

CARE & MAINTENANCE – POST VEHICLE WRAP

Wrapd Up offers our customers the following tips and suggestions for your post vinyl wrap care and maintenance.

WASHING & POLISHING

We recommend hand washing your car using a non-abrasive detergent and water. Rinse thoroughly with clean water and dry using a quality chamois or microfiber cloth.

Dirt and grit left on the surface of the vinyl will only hinder the wraps appearance and increase deterioration.

NEVER use an automatic car wash as this can damage the vinyl.

The Avery Dennison Supreme Wrap™ Care range is designed to help maintain vehicle graphics in premium condition. It includes a Cleaner, Power Cleaner and Sealant – suitable for all types of vehicle wrap films (matte, satin and gloss). These easy to use products have been fully tested with all Avery Dennison vehicle graphic films, and are all you need to protect and clean the graphics during their life. They are eco-responsible: being water-based, with no hazardous solvents, and do not require any additional water.

FOR BEST RESULTS: Apply in the shade to a clean, dry, cool vehicle.

STORAGE

Your vinyl wrap will react negatively to prolonged exposure to UV light and atmospheric pollutants.

Please try to avoid parking your vehicle under trees for long periods of time. Sap from certain trees can damage and ruin the wrap.

Keeping the car garaged or undercover as much as possible will help keep the films protected from these and extend the life of the wrap.

Any questions or concerns please do not hesitate to contact us!

Regards,
Wrapd Up Cutting Edge Vinyls

I hereby acknowledge that I have received, read and understand the Care & Maintenance tips and suggestions provided by Wrap Up. I understand that by choosing to care and maintain for the wrap any other way may affect the longevity and will compromise my warranty.
