THE LAYZE WAY

Welcome into the new era of luxurious outdoor living, and relaxation. From the Sunshine State, where the uninhibited beauty of the tropical landscapes meets modern art and architecture, comes **Layze Systems™** – a company fully dedicated to transcending your outdoor leisure experience with its revolutionary new modular systems inspired by the marine technology, contemporary design and the passionate outdoor lifestyle of South Florida.

After a decade of engineering and fine-tuning led by the company's founder, Orlando (Orly) Gonzalez and co-founder, Alvaro Cordovez, **Layze Systems™** has finally unveiled its new and unique way to build lavish, fully customizable outdoor living spaces. By integrating the versatility of modular assembly with the elegance of modern design, **Layze Systems™** has put together the ideal shade and comfort collection for your every outdoor need, complete with incredible structural flexibility and exemplary use of materials that can accommodate any setting of your desire.

Layze Systems™ is proud to be the world's first manufacturer of fully-modular, **Miami-Dade NOA-Certified** awnings and terrace canopies that are both patented and made in the USA. **Layze Systems™** available products currently include a variety of modular canopy systems and luxury cabanas, while our future (soon to be available) products include modular awnings, interior/exterior railings, blinds, sunshades and furniture. With every new creative mind joining on board the company, **Layze Systems™** is constantly growing its line of products and expanding its reach to new customers around the globe, thus enabling everyone to discover a new level of comfort and style through the state-of-the-arts modular outdoor-living systems.

MIAMI-DADE N.O.A.

UP TO 105 MPH WIND RESISTANCE

The Miami-Dade Notice of Acceptance (NOA) is a product approval certification designed to assure that a product has been reviewed by structural engineers for impact and wind resistance and was found to meet the code criteria in the High Velocity Hurricane Zone (HVHZ).

Layze Systems is a proud member of The American Institute of Architects (AIA) - aiming to support architects and their projects with an array of innovative modular solutions.

N.O.A. CERTIFIED PRODUCTS:

Luxur Canopy and **SlimLite** Awning concepts were first introduced by **Easy Awnings Systems Inc.** (now known as **Layze Systems™**) in 2012. Since then, these state-of-the-art modular designs are the only fully-modular shade systems that have been granted a Miami-Dade NOA product certification for proving to offer unparalleled resilience in an event of a major storm or hurricane. While both **Luxur** and **SlimLite** can be customized to meet virtually any size and slope desired, the following assembly guidelines must be observed in order to fully comply with the product's NOA criteria.

N.O.A. COMPLIANCE REQUIREMENTS FOR SLIMLITE AWNING:

N.O.A. CERTIFICATION #: 16-1208.02

- Awning must be fastened directly onto the main building structure.
- Max. building height to which awning can be fastened to: **60 ft (18.30 m)**
- Max. awning projection from building wall: **4 ft (1.20 m)**
- Min. awning roof slope: **27° degrees**
- Fabric panels shall be removed in the event of winds over **105 mph (170 km/h)**

N.O.A. COMPLIANCE REQUIREMENTS FOR LUXUR CANOPY:

N.O.A. CERTIFICATION #: 16-1208.03

- Canopy must be fastened directly onto the main building structure.
- Maximum building height to which canopy can be fastened to: **60 ft (18.30 m)**
- Canopy total projection from building wall: **14 ft (4.25 m)**
- Max. span from building wall to canopy posts: **12 ft (3.65 m)**
- Min. canopy roof slope: **7° degrees**
- Max. spacing between canopy posts: **7 ft (2.15 m)**
- Max. height of canopy posts: **8'-8" (2.60 m)**
- Fabric panels shall be removed in the event of winds over **105 mph (170 km/h)**

THE ADVANTAGES OF MODULAR DESIGN

DESIGN FLEXIBILITY

With the versatility of our modular systems and a wide array of materials and colors to choose from, you get unlimited customization options and the ability to build your ideal design in just minutes. Our modular installations can be easily and seamlessly adjusted to fit any unique space by extending or reducing the panels and modular components.

FAST AND EASY ASSEMBLY

Layze Systems™ products are made to be easily installed and adjusted to any size needed without frame welding, heavy lifting or canvas stretching. Extensive testing has proven that our modular systems are easy to work with, so much that virtually anyone with basic home tools and experience can assemble them.

CONTEMPORARY LOOK

While providing hundreds of customization options, all **Layze Systems™** products maintain a unified visually impacting style that is attributed to the minimalist stream-line approach that goes into designing fully modular systems. Our products attune to all modern architecture styles and also give an avant-garde twist to more traditional structures.

COST AND ENERGY EFFICIENT

Layze Systems™ products are engineered to consume less energy and produce virtually no waste during the process of their manufacturing, while maintaining their superb quality and durability. Any scraps or cut-off pieces are recycled, thus making our modular outdoor products environmentally friendlier than other custom made installations.

AFFORDABLE LUXURY

Thanks to the cost effective manufacturing process of our modular products, we were able to upgrade to using superior quality materials, thus adding structural integrity while maintaining competitive market prices.

PORTABLE AND SPACE EFFICIENT

- Take your investment with you when you move. Our modular structures can be dismantled just as easy as they are assembled, and arranged in a way that is easy to load and transport.
- Since our modular products are comprised primarily of aluminum extrusions and connectors, our distributors can store more value while using less inventory space.

MODULAR TERRACE SYSTEMS

WIND RESISTANT

UV PROTECTION

WATER PROOF

USA PATENT

PERGOLEAN

FREE-STANDING MODULAR TERRACE SYSTEM

PergoLean is a beautifully balanced free-standing canopy with a sloped (shed style) roof, that is ideal for outdoor spaces where a canopy cannot be mounted directly onto a building structure. This modular pergola creates an inviting shaded enclosure that can be easily adjusted to fit any occasion and setting.

PAVILIA

FREE STANDING GABLE ROOF TERRACE SYSTEM

USA PATENT

WIND RESISTANT

UV PROTECTION

WATER PROOF

Expand the patio of your restaurant, hotel entrance or your home's backyard with the incredibly versatile free-standing terrace canopy - **Pavilia**. This contemporary rendition of a traditional gable roof structure will transform any outdoor area into the perfect space for large outdoor events, family gatherings and parties.

THE 5" POSTS

All **Layze Systems™** terrace and cabana installations come with 3" standard posts. However, with our 5" posts, **Layze Systems™** lets you create a prominent and stately look while adding fortitude to the structure.

METAL DECO PANELS

ARCHISOL - FABROC PANELS

ARCHISOL - BRISE-SOLEIL PANELS

ARCHISOL

MODULAR AWNING SYSTEM

USA PATENT

Slim and slim, the **Archisol** was designed to meet the appeal of modern architecture with its light yet extremely durable structure, while offering a pleasant partial shaded and a facade enhancement for both residential and commercial structures.

THE CANTILUX AWNING

CANTILUX WITH FABRIC PANELS

WIND RESISTANT

UV PROTECTION

WATER PROOF

USA PATENT

CANTILUX

MODULAR CANTILEVERED AWNING

Cantilux is a perfect balance of architectural strength and elegance. This cantilevered awning system is designed to offer a greater coverage area while ensuring structural stability and weather resilience. **Cantilux** supports up to 10ft. projection from the building and with endless configuration and color options, this modular awning truly the ideal shade solution for residential patios, commercial plazas, restaurants, hotels and more.

CANTILUX BRISE-SOLEIL (TRELLIS)

LAYZE RAILINGS

Simple to customize and assemble - **Layze Systems™** provides you with the ultimate railing solution that is both luxurious and affordable. Our railings are available in several unique styles, all of which come with standardized modular features and components that can be adjusted to fit all your outdoor space requirements.

THE FRAME

Layze Systems™ modular frames come in four assorted powder-coat finishes: **Monte Carlo, Cairo, Milan** and **Malibu**. When combined with our nickel-plated connectors, these four high performance finishes create an extraordinary modern and luxurious look that compliments most architectural styles and outdoor landscapes.

BASE PLATE

CONCRETE EMBEDDED POST

POST WITH A BASE PLATE

Railing assemblies can be embedded into concrete or secured onto an existing floor using Layze Systems Base Plates that are available in four matching colors.

SONNET

MODULAR CABLE RAILINGS SYSTEM

Sonnet is an exquisite cable railing system, designed to provide the support and durability while offering a contemporary minimalist look. This railing system is designed to accommodate both interior and exterior settings, such as hotel pool areas, residential patios, restaurants and more.

CLASSICAL

MODULAR PICKET RAILINGS SYSTEM

“Classical” is our most popular railing/fencing installation, and is ideal for places that require extra safety and durability. With a wide range of applications and configurations this railing system offers all the advantages of a modern system while maintaining the traditional look.

N.O.A. COMPLIANCE REQUIREMENTS FOR CLASSICAL RAILING:

N.O.A. CERTIFICATION #: 15-0310.03

Layze systems' modular railings are designed to offer a wide array of alternative configurations and are installed in compliance with the strict guidelines by the Miami-Dade Notice of Acceptance (NOA), that assure their outstanding wind load capacity in a High Velocity Hurricane Zone (HVHZ).

- Railing must be fastened directly onto the main structure via **Base Plates** or **Core Drill**
- Total railing height must be no less than: **3'-6" (1.05 m)**
- Max. Post (newel) distance apart: **4 ft (1.20 m)**
- Max. Picket (baluster) spacing: **4" (cm)**
- Max. Bottom channel height from the finished floor is: **2" (5 cm)**

LOUNGE

MODULAR PICKET RAILINGS SYSTEM

Lounge is a modular railing system with 7/16" laminated glass panel. Its elegance creates an atmosphere of luxury while providing ample support and durability. All railing systems come with optional top rail and grab rail configurations allowing more flexibility in design.

JAZZ

MODULAR DIE-CUT PANEL RAILINGS SYSTEM

Jazz is a modular railing system with a custom die-cut metal panel, designed to not only offer great support but also to add an architectural feature that accentuates and embellishes the structure. This is an ideal railing system for both commercial and residential outdoor settings.

LOUVER

VERTICAL GARDEN

FABRIC SCREEN

LAYZE FENCE

MODULAR FENCE SYSTEM

From louver Fences and vertical gardens to special custom designs, **Layze Systems™** fence assembly is ideal for creating a gorgeous property perimeter with customizable panels that allow you to choose the level of privacy and style that you desire. **Layze Systems™** offers solutions for both commercial and residential fencing, gates and railings using only premium outdoor materials and trained installation professionals.

LAYZE Esthec®

MODULAR COMPOSITE DECKING SYSTEM

With over 50 years of excellence in the marine industry, **Esthec** brings you a state-of-the-art modular composite decking system that will transform any outdoor space with its natural surface and contemporary look. This decking system offers unparalleled freedom in application and design through a vast array of modular configurations and a beautiful assortment of natural colors.

Esthec is extremely durable and versatile. It is the ideal solution for any patio decking and even vertical wall paneling for both commercial and residential applications such as: hotels and spa resorts, balconies and pool areas, roof top gardens, yacht docks and more.

COVE COZY OUTDOOR VENTILATED ENCLOSURE

WIND RESISTANT

UV PROTECTION

WATER PROOF

Escape into a private retreat of luscious relaxation, or treat your guests to a VIP-like hospitality in the luxury and comfort of the **Layze Systems™ Cozy Outdoor Ventilated Enclosure (COVE)**. Whether it is a hotel, restaurant or your own backyard, this exquisite cabana will transform any outdoor leisure, pool-side or dining area into an exotic sheltered oasis made especially for You.

MAKE IT YOUR OWN

Customize your ideal cabana with our wide selection of modular configurations, high-quality materials and fashionable colors to suit your specific needs and create an atmosphere you desire. At every stage of customization the **COVE** offers a complete look and functionality that allows you to design your dream outdoor-living space at your own individual pace.

"PLAYA" SERIES

CUSTOMIZE

Start customizing your unique **COVE** by choosing one of our four assorted heavy-duty aluminum frame colors and the dimensions that you require. The **COVE** is available in standard sizes: 12ft x 12ft, 10ft x 10ft, 8ft x 8ft but can be custom fitted to virtually any size. A free-standing structure can be embedded into a concrete floor or bolted onto an existing floor using base plates.

DEFINE

Floor: Outline the form and add stability to your **COVE** with your choice of Eco-friendly recycled composite decking. This floor is easy to install and requires virtually no maintenance. It is available in a wide array of natural wood finishes and comes with residential and commercial warranty from the manufacturer.

Enclosure: Enhance the look of your **COVE** and create privacy by selecting one of our many side panel, railings and curtain options. This helps you control the amount of sunlight in your cabana, and sets an intimate atmosphere.

PERFECT

Bring your unique cabana design to completion with our beautifully upholstered outdoor furniture. This inviting, easy-to-install, outdoor furniture comes in various configurations, such as sofas, beds, dining sets and more, and can be either free-standing or fixed onto the cabana's main frame, thus fortifying the structure and creating a unified look.

SOLLITE

MODULAR UMBRELLA SYSTEM

PATENT PENDING

WIND RESISTANT

UV PROTECTION

WATER PROOF

Layze Systems™ is introducing an entirely new modular umbrella that will transcend the outdoor shade industry with its next generation rig system. With its array of modular functions and the patent pending "touch-up" system, the **SOLLite** umbrella stands in a class of its own.

TOUCH-UP

The patent pending "touch-up" system was designed with the consumer in mind. With a simple gesture of one finger, you can raise or lower your **SOLLite** umbrella at will. Even the largest diameter umbrellas can be lifted and lowered with a minimal effort.

SOLLITE PANELS

Unlike most conventional umbrellas that utilize one piece of stitched fabric, the Layze Systems SolLite umbrella uses Individual fabric panels are inserted between each rib extrusion. When the umbrella is fully open the fabric is stretched evenly with tension distributed in each panel.

ADVANTAGES:

- Stretching individual panels offers better tension distribution, and prevents ripping at the rib-end.
- Individual panels can be easily customized to fit any aesthetic needs, using different colors, textures, materials.
- If damage occurs, individual panels can be easily removed and replaced without having to replace the whole canvas.
- This modular umbrella can be easily assembled for immediate use or quickly dismantled for an effective storage or portability.

SOLLITE CONFIGURATIONS

From frame finishes and fabric colors to span sizes and base configurations, **SOLlite's** modular versatility allows us to build the ideal umbrella to suit your specific needs and preferences.
