – Allows Web3 apps to integrate an embedded wallet.

Argent – A smart contract-based wallet with gas-free transactions.

Magic (ex-Fortmatic) – Enables login-based Web3 wallets.

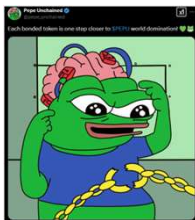

Thirdweb Smart Wallet – For developers to embed Web3 wallets in dApps.

PEPU Layer 2 Wallets – Could be integrated into projects on PEPU blockchain.

We devote this page to all the PEPU Army ideas and contributions...

We all need to learn to build apps!

- Instant and low fee bridging between ETH and Pepe Chain
- Lowest transaction fees
- Instant transactions
- Higher Volume Capacity — 100x faster than ETH
- Dedicated Block explorer to see all transactions on Pepe Unchained Layer 2

The PEPU Ecosystem was built with Web3Toolkit !!

so how does web3toolkit that PEPU collaborated on to build the eco system align or work with thirdweb.com?

The **Web3 Toolkit** that PEPU collaborated on is designed to support the Pepe Unchained (PEPU) Layer 2 blockchain ecosystem by offering tools for developers to build decentralized applications (dApps) efficiently. **Thirdweb** is a separate Web3 development platform that provides ready-made smart contracts, SDKs, and infrastructure to help developers deploy and manage blockchain-based applications.

Here's how these two might align or work together:

1. Smart Contract Deployment & Management

- **Web3 Toolkit (PEPU):** Likely provides native smart contract templates, dev tools, and APIs specific to the PEPU Layer 2 chain.
- **Thirdweb:** Offers a **plug-and-play** interface for deploying smart contracts, including ERC-20, ERC-721 (NFTs), and custom contracts. If PEPU integrates with Thirdweb, developers could use **Thirdweb's contract UI** to deploy and manage contracts on the PEPU network.

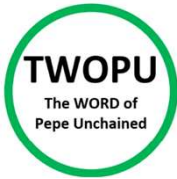

2. Developer Tools & SDKs

- **Web3 Toolkit (PEPU):** May include **native SDKs** for PEPU-compatible dApp development, including wallet integration, Layer 2 scaling solutions, and gas-efficient transactions.
- **Thirdweb:** Offers SDKs for **React, JavaScript, Unity, Python**, and more, which could be extended to support PEPU. If PEPU is officially supported, developers could use **Thirdweb's SDK** to interact with PEPU's smart contracts seamlessly.

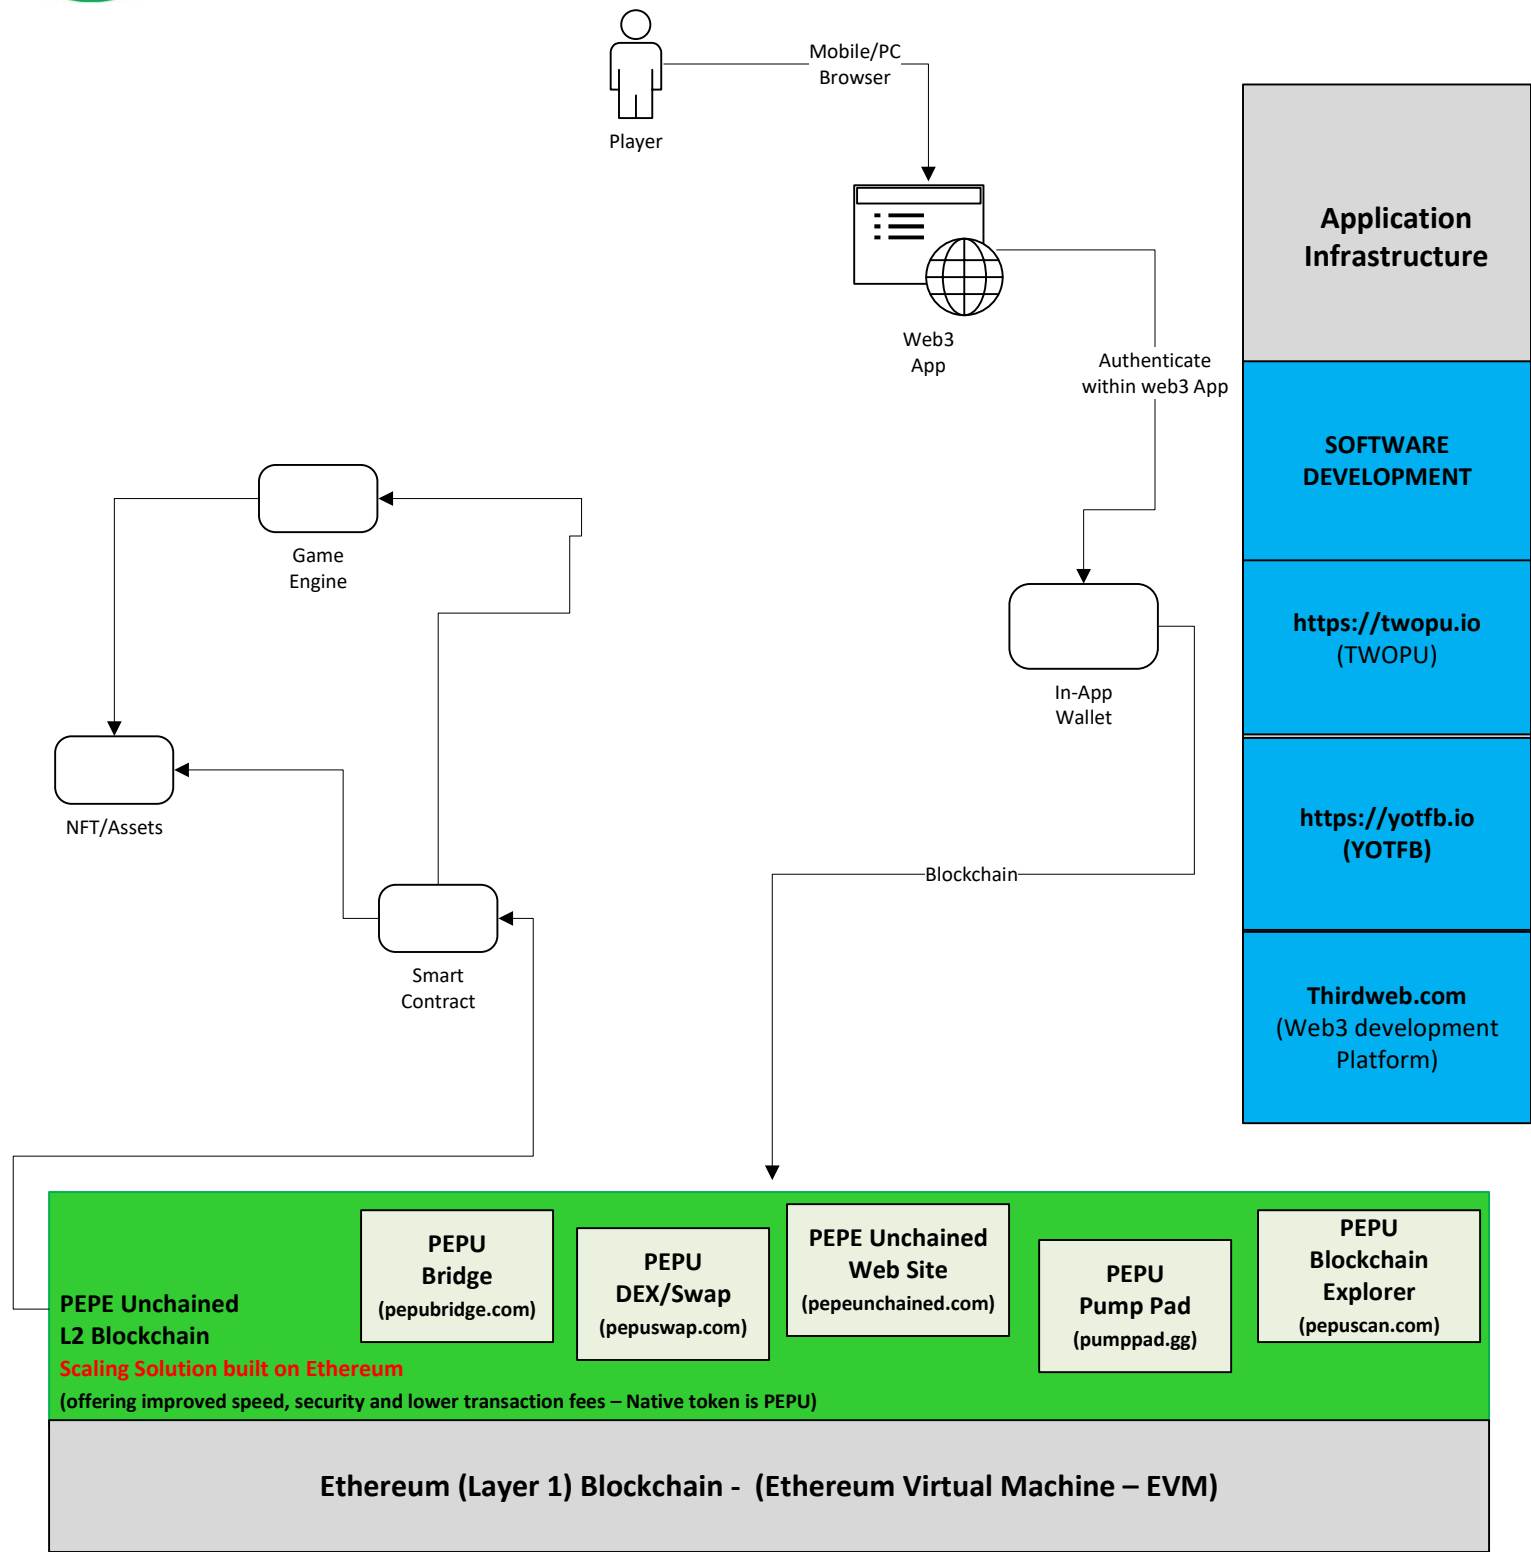

3. Wallet Integration & Authentication

- **Web3 Toolkit (PEPU):** Likely includes wallet tools tailored for PEPUs transactions.
- **Thirdweb:** Has a **Wallet SDK** that supports multiple wallets, such as MetaMask, WalletConnect, and Coinbase Wallet. If PEPUs integrates with Thirdweb, **dApps on PEPUs could easily authenticate users** using Thirdweb's wallet services.
