The new **V-11 Rain Diverter™** is available in black, bronze and copper. Other colors available upon request. The copper is fabricated from 20oz material, other colors are fabricated from aluminum at a thickness of .040". Available in 60" and 120" sections that can be used to create long sections of staggered coverage or shorter sections for over doorways or other small areas.

Vertex Specialty Fabrications also provides custom sheet metal products, gutters, drip edges, chimney and ridge caps, as well as cupola and portico roofs.
