list PEPUs
(see chnng.it/M2LXyyH2v4)

As of 2/16 3pm we are at 96
signatures. Let's pump it up!

NOTES to PEPU Developers:

- Having launched two tokens on the PP, I've run into the need to edit the token's image, website, & social media link but don't see how to do this. If I own the token, I need to be able to edit it's properties. Please provide this capability and add to your documentation.

EDITOR's DESK - Day 21 of YOTFB Project.

MAIN NEWS PAGE (01):

PEPU Army - Welcome to the YOTFB newsletter. Ignore all the FUD and stay focused. Keep buying PEPUs while the price is low, stake and hold. We have a great future with this coin and platform. Today, we added and reorganized our newsletter pages and included a TOC (Table of Contents). I can't do it all every day, so in this main page, we'll just touch on what is added/changed each day. Pages not updated, will be left unchanged except for the title (They all have the same newsletter published date). By adding sections, I can more easily expand in areas where we want to report / educate on. There are lots of other community members promoting various projects and building on PEPUs Ecosystem, so we want to call those out and help support the entire community. I'm simply a PEPUs investor holding, staking and restaking PEPUs tokens and want it to grow and succeed like everyone else. There is SO MUCH to learn. We are just beginning 21 days into this YOTFB project.

Social Media (1A):

UPDATE: So I spent time on Telegram and discovered a 454 member PepeArmy group (t.me/PepeArmy): With each new encounter on various social media platforms, RISK is ever present so one must be careful, but this looks like a well trained team of PEPUs followers. **YOTFB Project is joining forces with PepeArmy! - To build a BIGGER ARMY. Check them out at <https://pepearmy.com>**

PEPU TIMELINE (02):

Some day by day notes of our journey...
As we peer into the Block Explorer, we are identifying additional data points to collect, aggregate and report on.

ROADMAP (3A):

The big picture and plans/architecture.
I have a Visio diagram of my vision and YOTFB components. It's evolving...

APP DEVELOPMENT (4A):

Info about our PEPUs ecosystem application development project:
TWOPU (word game)
Looking at thirdweb.com information - learning about in-app wallets, what they are. See why PEPUs developers chose thirdweb platform.

COMMUNITY NUGGETS (5B):

Info and thoughts from community contributors.
Included <https://pepustake.com> link as this application seems to be evolving...

DEX/CEX (6):

Any news about our Tier 1 exchange listings...
Our online petition requesting BINANCE and COINBASE list PEPUs is getting some traction. We are up to 96 signatures as of today. Let's keep pumping and pushing the petition (chnng.it/M2LXyyH2v4)

PUMP PAD (7):

I'll remind everyone that on day 1 of the launch of the PEPUs Pump Pad, I created YOTFB token. If you want support this newsletter, go buy some of these tokens to show support. That's all I'll say about that. As I mentioned in a previous newsletter, my reward will be the price of PEPUs going to \$1. In the meantime, YOTFB Project has lots of ideas on how to help. 1) Daily Newsletter. 2) Web site with archive of newsletters and other resources for PEPUs. 3) Petition launched to get PEPUs listed on Binance and Coinbase CEX's. 4) App development project called TWOPU, a web3 game we are building to utilize PEPUs L2 and thirdweb platform PEPUs operates on. This is just a start. This is a long term project and we'll focus on documenting and teaching others how to build apps on top of PEPUs.

PEPU INVESTING (8):

Discussion about PEPUs tokenomics - not an expert in finance, but will gather other thoughts.
Hot to buy, claim/stake and sell PEPUs tokens info posted.

The YOTFB Project (Year of the Frog Brain)	Web Site: https://yotfb.io	Section 3A YOTFB Roadmap	Sunday, February 16 th , 2025 (Day 21)
We devote this section to the YOTFB Project Roadmap:			

MISSION

Simple. To grow the PEPU Ecosystem and in turn grow the PEPU token price thru education and adoption. We will grow PEPU and boldly go where no token has gone before. The more PEPU holders, the bigger the market capitalization and the higher the PEPU token price (with deflationary Pump Pad burns occurring as well).

Our niche is PEPU education. This will include social media, newsletters, petitions, use of pump pad, investing & trading, documentation How-To's, Youtube video training and of course software / app development. We will collaborate with other PEPU projects and communities and build everyone up.

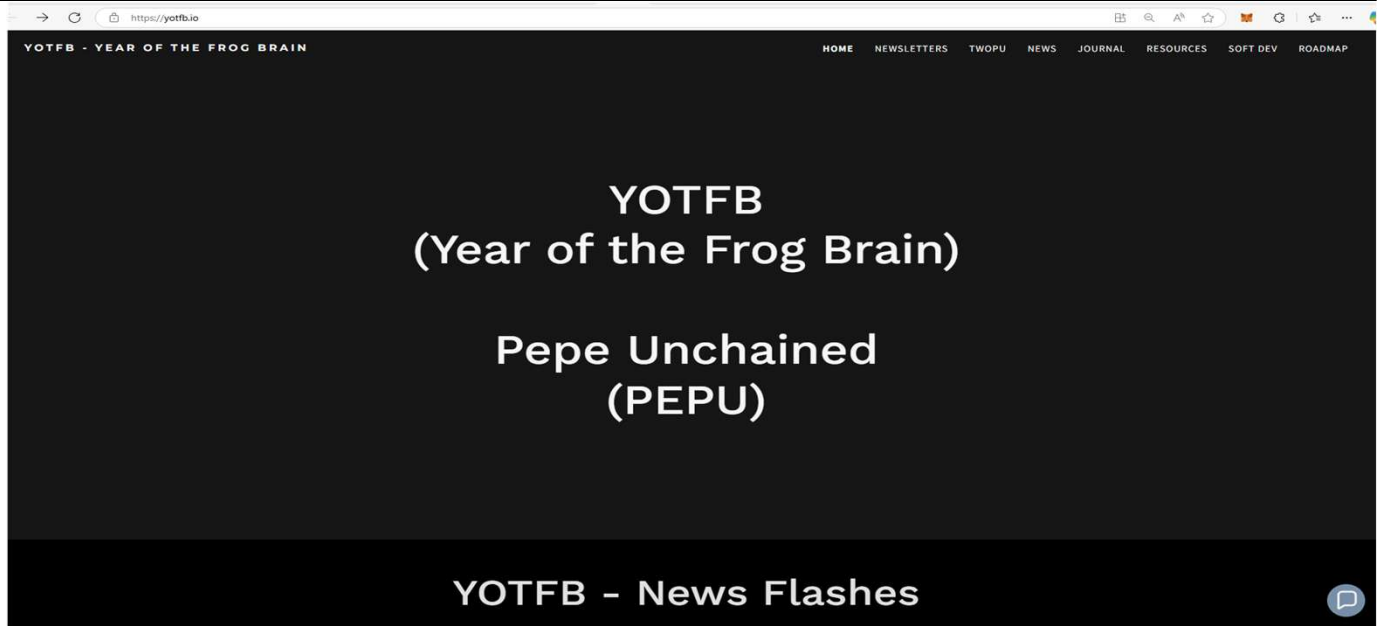

We will learn all we can day by day about the current and developing features of the PEPU L2 ecosystem (and it's Ethereum foundation) and build on top of it. We have a strong security core with Ethereum. Now we have speed, low cost and efficiency with PEPU on the Layer 2.

We launched a token called YOTFB on the first day the PEPU Pump Pad was launched. Those who wish to see this project grow and succeed can help support the effort by buying some of these YOTFB tokens. Project costs are small right now and involve domain registration fees, web hosting fees, purchased productivity apps. It's mostly time to research, gather, organize and develop the content and build apps. We will ensure our application development efforts can contribute to the cause and burn PEPU tokens in the process. PP Token creation is now burning PEPU, but the apps we develop can also do the same.

ROADMAP

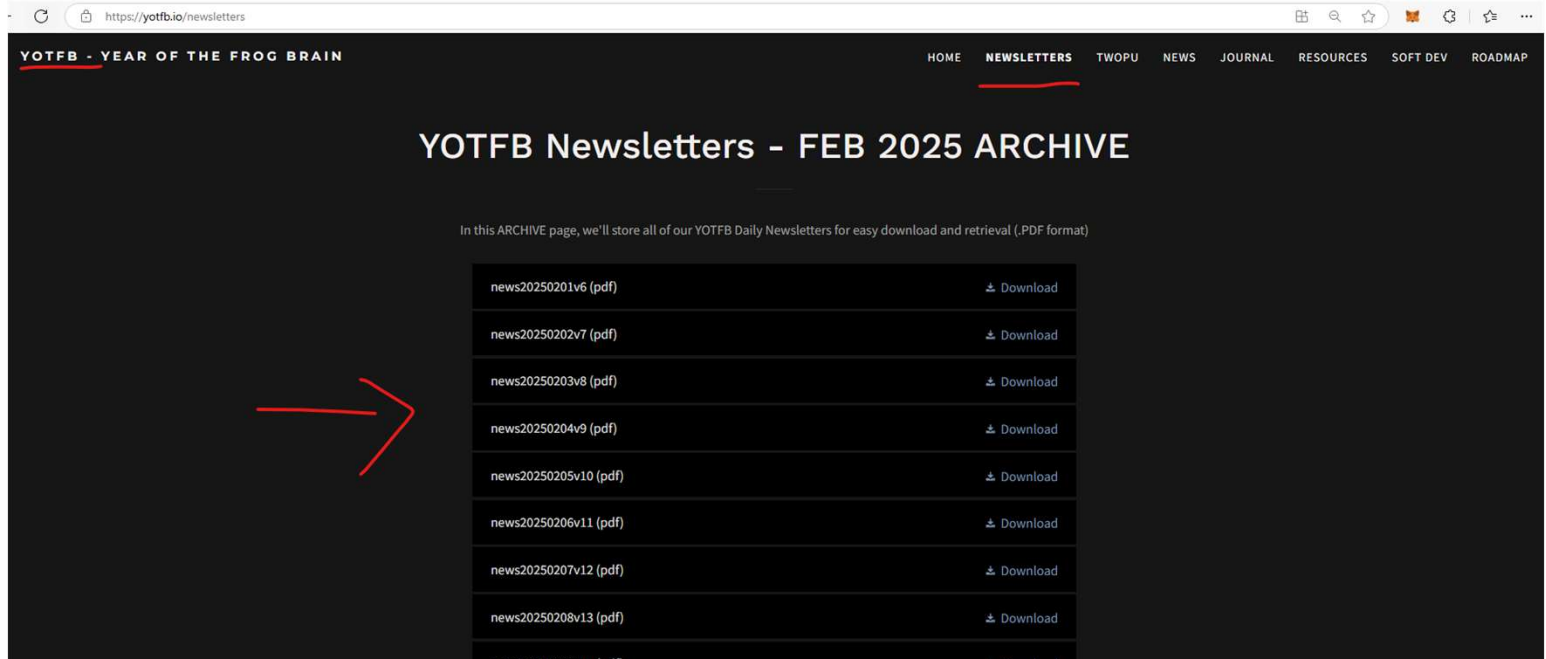

Phase 1: (2025 Q1) • Newsletter (Daily). • Social Media Site Setup. CoinmarketCap, X.com, Telegram, Youtube • Public Web Site Setup. • Launch YOTFB token on Pump Pad. • PEPU community engagement. • Learning the thirdweb dev platform. • Launch TWOPU token on Pump Pad for app project.	Phase 2: (2025 - Q2/Q3) • Application launch 5-letter word game Web3 app on top of PEPU L2. • Continued Newsletter content development. • Develop YOTFB, TWOPU tokens. • Youtube training videos.	Phase 3: (2025 - Q4) • Further TWOPU application development and burn mechanism. • Design next application design... • Development application development training and documentation.

In-App Wallets in Web3 Applications

An in-app wallet is a cryptocurrency wallet integrated directly into a Web3 application, allowing users to store, manage, and interact with their crypto assets without needing an external wallet like MetaMask or Ledger. These wallets streamline the user experience by providing seamless access to blockchain functionalities inside the app itself.

How In-App Wallets Work

User Onboarding

Users can create a wallet within the app using their email, social login (Google, Apple), or a passwordless method like magic links.

The app often handles key management to make onboarding easier.

Key Management

Non-Custodial: Users retain full control over their private keys, often stored on the device or secured via MPC (Multi-Party Computation).

Custodial: The app or a third party manages the private keys for a smoother user experience.

Transaction Signing

Users can sign transactions directly within the app.

Gas fees may be abstracted or covered by the app (via meta-transactions).

Blockchain Interactions

The wallet enables users to buy, sell, stake, swap, or interact with smart contracts within the app. It may support multiple blockchains (Ethereum, Solana, PEPU Layer 2, etc.).

Benefits of In-App Wallets

- ✓ Seamless UX: No need for external wallet extensions or apps.
- ✓ Frictionless Transactions: Users can interact with dApps effortlessly.
- ✓ New User Friendly: Simplifies onboarding for non-crypto-savvy users.
- ✓ Cross-Platform: Works on web, mobile, or even embedded in games.
- ✓ Gas Abstraction: Some wallets cover transaction fees to improve usability.

Examples of Web3 Apps Using In-App Wallets:

Coinbase Wallet SDK – Allows Web3 apps to integrate an embedded wallet.

Argent – A smart contract-based wallet with gas-free transactions.

Magic (ex-Fortmatic) – Enables login-based Web3 wallets.

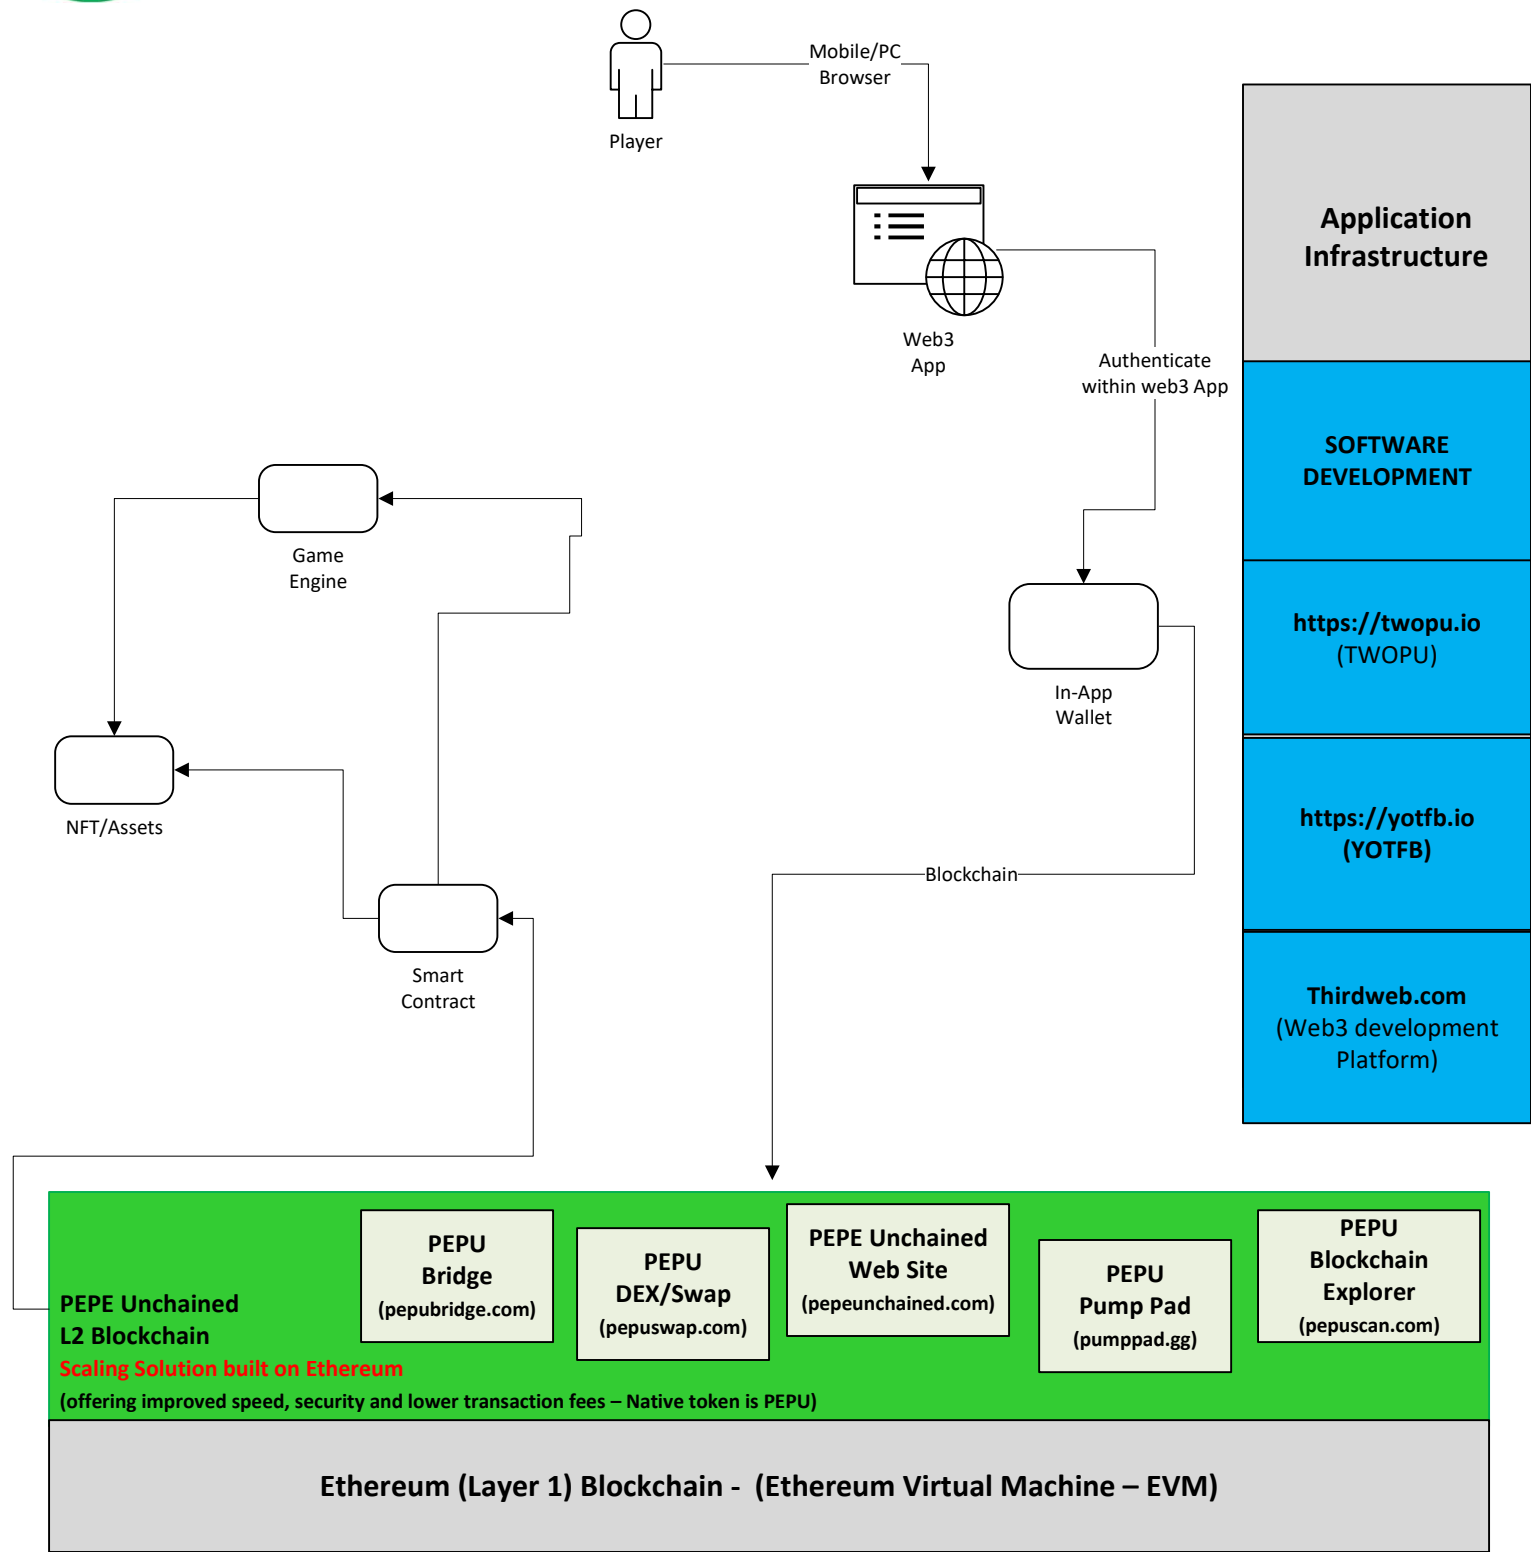

Thirdweb Smart Wallet – For developers to embed Web3 wallets in dApps.

PEPU Layer 2 Wallets – Could be integrated into projects on PEPU blockchain.

Entry – Buying PEPU	Growing PEPU Investment	Exit – Selling PEPU
- On Coinbase, buy ETH using linked Checking Acct. - Send ETH to MM Wallet - On Uniswap.com (or within PEPU website, swap ETH for PEPU (on Ethereum L1 blockchain - On PEPU Bridge, send PEPU on L1 to PEPU L2. - Stake all PEPU in L2 to receive maximum (206%) rewards till May 2026.	- On PEPU web site (pepeunchained.com), review and claim your rewards. Can do it as often as you like. - Then immediately stake your claimed rewards. - Wash, rinse, repeat... Do it daily to compound your rewards faster and watch that staked balance grow.	- Recommend – Long term holding PEPU !! - When that day or price point arrives, take these steps... - Unstake all PEPU (you can't unstake a portion of your PEPU holdings. - On PEPU DEX, swap PEPU for USDC to lock in price. This is really important! - On PEPU Bridge, Send USDC to Ethereum L1 (takes 7 days).
