Eneey Assembly Guide

© 2021 Flippytan Furniture

From the owner of Flippytan Furniture

Thank you for purchasing an Eney Sorting Desk. Many people have purchased the Eney to help sort different items for business and personal use since it was first launched.

The original purpose of the Eney was to help families organize the LEGO portion of a playroom in a way that makes it fun to clean up while improving the accessibility of all the parts needed during the play/build process.

An organized LEGO collection is more fun for children to use, as they know where each piece they need should be located during a build. Parents love that children no longer need to noisily dig through large containers in search of a small piece while also reducing the likelihood of finding loose pieces on the floor.

Your new Eney is easy to assemble and intuitive to use. Please take note of the following:

- **⚠ Danger of harm or death.** The Eney obeys all the laws of Physics. It can be tipped like any dresser or cabinet, especially when many heavily-loaded trays are left extended from the desk at the same time. Install dresser anti-tip safety straps before leaving assembled desk unattended with children.
- Flippytan Furniture uses all-hardwood baltic-birch plywood in the construction of the Eney Organization-Playspace Desk. We work to smooth edges and address any areas that may snag skin or clothing. Being a natural wood product, a desk may have discolorations in the wood, rough spots and edges. Please handle with care, especially during assembly.
- Some desks are fully assembled and disassembled after manufacture to ensure we continue to meet our high quality standards.
- The Eney Sorting Desk is designed to comfortably accommodate a typical folding-chair in the chair opening while sorting. Most clients prefer to be seated while sorting. For those who prefer to stand or use a taller chair, we also offer the Eney Pro which comes with a 36" desk height, larger chair opening, and 10 trays instead of 8.

I am proud to say that all Eney desks are made in Rio Rancho, NM, USA and that versions have shipped to businesses and families all over the country as the desks have evolved from Gen 1 in 2015 to Gen 7, launched in 2021.

Enjoy your new Eney!

Don DuLac

Large box contains the following items:

Top with attached hinged faces (1)

Outer Panel (2)

Inner Panel (2)

Left Face (1) and Right Face (1)

Left Back (1) and Right Back (1)

Short Baffle (2) Medium Baffle (2) and Tall Baffle (2)

Large box contains the following items:

Tray Support Dowel (8)

Screw (42)

Small box contains the following items:

Bin (8)

Assembly Steps

Step 1: Lay Eneyy top face-down on carpeted surface.

Step 2: Rotate the hinged faces upright.

Assembly Steps

Step 3: Insert short baffles into slots in hinged faces. The baffle will need to be bent slightly to allow it to snap into the slots.

Step 4: Insert medium baffles into middle slots in hinged faces. Note that the hinges allow some slight flex during install.

Assembly Steps

Step 5: Insert tall baffles into outermost slots in hinged faces.

Step 6: Install outer panel with three screws shown. Repeat for this for the other outer panel.

Assembly Steps

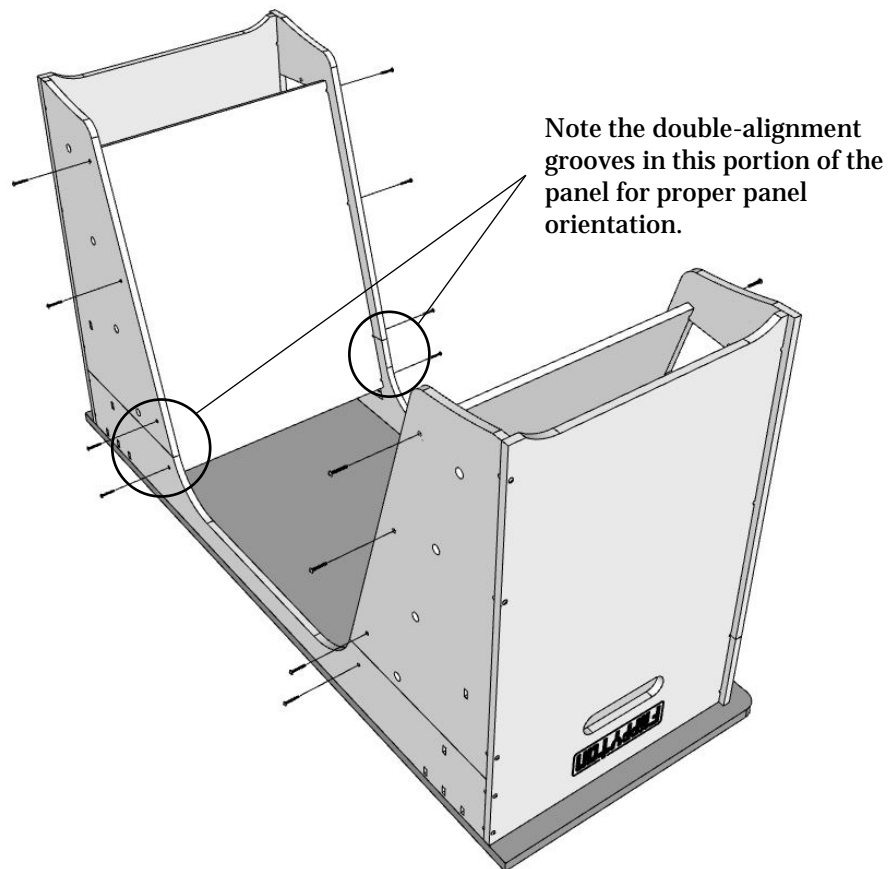

Step 7: Face panel with 3 screws as shown. Repeat for the other face panel.

Assembly Steps

Step 8: Attach rear panels with three screws each as shown.

Step 9: Attach inner panel with 8 screws each as shown.

Assembly Steps

**Step 10: Flip Eney upright.
Insert dowels as shown and attach to backside of face panels with screws.**

Step 11: Slide trays into each tray port until fully engaged.

Assembly Steps

Step 13: Check panel alignment. Loosen and re-tighten screws as needed to make small panel adjustments.

Final Step: Enjoy sorting with speed and ease using your Eneey sorting desk!
