EDITOR's DESK - The YOTFB Project. A crypto newsletter devoted to all things PEPU...

PEPU Army - It's another good day and welcome to the YOTFB newsletter. Ignore all the FUD and stay focused. Keep buying PEPU while the price is low, stake and hold. We have a great future with this coin and platform. Enjoy those rewards. We have a new email address: editor@yotfb.io - Please use this if you wish to contact YOTFB.

It's Thursday morning and we are into Day 11 of the PEPU Pump Pad outage. The Dev Team has posted some updates, but the community anxiously awaits it's return.

Been busy this week on our TWOPU (The WORD of PEPE Unchained) game project. Doing development work with html, css and javascript. We have a basic working game, but is only client-side at present. The backend is being built to accommodate react development. You can tune into the periodic updates at: <http://twopu.io/twopu-game> The game can be played on a computer or mobile phone (within a web browser).

This week we also made a formal request to the PEPU Dev Team and see if they are listening to the community and really taking action on these. We'll try to formalize it a bit and see how this goes. Another metric to assess community assurance the PEPU Dev Team is listening... We are watching and tracking any responses.

Message to the PEPU Dev Team:

Mod Request: YOTFB-250330-1 (PP Image)

Mod Request: YOTFB-250330-2 (PP url)

The number of petition signers is still at 128 as of today. Let's keep that going.

Another metric to assess community assurance the PEPU Dev Team is listening... We are watching and tracking your response. Don't disappoint us. YOTFB is tracking and reporting these. Message to the PEPU Dev Team; Mod Request: YOTFB-250330-1 (PP Image) Mod Request: YOTFB-250330-2 (PP url) Description: Allow pump pad token image (and url) within the PEPU Pump Pad to be updated before bonding. Problem Statement: Having launched a recent PP token called YOTFB and others in the past 2 months, The original image selected for the token needs to change to better reflect the project or purpose or brand. There is no such edit capability within the current pump pad to do so. Please fix this. Rationale and Risk: Legitimate project need to be flexible and adapt and will change over time. So there needs to be more edit capability and control over peop's tokens. Recognize there may be risk in fraudsters changing identity and that could get out of control. Compensating Controls: So there are some controls to consider or think about with this enhancement request. 1) First, only the owner of the wallet that created the token is allowed to edit the PP token image (and website URL). That's rather obvious. 2) Once the token is bonded, no further editing can take place. There's a point where it can't change. 3) Limit the editing to just once or twice or three times per the life of the token. Recognizing the need for change, but limiting it. Problem Examples: Created original image with chatgpt and have since redesigned our token image. See below. The website url entered isn't correct and is non-functional (See TWOPU token - it should go to the URL: https://twopu.io but doesn't. We have this image today: (frog) and want this: (circle with lettering). Thanks for your consideration. Hope your watching and listening.

The YOTFB Project (Year of the Frog Brain)	Web Site: https://yotfb.io	Section 3A YOTFB Roadmap	4/3/2025
We devote this section to theYOTFB Project Roadmap:			

MISSION

Simple. To grow the PEPU Ecosystem and in turn grow the PEPU token price thru education and adoption. We will grow PEPU and boldly go where no token has gone before. The more PEPU holders, the bigger the market capitalization and the higher the PEPU token price (with deflationary Pump Pad burns occurring as well).

Our niche is PEPU education. This will include social media, newsletters, petitions, use of pump pad, investing & trading, documentation How-To's, Youtube video training and of course software / app development. We will collaborate with other PEPU projects and communities and build everyone up.

We will learn all we can day by day about the current and developing features of the PEPU L2 ecosystem (and it's Ethereum foundation) and build on top of it. We have a strong security core with Ethereum. Now we have speed, low cost and efficiency with PEPU on the Layer 2.

We launched a token called YOTFB on the first day the PEPU Pump Pad was launched. Those who wish to see this project grow and succeed can help support the effort by buying some of these YOTFB tokens. Project costs are small right now and involve domain registration fees, web hosting fees, purchased productivity apps. It's mostly time to research, gather, organize and develop the content and build apps. We will ensure our application development efforts can contribute to the cause and burn PEPU tokens in the process. PP Token creation is now burning PEPU, but the apps we develop can also do the same.

ROADMAP

Phase 1: (2025 Q1) • Newsletter (Daily). • Social Media Site Setup. CoinmarketCap, X.com, Telegram, Youtube • Public Web Site Setup. • Launch YOTFB token on Pump Pad. • PEPU community engagement. • Learning the thirdweb dev platform. • Launch TWOPU token on Pump Pad for app project. • Launch DMARC token om Pump pad for app project.	Phase 2: (2025 - Q2/Q3) • Application launch DMARC app for domain-based Messaging, Authentication, Reporting & Conformance (email auth protocol) • Application launch 5-letter word game Web3 app on top of PEPU L2. • Continued Newsletter content development. • Develop YOTFB, TWOPU/DMARC tokens. • Youtube training videos.	Phase 3: (2025 - Q4) • Further TWOPU/DMARC application development and burn mechanisms. • Design next application design... • Development application development training and documentation.

In-App Wallets in Web3 Applications

An in-app wallet is a cryptocurrency wallet integrated directly into a Web3 application, allowing users to store, manage, and interact with their crypto assets without needing an external wallet like MetaMask or Ledger. These wallets streamline the user experience by providing seamless access to blockchain functionalities inside the app itself.

How In-App Wallets Work

User Onboarding

Users can create a wallet within the app using their email, social login (Google, Apple), or a passwordless method like magic links.

The app often handles key management to make onboarding easier.

Key Management

Non-Custodial: Users retain full control over their private keys, often stored on the device or secured via MPC (Multi-Party Computation).

Custodial: The app or a third party manages the private keys for a smoother user experience.

Transaction Signing

Users can sign transactions directly within the app.

Gas fees may be abstracted or covered by the app (via meta-transactions).

Blockchain Interactions

The wallet enables users to buy, sell, stake, swap, or interact with smart contracts within the app. It may support multiple blockchains (Ethereum, Solana, PEPU Layer 2, etc.).

Benefits of In-App Wallets

- ✓ Seamless UX: No need for external wallet extensions or apps.
- ✓ Frictionless Transactions: Users can interact with dApps effortlessly.
- ✓ New User Friendly: Simplifies onboarding for non-crypto-savvy users.
- ✓ Cross-Platform: Works on web, mobile, or even embedded in games.
- ✓ Gas Abstraction: Some wallets cover transaction fees to improve usability.

Examples of Web3 Apps Using In-App Wallets:

Coinbase Wallet SDK – Allows Web3 apps to integrate an embedded wallet.

Argent – A smart contract-based wallet with gas-free transactions.

Magic (ex-Fortmatic) – Enables login-based Web3 wallets.

Thirdweb Smart Wallet – For developers to embed Web3 wallets in dApps.

PEPU Layer 2 Wallets – Could be integrated into projects on PEPU blockchain.

What is Pepe Unchained?

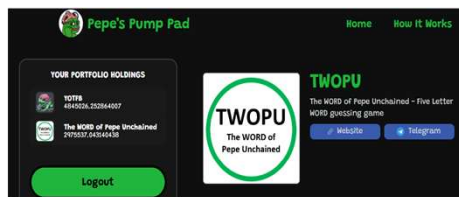

Pepe Unchained or SPEPU is a better version of the Original Pepe. It is not only a token, but a Meme Coin ecosystem. Pepe Unchained has collaborated with [Web3Toolkit](#) to build:

- Instant and low fee bridging between ETH and Pepe Chain
- Lowest transaction fees
- Instant transactions
- Higher Volume Capacity – 100x faster than ETH
- Dedicated Block explorer to see all transactions on Pepe Unchained Layer 2

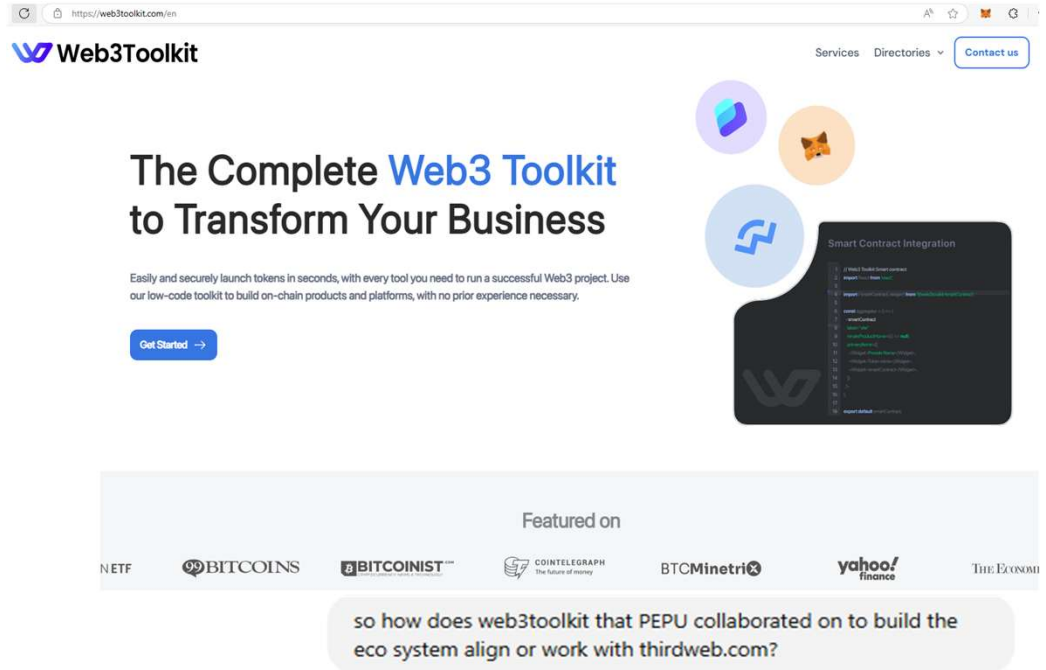

Here is where you go to find Thirdweb Developer documentation

<https://portal.thirdweb.com/>

The PEPU Ecosystem was built with Web3Toolkit !!

so how does web3toolkit that PEPU collaborated on to build the eco system align or work with thirdweb.com?

The Web3 Toolkit that PEPU collaborated on is designed to support the Pepe Unchained (PEPU) Layer 2 blockchain ecosystem by offering tools for developers to build decentralized applications (dApps) efficiently. Thirdweb is a separate Web3 development platform that provides ready-made smart contracts, SDKs, and infrastructure to help developers deploy and manage blockchain-based applications.

Here's how these two might align or work together:

1. Smart Contract Deployment & Management

- Web3 Toolkit (PEPU):** Likely provides native smart contract templates, dev tools, and APIs specific to the PEPU Layer 2 chain.
- Thirdweb:** Offers a plug-and-play interface for deploying smart contracts, including ERC-20, ERC-721 (NFTs), and custom contracts. If PEPU integrates with Thirdweb, developers could use Thirdweb's contract UI to deploy and manage contracts on the PEPU network.

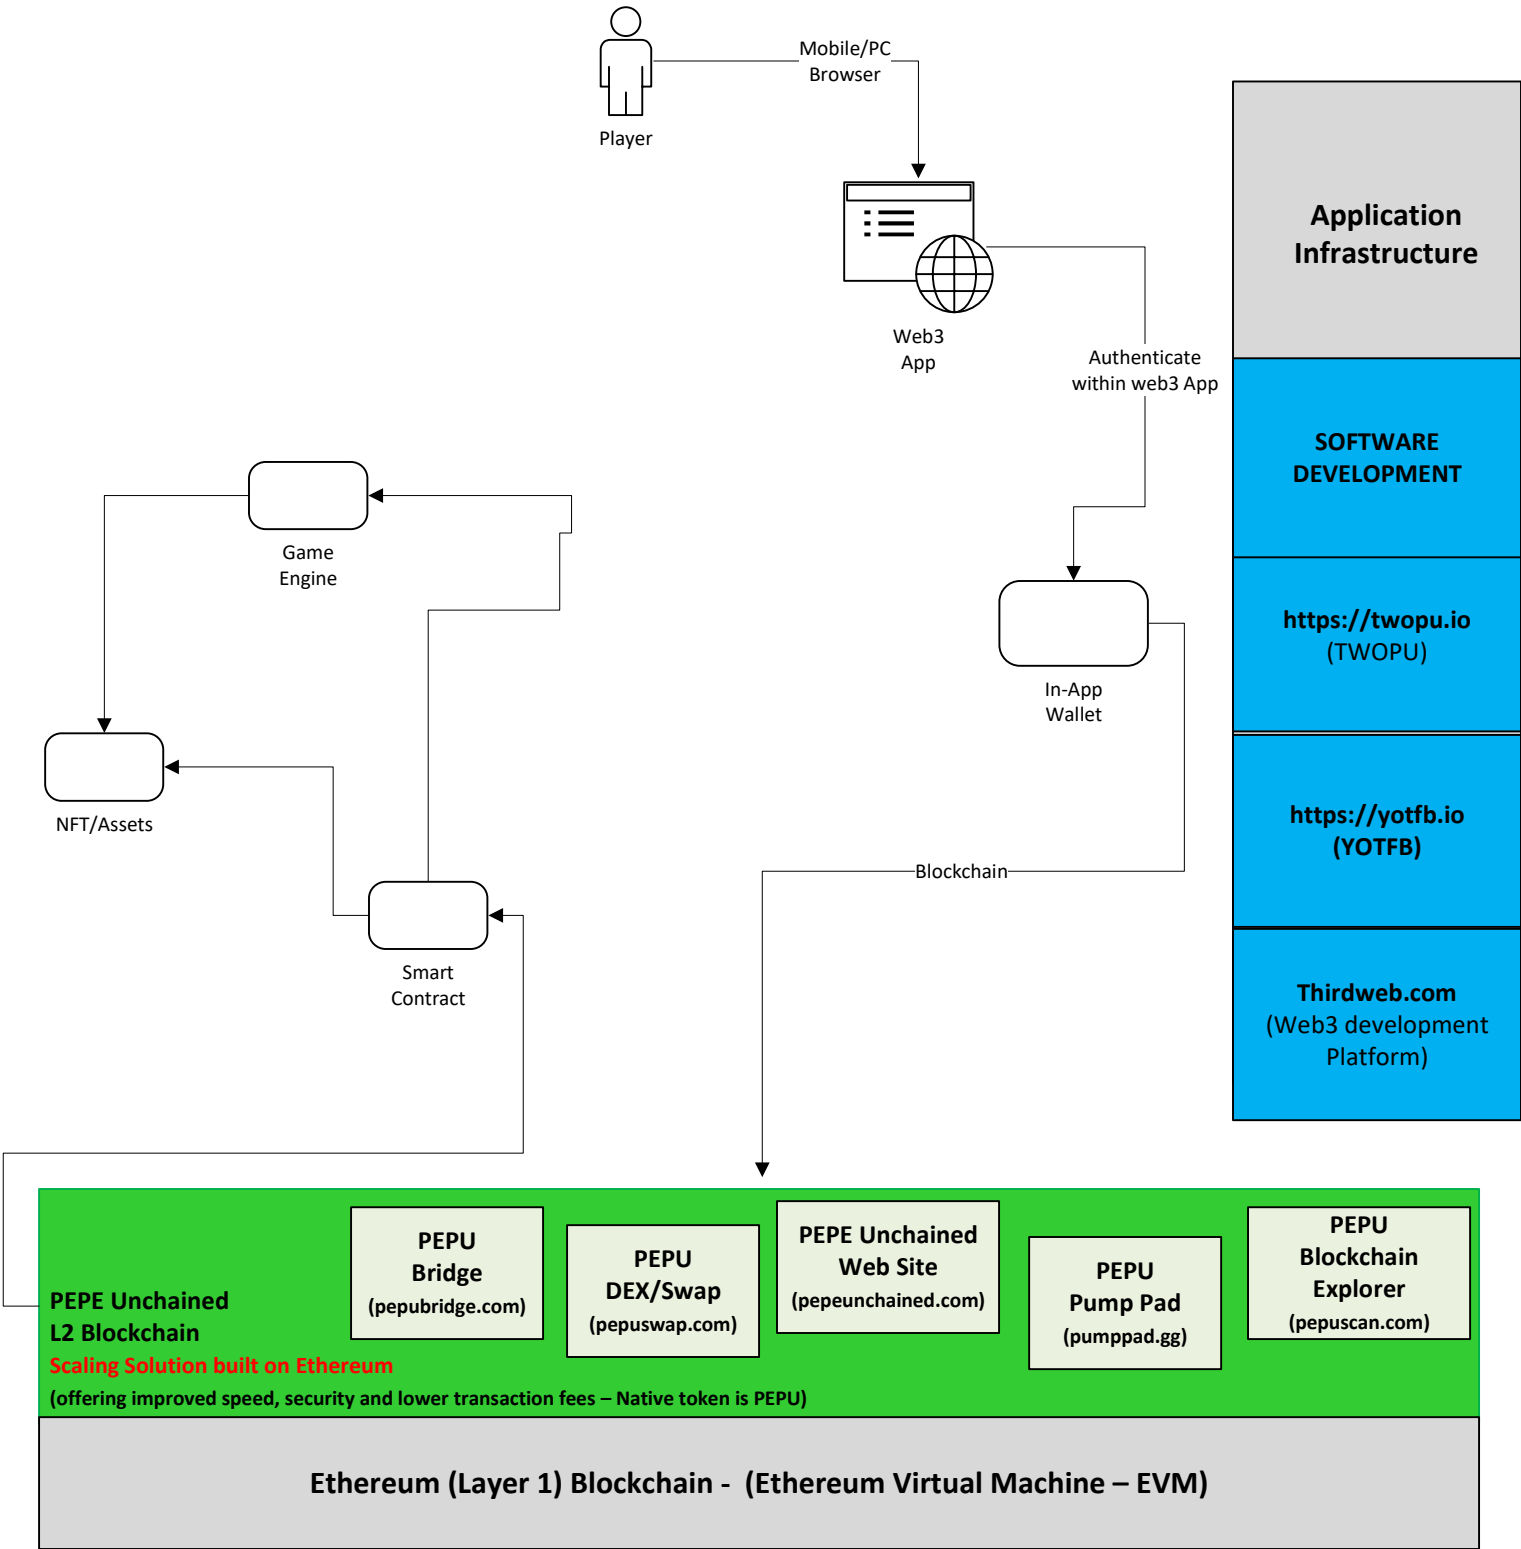

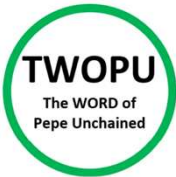

2. Developer Tools & SDKs

- Web3 Toolkit (PEPU):** May include native SDKs for PEPU-compatible dApp development, including wallet integration, Layer 2 scaling solutions, and gas-efficient transactions.
- Thirdweb:** Offers SDKs for React, JavaScript, Unity, Python, and more, which could be extended to support PEPU. If PEPU is officially supported, developers could use Thirdweb's SDK to interact with PEPU's smart contracts seamlessly.

3. Wallet Integration & Authentication

- Web3 Toolkit (PEPU):** Likely includes wallet tools tailored for PEPU transactions.
- Thirdweb:** Has a Wallet SDK that supports multiple wallets, such as MetaMask, WalletConnect, and Coinbase Wallet. If PEPU integrates with Thirdweb, dApps on PEPU could easily authenticate users using Thirdweb's wallet services.

The YOTFB Project (Year of the Frog Brain)	Web Site: https://yotfb.io	Section 6B PEPU Pump Pad – Our own YOTFB Token	4/3/2025
--	---	--	----------

We devote this section to the PEPU Pump Pad: <https://pumppad.gg> and the **YOTFB** token

Below we see the PEPE's Pump Pad. On March 3rd, 2025 when the pump pad first came online, we launched our very own token called: **YOTFB** - Dedicated to PEPU Ecosystem Education.

We gave it an image: ChatGPTgenerated image of a frog & brain and chained.
 We gave it a token name: YOTFB
 We gave it a description: Year of the Frog Brain – PEPU ecosystem education.
 We gave it a web site address: <https://yotfb.io>

It did all the rest. Pretty amazing! Since that time, myself and others have been buying into YOTFB. **Our current market cap is: \$354.90**
 From the screen clip below, it appears investors have spent 117,414 PEPU towards the 1,250,000 need to get the token bonded and released to the PEPU L2 DEX. As I understand it.

So the project has been underway for 42 days now and as we work the project, the MC has been slowly inching upwards. I have some edits I'd like to make to this PP token, but the devs do not prove that option? Would like to see:

1. Ability to edit the Token image. We don't always get it right the first time and need to make a change. I can image this requires some thought as you don't want scammers masking their identities, but there are honest people who need to make an honest edit.
2. Ability to edit the web site URL. I'm using <https://yotfb.io> - Right now I'm ok with this because I got it right. But I have another sub-project token called TWOPU – The WORD of Pepe Unchained, that was not entered or saved correctly and not working right. For instance, it currently points to the URL: <https://pumppad.gg/https://yotfb.io/twopu> and I can't change it to work correctly (<https://twopu.io>)
3. Ability to edit the description. At present, what I have works, but this would be nice if we need to enhance or tweak it.

<https://pumppad.gg/0x53180de8a02969a8f416526b12d50128d9bbc3f6>

The screenshot shows the 'Pepe's Pump Pad' interface. At the top, there's a navigation bar with 'Home', 'How It Works', and 'Swap'. Below this, the 'YOUR PORTFOLIO HOLDINGS' section lists three tokens: YOTFB (9910837.479110502), The WORD of Pepe Unchained (3369049.8232047714), and Vitalik (293017.5671625083). A 'Logout' button is at the bottom of this section. To the right, the 'YOTFB' token details are shown, including its description 'Year of the Frog Brain - PEPU ecosystem education', a 'Website' link, and its current market cap of 117,414.23687 / 1,250,000.0 PEPU, with a 9.39% change. Below the token details is a trading chart with 'Indicators', '1M 15M 1H 4H 1D', and 'Candles' tabs. The chart shows a price trend with a red arrow pointing to a specific point. On the right side of the chart, there's a 'Buy' and 'Sell' section. The 'Buy' section shows 'You pay' as 'Balance 0.19706397689684713' and 'You Receive' as 'YOTFB'. A 'BUY' button is at the bottom of this section.

We continue to buy our own YOTFB tokens. We are believe in the YOTFB Project. Were little, but bit by bit...
