HAZARDS TO HUMANS AND DOMESTIC ANIMALS

• • • •

Some materials that are chemical-resistant to this product are made of any waterproof materials. If you want more options, follow the instructions for Category C on the EPA chemical resistance selection chart.

- Chemical resistant gloves are required for applicators using hand held equipment

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENVIRONMENTAL HAZARDS

DIRECTIONS FOR USE

AGRICULTURAL USE REQUIREMENTS

Do not enter or allow entry into treated areas during the restricted entry interval (REI) of 12 hours

- Chemical-resistant gloves made of any waterproof material

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Turf and Landscape Uses: Do not enter or allow others to enter until dusts have settled

Do not contaminate water, food, or feed by storage or disposal

instruction below or dispose of in accordance with the Pesticide Disposal Instructions listed below.

local authorities, by burning. If burned, stay out of smoke

Resistant to Management and does not recommend the use of product containing chemical chlorine. Chlorine Chemical does not recommend the use of product containing chemical chlorine in combination or addition with 3336 DCL. These utilize similar chemistry and mode of action and can contribute to development of disease. Otherwise, if after using 3336 DCL, these treatments are not effective, a broad strain of lung may be present. Consult your local Chemical representative, your State Agricultural Experiment Station, or your State Cooperative Extension Service for proper disease identification and advice on the product use of some other suitable fungicide or disease control strategy. As long as recommended preparation the following, 3336 DCL can remain useful by disease control.

Being easy, Burragass, Bemmudgass, French, Roggrass, St. Augustinegrass, Zoysa grass, or other mixture, 3335 DGS. Use the seed and phytotoxin to any of the above mentioned grasses, when used in accordance with the label. 3335 DGS. Use grass to prevent the growth and control of the diseases mentioned here. 3335 DGS. If the phytotoxin is applied on or to most leafless conditions and should be achieved with irrigation or natural rainfall within 24 hours to best results. The phytotoxin should be used in a sprayer with 1 to 1.25 ounces of water to begin application of product for disease control. When treating golf greens, treatment of reports is recommended. Use the highest recommended rate under conditions of severe drought. Do not graze animals on treated turf. Do not feed clippings to livestock or poultry. Not for use on turf being grown to sale or other commercial use as sod.

Do not exceed the amounts per acre or reduce the re-treatment interval indicated below

Use Site	Maximum Pounds 323S DG Lb/acre per Season	Pounds 323S DG/Lb Per 1,000 sq ft	Comments
Residential or Public Aways	62.3 lbs.	12 lbs.	4 Applications per year
Golf Courses, Parks, Greenery, Airports	104.8 lbs.	21 lbs.	
Golf Courses Fairways – except Florida	26.2 lbs.	6 lbs.	Excludes Florida
Golf Courses Fairways – Florida Only	131 lbs.	3 lbs.	Florida Only

Disease(s) Controlled

Disease	1-56	
<i>Meloidogyne</i>		
<i>Latent Stenobothrus</i>		
Large Brown Patch		
<i>Rotorhynchus</i>		
Ascochyta Leaf Blight		
<i>Ascochyta</i> spp.		
Copper Spot		
<i>Gaeumannomyces sorghi</i>		
<i>Sclerotinia</i>
