## EDITOR's DESK - The YOTFB Project. A crypto newsletter devoted to all things PEPU...

PEPU Army - It's another good day and welcome to the YOTFB newsletter. Ignore all the FUD and stay focused. Keep buying PEPU while the price is low, stake and hold. We have a great future with this coin and platform. We have a new email address: [editor@yotfb.io](mailto:editor@yotfb.io) - Please use this if you wish to contact YOTFB. Please use this channel if you have any ideas on how the newsletter can be improved.

Today, we feature a post by PEPU DUDE (x.com @PEPU\_DUDE). DUDE speaks to the PEPU burning mechanism and how its working. He projects 30,000 PEPU burned monthly. We show a little higher # of tokens created on the pumppad compared to his stats, but there isn't a date/time frame to compare to. Tune into PEPU DUDE on X and check this DUDE thoughts and comments.

We also feature a post by cryptosisyphos (x.com @cryptosisyphos). They share some positive thoughts on PEPU L2, successful pre-sale, Meme hype, staking rewards and forecasts. Tune into Cryptosisyphos.

\$PEPU is the greatest token with utility out there and it's hardly getting recognized but that will inevitably reverse and reward those who kept riding despite what the charts were saying. The rewards and staking algorithm was brilliant and personally, I make roughly \$40 worth of \$PEPU per day because of it. It's so worth it! What are you waiting for? 🤪🐸🐸

\$PEPU The burning mechanism is working properly!

808,502 already burned!! 🔥🔥

Monthly Burn=Daily Burn 30 x Assumptions:

Average Daily Transactions: 100,000

Burn Rate per Transaction: 0.01 \$PEPU

Daily Burn: 100,000 x 0.01 PEPU = 1,000 \$PEPU

Monthly Burn: 1,000 \$PEPU x 30 = 30,000 \$PEPU

\$PEPU [coinmarketcap.com/currencies/pep...](https://coinmarketcap.com/currencies/pep...)

Layer 2 technology: Pepe Unchained (\$PEPU) is built on an Ethereum Layer 2 blockchain, which promises faster and cheaper transactions. Such scaling solutions are in demand in the crypto world, especially if Ethereum continues to grow and gas fees remain an issue.

Successful presale: The presale has already raised over 65 million US dollars (as of the end of 2024 according to FinanceFeeds), which indicates strong investor interest. This shows confidence in the project and could form the basis for a solid market capitalization after the launch.

Meme coin hype: Meme coins like \$PEPU have proven in the past that they can see huge increases in value through community support and viral marketing. \$PEPU capitalizes on this trend but combines it with technical substance (layer 2), which could set it apart from pure hype coins.

Staking rewards: With 30% of the token supply for staking incentives, \$PEPU could attract long-term holders, keeping the tokens scarce and potentially supporting the price.

Forecasts: Various sources are optimistic. FinanceFeeds estimates a value of \$0.504 by the end of 2025, while Techreport predicts as much as \$0.97 - that would be massive gains from current presale levels.

Layer 2 technology: Pepe Unchained (\$PEPU) is built on an Ethereum Layer 2 blockchain, which promises faster and cheaper transactions. Such scaling solutions are in demand in the crypto world, especially if Ethereum continues to grow and gas fees remain an issue.

Successful presale: The presale has already raised over 65 million US dollars (as of the end of 2024 according to FinanceFeeds), which indicates strong investor interest. This shows confidence in the project and could form the basis for a solid market capitalization after the launch.

Meme coin hype: Meme coins like \$PEPE have proven in the past that they can see huge increases in value through community support and viral marketing. \$PEPU capitalizes on this trend but combines it with technical substance (layer 2), which could set it apart from pure hype coins.

Staking rewards: With 30% of the token supply for staking incentives, \$PEPU could attract long-term holders, keeping the tokens scarce and potentially supporting the price.

Forecasts: Various sources are optimistic. FinanceFeeds estimates a value of \$0.504 by the end of 2025, while Techreport predicts as much as \$0.97 - that would be massive gains from current presale levels.

**\$PEPU** is the greatest token 🐸 with utility out there and it's hardly getting recognized but that will inevitably reverse and reward those who kept riding despite what the charts were saying. The rewards and staking algorithm was brilliant and personally, I make roughly \$40 worth of **\$PEPU** per day because of it. It's so worth it! What are you waiting for!? 🤔🤔🤔🐸

**\$PEPU** The burning mechanism is working properly!

808,502 already burned!! 🔥🔥

Monthly Burn=Daily Burn 30 x Assumptions:

Average Daily Transactions: 100,000

Burn Rate per Transaction: 0.01 **\$PEPU**

Daily Burn: 100,000 x 0.01 **PEPU** = 1,000 **\$PEPU**

Monthly Burn: 1,000 **\$PEPU** x 30 = 30,000 **\$PEPU**

You're tired of false projects, so join us, let's be stronger than them. Let's choose the projects ourselves in order to avoid fakes, the goal is simple: a person wants to put a project in place and show that it is not a fake, so he presents his project to us, we examine it, we validate it and in exchange we support him by participating in the launch.

## MISSION

Simple. To grow the PEPU Ecosystem and in turn grow the PEPU token price thru education and adoption. We will grow PEPU and boldly go where no token has gone before. The more PEPU holders, the bigger the market capitalization and the higher the PEPU token price (with deflationary Pump Pad burns occurring as well).

**Our niche is PEPU education.** This will include social media, newsletters, petitions, use of pump pad, investing & trading, documentation How-To's, Youtube video training and of course software / app development. We will collaborate with other PEPU projects and communities and build everyone up.

We will learn all we can day by day about the current and developing features of the PEPU L2 ecosystem (and it's Ethereum foundation) and build on top of it. We have a strong security core with Ethereum. Now we have speed, low cost and efficiency with PEPU on the Layer 2.

**We launched a token called YOTFB** on the first day the PEPU Pump Pad was launched. Those who wish to see this project grow and succeed can help support the effort by buying some of these YOTFB tokens. Project costs are small right now and involve domain registration fees, web hosting fees, purchased productivity apps. It's mostly time to research, gather, organize and develop the content and build apps. We will ensure our application development efforts can contribute to the cause and burn PEPU tokens in the process. PP Token creation is now burning PEPU, but the apps we develop can also do the same.

### In-App Wallets in Web3 Applications

An in-app wallet is a cryptocurrency wallet integrated directly into a Web3 application, allowing users to store, manage, and interact with their crypto assets without needing an external wallet like MetaMask or Ledger. These wallets streamline the user experience by providing seamless access to blockchain functionalities inside the app itself.

### How In-App Wallets Work

#### User Onboarding

Users can create a wallet within the app using their email, social login (Google, Apple), or a passwordless method like magic links.

The app often handles key management to make onboarding easier.

#### Key Management

Non-Custodial: Users retain full control over their private keys, often stored on the device or secured via MPC (Multi-Party Computation).

Custodial: The app or a third party manages the private keys for a smoother user experience.

#### Transaction Signing

Users can sign transactions directly within the app.

Gas fees may be abstracted or covered by the app (via meta-transactions).

#### Blockchain Interactions

The wallet enables users to buy, sell, stake, swap, or interact with smart contracts within the app. It may support multiple blockchains (Ethereum, Solana, PEPU Layer 2, etc.).

#### Benefits of In-App Wallets

- ✓ Seamless UX: No need for external wallet extensions or apps.
- ✓ Frictionless Transactions: Users can interact with dApps effortlessly.
- ✓ New User Friendly: Simplifies onboarding for non-crypto-savvy users.
- ✓ Cross-Platform: Works on web, mobile, or even embedded in games.
- ✓ Gas Abstraction: Some wallets cover transaction fees to improve usability.

### Examples of Web3 Apps Using In-App Wallets:

Coinbase Wallet SDK – Allows Web3 apps to integrate an embedded wallet.

Argent – A smart contract-based wallet with gas-free transactions.

Magic (ex-Fortmatic) – Enables login-based Web3 wallets.

Thirdweb Smart Wallet – For developers to embed Web3 wallets in dApps.

**PEPU Layer 2 Wallets – Could be integrated into projects on PEPU blockchain.**

**What is Pepe Unchained?**

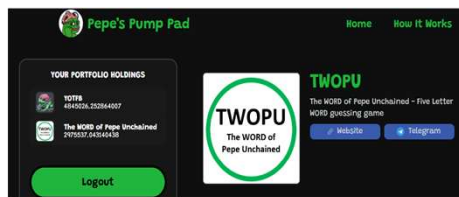

Pepe Unchained or SPEPU is a better version of the Original Pepe. It is not only a token, but a Meme Coin ecosystem. Pepe Unchained has collaborated with [Web3Toolkit](#) to build:

- Instant and low fee bridging between ETH and Pepe Chain
- Lowest transaction fees
- Instant transactions
- Higher Volume Capacity – 100x faster than ETH
- Dedicated Block explorer to see all transactions on Pepe Unchained Layer 2

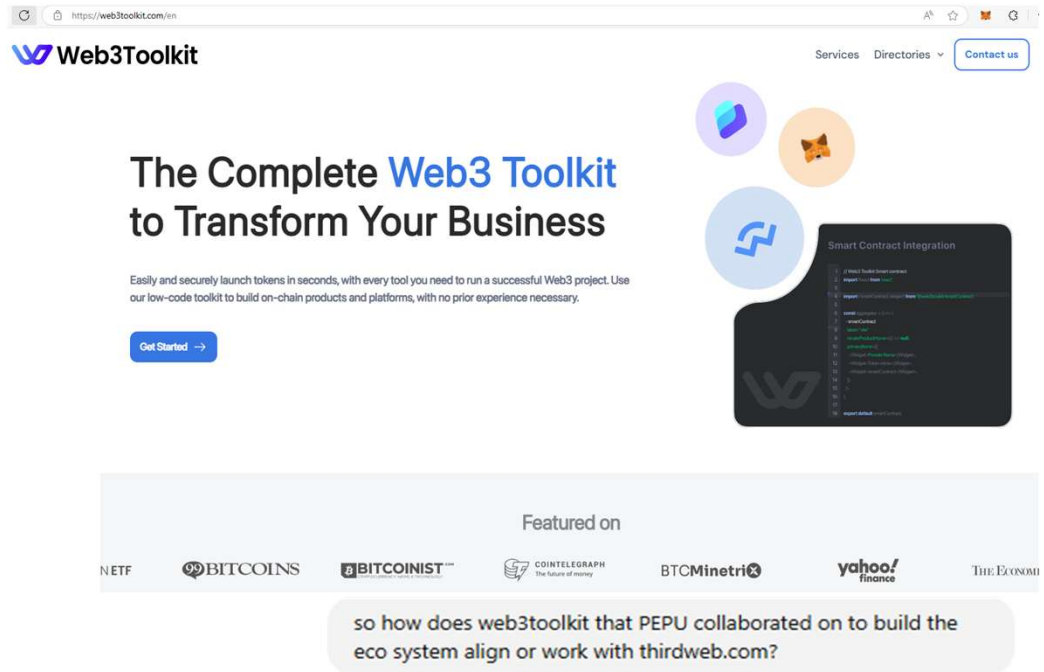

Here is where you go to find Thirdweb Developer documentation

<https://portal.thirdweb.com/>

## The PEPU Ecosystem was built with Web3Toolkit !!

so how does web3toolkit that PEPU collaborated on to build the eco system align or work with thirdweb.com?

The Web3 Toolkit that PEPU collaborated on is designed to support the Pepe Unchained (PEPU) Layer 2 blockchain ecosystem by offering tools for developers to build decentralized applications (dApps) efficiently. Thirdweb is a separate Web3 development platform that provides ready-made smart contracts, SDKs, and infrastructure to help developers deploy and manage blockchain-based applications.

Here's how these two might align or work together:

### 1. Smart Contract Deployment & Management

- Web3 Toolkit (PEPU):** Likely provides native smart contract templates, dev tools, and APIs specific to the PEPU Layer 2 chain.
- Thirdweb:** Offers a plug-and-play interface for deploying smart contracts, including ERC-20, ERC-721 (NFTs), and custom contracts. If PEPU integrates with Thirdweb, developers could use Thirdweb's contract UI to deploy and manage contracts on the PEPU network.

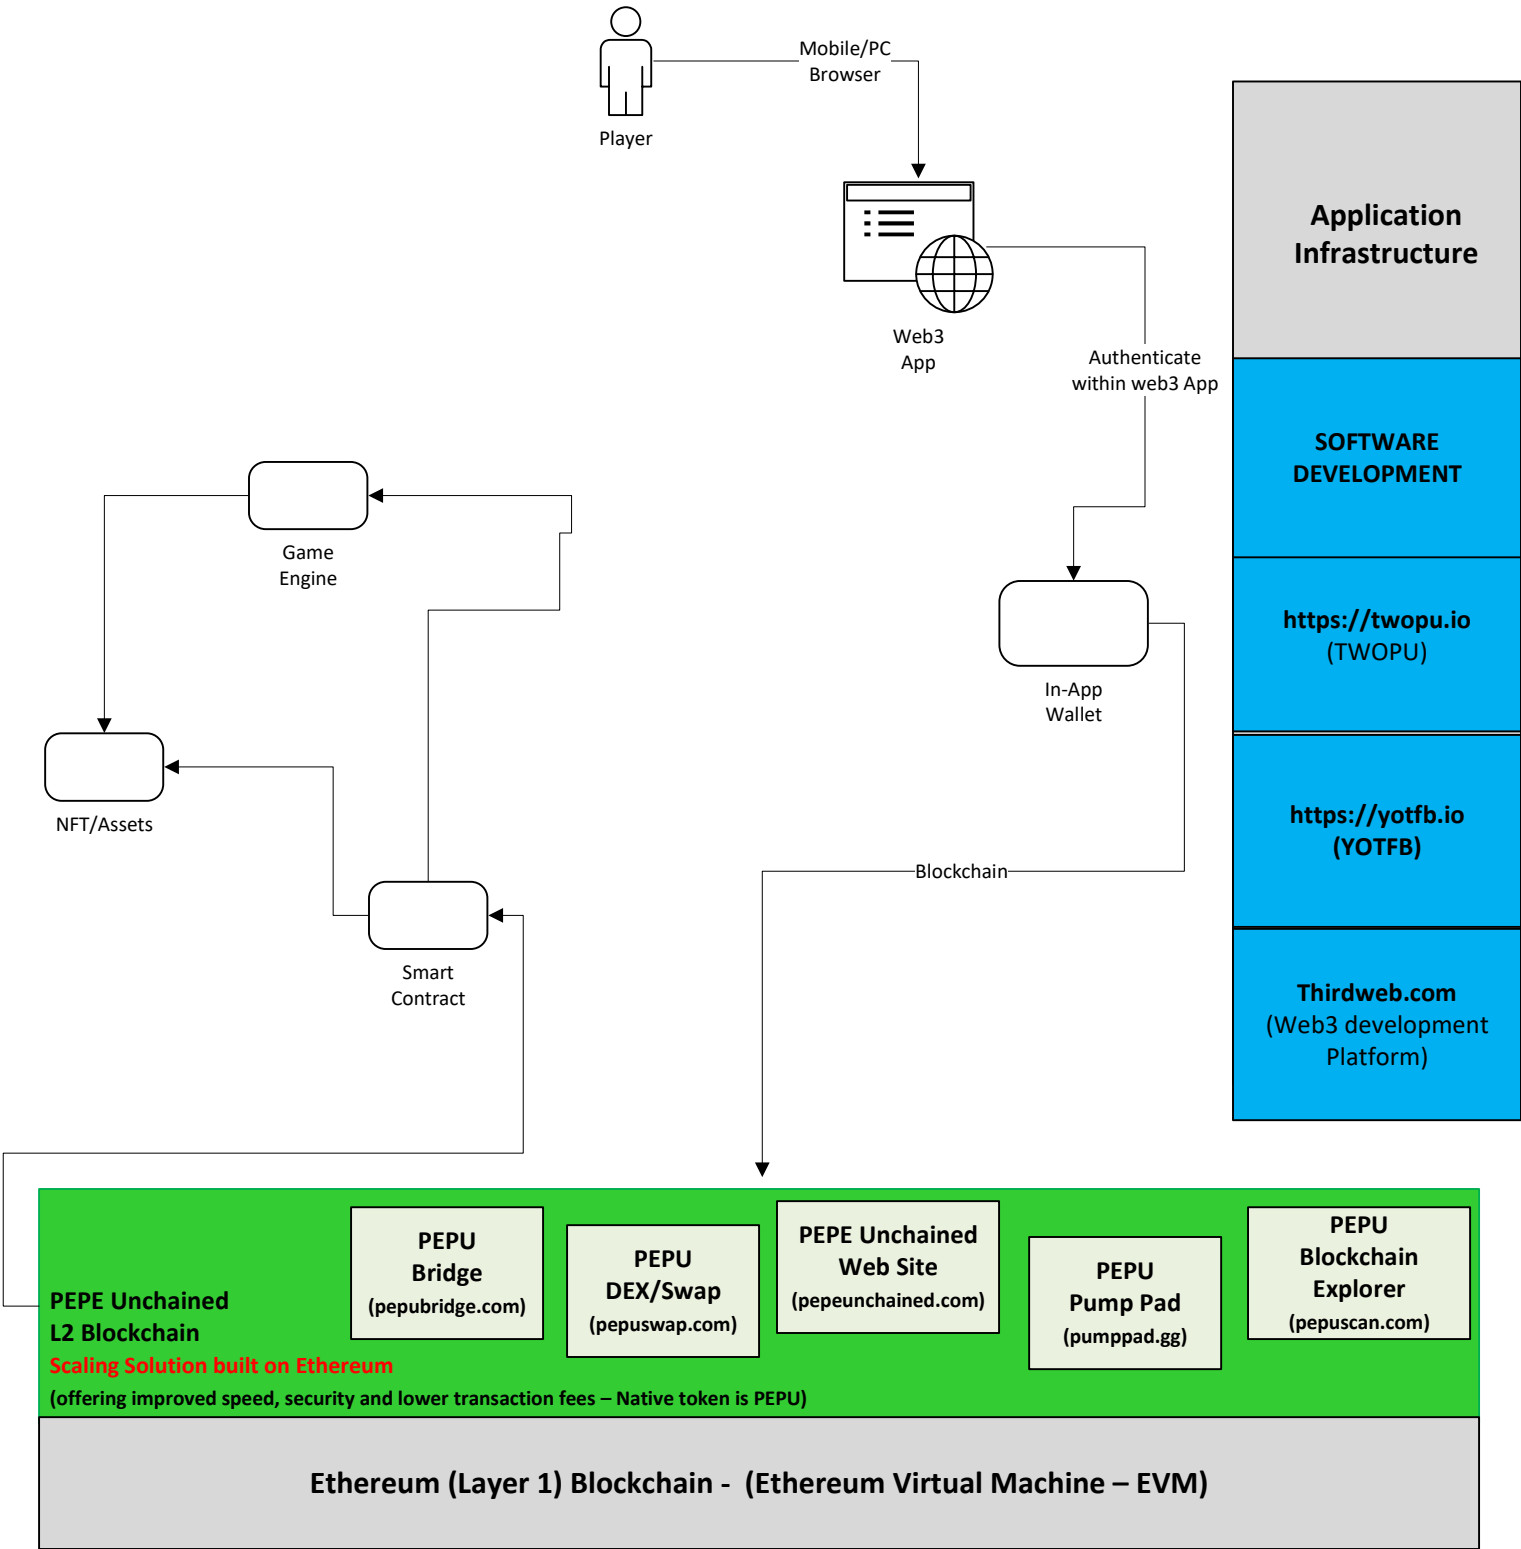

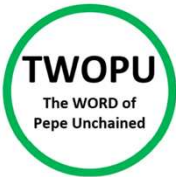

### 2. Developer Tools & SDKs

- Web3 Toolkit (PEPU):** May include native SDKs for PEPU-compatible dApp development, including wallet integration, Layer 2 scaling solutions, and gas-efficient transactions.
- Thirdweb:** Offers SDKs for React, JavaScript, Unity, Python, and more, which could be extended to support PEPU. If PEPU is officially supported, developers could use Thirdweb's SDK to interact with PEPU's smart contracts seamlessly.

### 3. Wallet Integration & Authentication

- Web3 Toolkit (PEPU):** Likely includes wallet tools tailored for PEPU transactions.
- Thirdweb:** Has a Wallet SDK that supports multiple wallets, such as MetaMask, WalletConnect, and Coinbase Wallet. If PEPU integrates with Thirdweb, dApps on PEPU could easily authenticate users using Thirdweb's wallet services.

|------------------------------------------------------|---------------------------------------------------------------------|----------------------------------------------------------|-----------|

We devote this section to the PEPU Pump Pad: <https://pumppad.gg> and the **YOTFB** token

Below we see the PEPE's Pump Pad. On March 3<sup>rd</sup>, 2025 when the pump pad first came online, we launched our very own token called: **YOTFB** - Dedicated to PEPU Ecosystem Education.

We gave it an image: ChatGPTgenerated image of a frog & brain and chained.  
 We gave it a token name: YOTFB  
 We gave it a description: Year of the Frog Brain – PEPU ecosystem education.  
 We gave it a web site address: <https://yotfb.io>

It did all the rest. Pretty amazing! Since that time, myself and others have been buying into YOTFB. **Our current market cap is: \$354.90**  
 From the screen clip below, it appears investors have spent 117,414 PEPU towards the 1,250,000 need to get the token bonded and released to the PEPU L2 DEX. As I understand it.

So the project has been underway for 42 days now and as we work the project, the MC has been slowly inching upwards. I have some edits I'd like to make to this PP token, but the devs do not prove that option? Would like to see:

1. Ability to edit the Token image. We don't always get it right the first time and need to make a change. I can image this requires some thought as you don't want scammers masking their identities, but there are honest people who need to make an honest edit.
2. Ability to edit the web site URL. I'm using <https://yotfb.io> - Right now I'm ok with this because I got it right. But I have another sub-project token called TWOPU – The WORD of Pepe Unchained, that was not entered or saved correctly and not working right. For instance, it currently points to the URL: <https://pumppad.gg/https://yotfb.io/twopu> and I can't change it to work correctly (<https://twopu.io>)
3. Ability to edit the description. At present, what I have works, but this would be nice if we need to enhance or tweak it.

The screenshot shows the Pepe's Pump Pad interface. At the top, there's a navigation bar with 'Home', 'How It Works', and 'Swap'. Below this, the 'YOUR PORTFOLIO HOLDINGS' section lists three tokens: YOTFB (9910837.479110502), The WORD of Pepe Unchained (3369049.8232047714), and Vitalik (293017.5671625083). A 'Logout' button is at the bottom of this section. The main area features a large image of a frog with a brain and chains, labeled 'YOTFB - Year of the Frog Brain - PEPU ecosystem education'. To the right, the token's details are shown: 117,414.23687 / 1,250,000.0 PEPU, a 9.39% increase, and its address, pair address, and market cap (\$354.9). Below this is a trading interface with 'Buy' and 'Sell' tabs. The 'Buy' tab is active, showing a balance of 0.19706397689684713 and a 'BUY' button. A candlestick chart is visible in the background, showing price movement over time.

We continue to buy our own YOTFB tokens. We are believe in the YOTFB Project. Were little, but bit by bit...
