EDITOR'S DESK - The YOTFB Project. A daily newsletter devoted to all things PEPU...

PEPU Army - Good day and welcome to the YOTFB newsletter. Ignore all the FUD and stay focused. Keep buying PEPU while the price is low, stake and hold. We have a great future with this coin and platform. We have a new email address: editor@yotfb.io - Please use this if you wish to reach me and I'll be happy to respond. If you have any ideas on this newsletter, PLEASE let me know. I'd like to feature more PEPU projects and help you get those projects moving... I don't charge a thing. If you want to buy our YOTFB token to support the newsletter, that would be awesome (but optional).

Reader Suggestions:

Shoutout to Carlos Mejia on Telegram who suggested adding the PEPU burn count to the newsletter stats. That's now at the top of page and in our timeline details as well as the 10-day stats and timeline page. This can be viewed directly on [pepuscan](https://pepuscan.com/address/0x90D4bcc137B38ec268880Fd739005831f8177Bec) at:

Well, if any of you watched last night's State of the Union address by President Trump, you'll know he didn't specifically mention crypto. Not a bad thing, just didn't come up in his historic and lengthy speech. We will continue to monitor the Strategic Crypto Reserve news and report on what we hear. Early this week, Trump announced the formation of a crypto reserve containing: BTC, ETH, XPR, SOL and ADA and also a Crypto Summit to be held on Friday March 7th. So stay tuned for that.

The volume of token created on the pumppad, PEPU wallet addresses, completed transactions are all increasing day over day. Now that we are watching the burn count and showing value based on the daily price of PEPU, we'll see how that progresses. This is all positive. Ignore the prices and keep claiming and staking those rewards.

Our online petition requesting BINANCE and COINBASE list PEPU continues to steadily grow. We are up to 117 signatures as of today. Let's keep pumping and pushing the petition. The Petition URL is: chng.it/M2LXyyH2v4 (change.org)

We are still working on the website <https://yotfb.io> setup with Google Analytics to begin reporting on site activity and help position to measure our growth. It may take a day or two to accumulate some data to present.

We devote this section to the YOTFB Project Roadmap:			

MISSION

Simple. To grow the PEPU Ecosystem and in turn grow the PEPU token price thru education and adoption. We will grow PEPU and boldly go where no token has gone before. The more PEPU holders, the bigger the market capitalization and the higher the PEPU token price (with deflationary Pump Pad burns occurring as well).

Our niche is PEPU education. This will include social media, newsletters, petitions, use of pump pad, investing & trading, documentation How-To's, Youtube video training and of course software / app development. We will collaborate with other PEPU projects and communities and build everyone up.

We will learn all we can day by day about the current and developing features of the PEPU L2 ecosystem (and it's Ethereum foundation) and build on top of it. We have a strong security core with Ethereum. Now we have speed, low cost and efficiency with PEPU on the Layer 2.

We launched a token called YOTFB on the first day the PEPU Pump Pad was launched. Those who wish to see this project grow and succeed can help support the effort by buying some of these YOTFB tokens. Project costs are small right now and involve domain registration fees, web hosting fees, purchased productivity apps. It's mostly time to research, gather, organize and develop the content and build apps. We will ensure our application development efforts can contribute to the cause and burn PEPU tokens in the process. PP Token creation is now burning PEPU, but the apps we develop can also do the same.

ROADMAP

Phase 1: (2025 Q1) • Newsletter (Daily). • Social Media Site Setup. CoinmarketCap, X.com, Telegram, Youtube • Public Web Site Setup. • Launch YOTFB token on Pump Pad. • PEPU community engagement. • Learning the thirdweb dev platform. • Launch TWOPU token on Pump Pad for app project.	Phase 2: (2025 - Q2/Q3) • Application launch 5-letter word game Web3 app on top of PEPU L2. • Continued Newsletter content development. • Develop YOTFB, TWOPU tokens. • Youtube training videos.	Phase 3: (2025 - Q4) • Further TWOPU application development and burn mechanism. • Design next application design... • Development application development training and documentation.

In-App Wallets in Web3 Applications

An in-app wallet is a cryptocurrency wallet integrated directly into a Web3 application, allowing users to store, manage, and interact with their crypto assets without needing an external wallet like MetaMask or Ledger. These wallets streamline the user experience by providing seamless access to blockchain functionalities inside the app itself.

How In-App Wallets Work

User Onboarding

Users can create a wallet within the app using their email, social login (Google, Apple), or a passwordless method like magic links.

The app often handles key management to make onboarding easier.

Key Management

Non-Custodial: Users retain full control over their private keys, often stored on the device or secured via MPC (Multi-Party Computation).

Custodial: The app or a third party manages the private keys for a smoother user experience.

Transaction Signing

Users can sign transactions directly within the app.

Gas fees may be abstracted or covered by the app (via meta-transactions).

Blockchain Interactions

The wallet enables users to buy, sell, stake, swap, or interact with smart contracts within the app. It may support multiple blockchains (Ethereum, Solana, PEPU Layer 2, etc.).

Benefits of In-App Wallets

- ✓ Seamless UX: No need for external wallet extensions or apps.
- ✓ Frictionless Transactions: Users can interact with dApps effortlessly.
- ✓ New User Friendly: Simplifies onboarding for non-crypto-savvy users.
- ✓ Cross-Platform: Works on web, mobile, or even embedded in games.
- ✓ Gas Abstraction: Some wallets cover transaction fees to improve usability.

Examples of Web3 Apps Using In-App Wallets:

Coinbase Wallet SDK – Allows Web3 apps to integrate an embedded wallet.

Argent – A smart contract-based wallet with gas-free transactions.

Magic (ex-Fortmatic) – Enables login-based Web3 wallets.

Thirdweb Smart Wallet – For developers to embed Web3 wallets in dApps.

PEPU Layer 2 Wallets – Could be integrated into projects on PEPU blockchain.

What is Pepe Unchained?

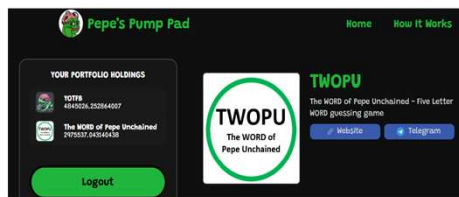

Pepe Unchained or SPEPU is a better version of the Original Pepe. It is not only a token, but a Meme Coin ecosystem. Pepe Unchained has collaborated with [Web3Toolkit](#) to build:

- Instant and low fee bridging between ETH and Pepe Chain
- Lowest transaction fees
- Instant transactions
- Higher Volume Capacity – 100x faster than ETH
- Dedicated Block explorer to see all transactions on Pepe Unchained Layer 2

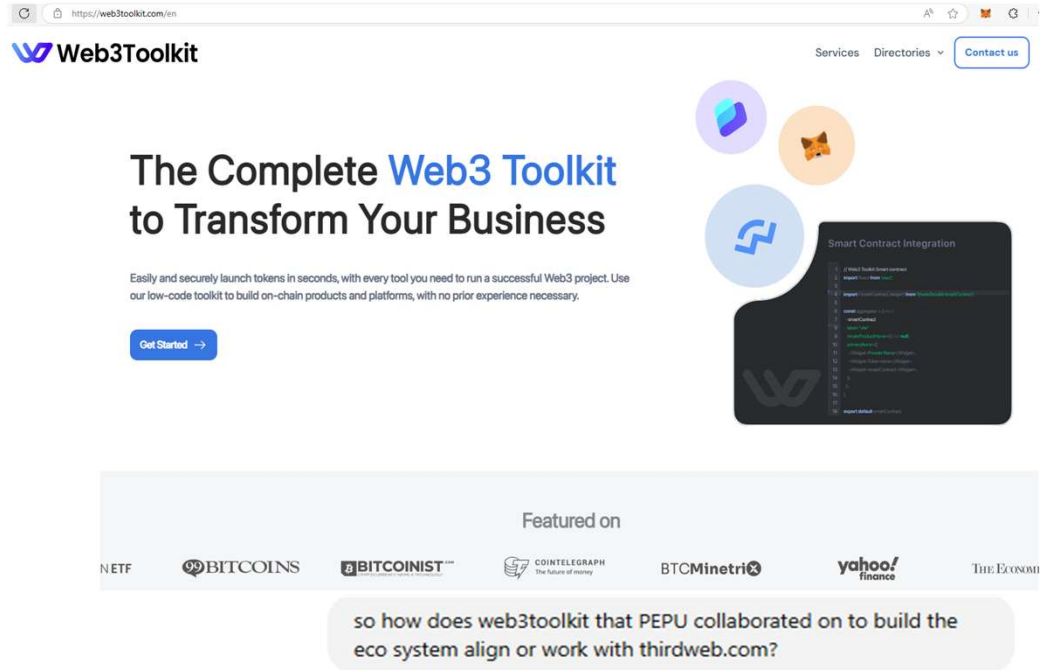

Here is where you go to find Thirdweb Developer documentation

<https://portal.thirdweb.com/>

The PEPU Ecosystem was built with Web3Toolkit !!

The Web3 Toolkit that PEPU collaborated on is designed to support the Pepe Unchained (PEPU) Layer 2 blockchain ecosystem by offering tools for developers to build decentralized applications (dApps) efficiently. Thirdweb is a separate Web3 development platform that provides ready-made smart contracts, SDKs, and infrastructure to help developers deploy and manage blockchain-based applications.

Here's how these two might align or work together:

1. Smart Contract Deployment & Management

- Web3 Toolkit (PEPU):** Likely provides native smart contract templates, dev tools, and APIs specific to the PEPU Layer 2 chain.
- Thirdweb:** Offers a plug-and-play interface for deploying smart contracts, including ERC-20, ERC-721 (NFTs), and custom contracts. If PEPU integrates with Thirdweb, developers could use Thirdweb's contract UI to deploy and manage contracts on the PEPU network.

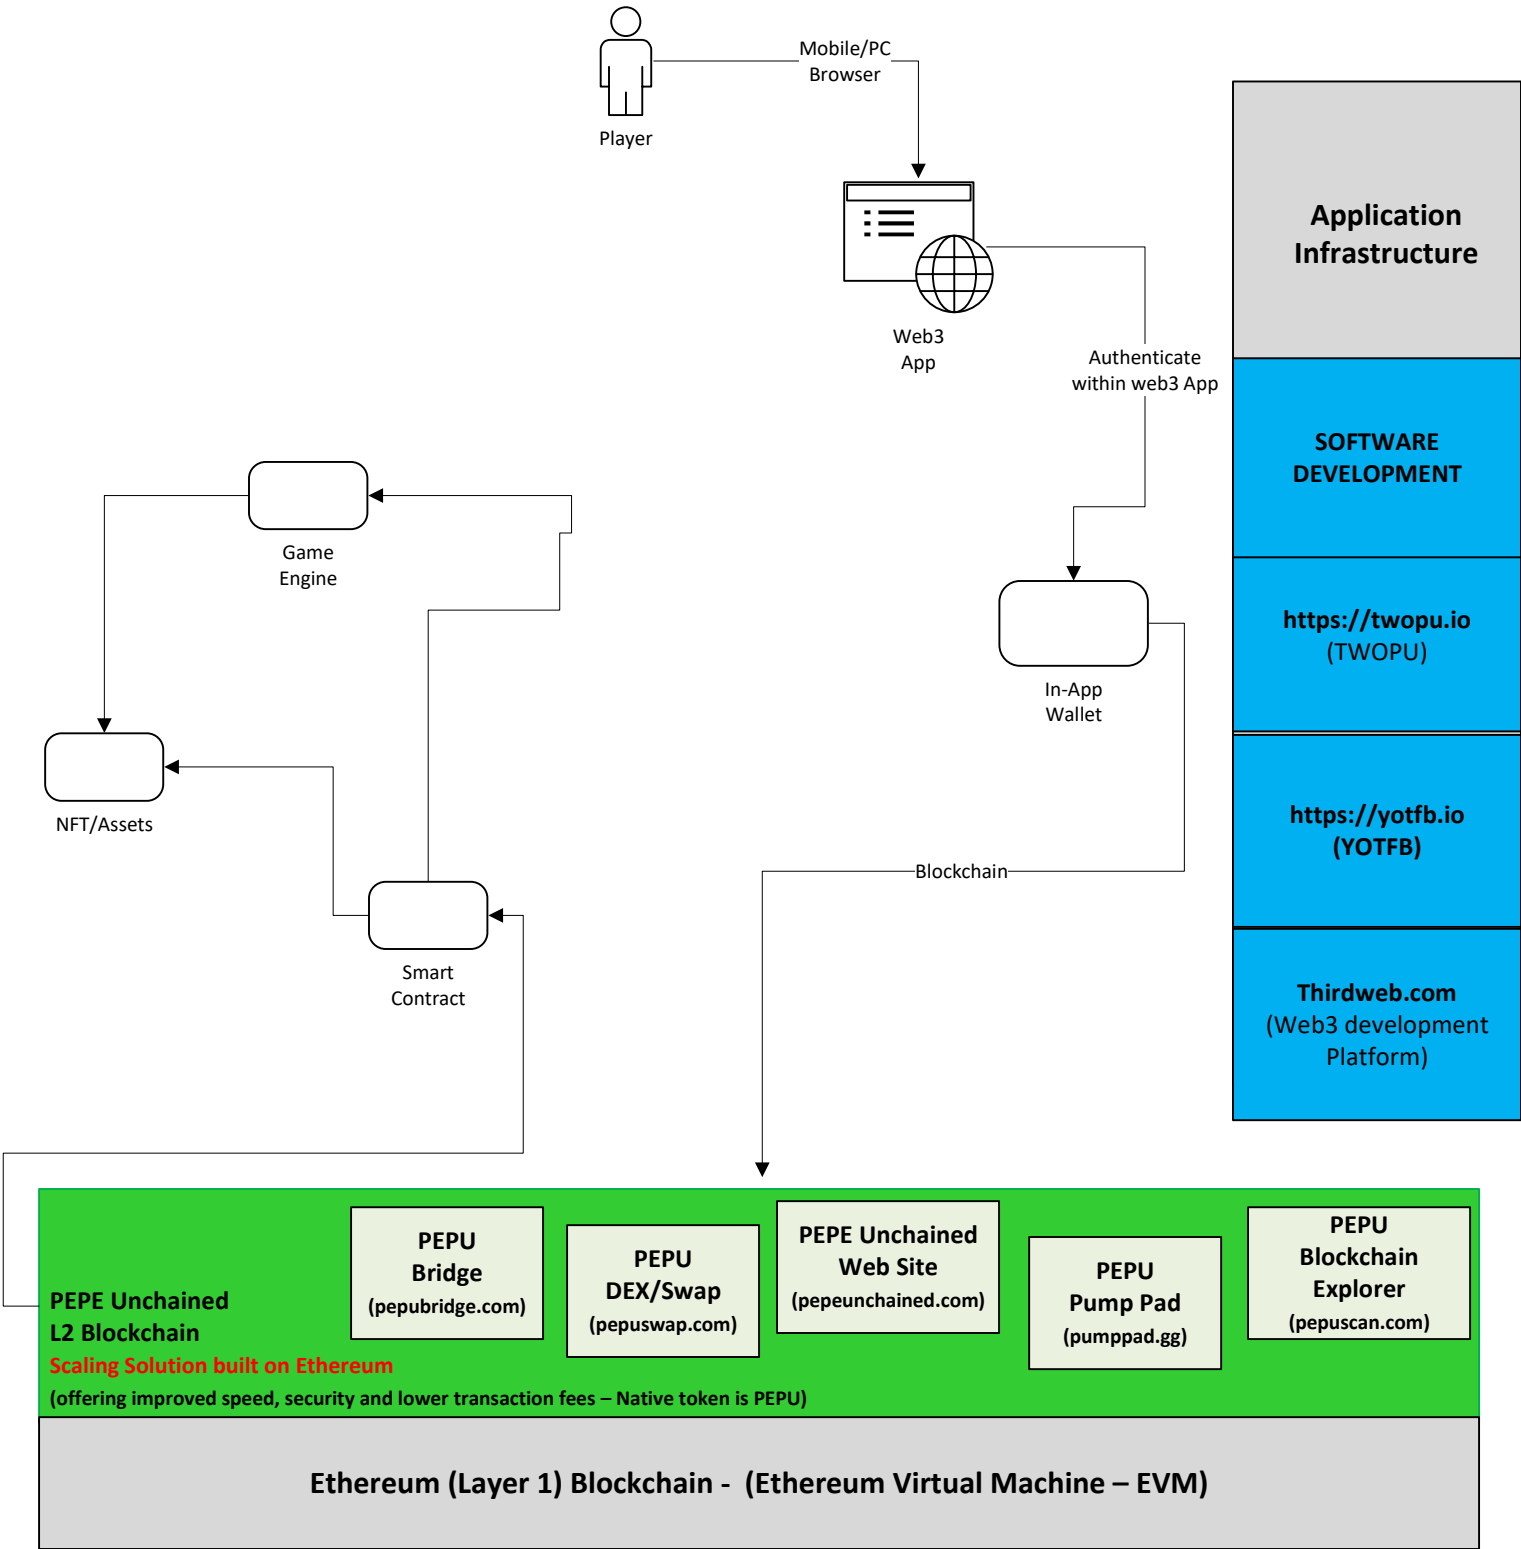

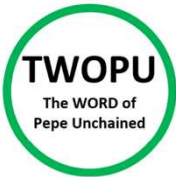

2. Developer Tools & SDKs

- Web3 Toolkit (PEPU):** May include native SDKs for PEPU-compatible dApp development, including wallet integration, Layer 2 scaling solutions, and gas-efficient transactions.
- Thirdweb:** Offers SDKs for React, JavaScript, Unity, Python, and more, which could be extended to support PEPU. If PEPU is officially supported, developers could use Thirdweb's SDK to interact with PEPU's smart contracts seamlessly.

3. Wallet Integration & Authentication

- Web3 Toolkit (PEPU):** Likely includes wallet tools tailored for PEPU transactions.
- Thirdweb:** Has a Wallet SDK that supports multiple wallets, such as MetaMask, WalletConnect, and Coinbase Wallet. If PEPU integrates with Thirdweb, dApps on PEPU could easily authenticate users using Thirdweb's wallet services.
