## THE BEFORE AND AFTER AURA PHOTO STUDY **OF EXPOSURE TO SCALAR WAVE ENERGY** IN THE ENERGY ENHANCEMENT SYSTEM (EES) CHAMBER

The Progen 6000 Biofeedback Color Spectrometer, invented by Guy Coggins, owner of Aura Imaging in Redwood City, California was used to take all the aura photos displayed here. A before and after aura photos pre-test was done on four subjects who had not had previous EES Chamber exposure session experiences to assess the effects such exposure has on the human aura. A formal, controlled study was then organized and conducted on three individual volunteers who participated in two-hour EES Chamber Exposure Sessions for seven consecutive days.

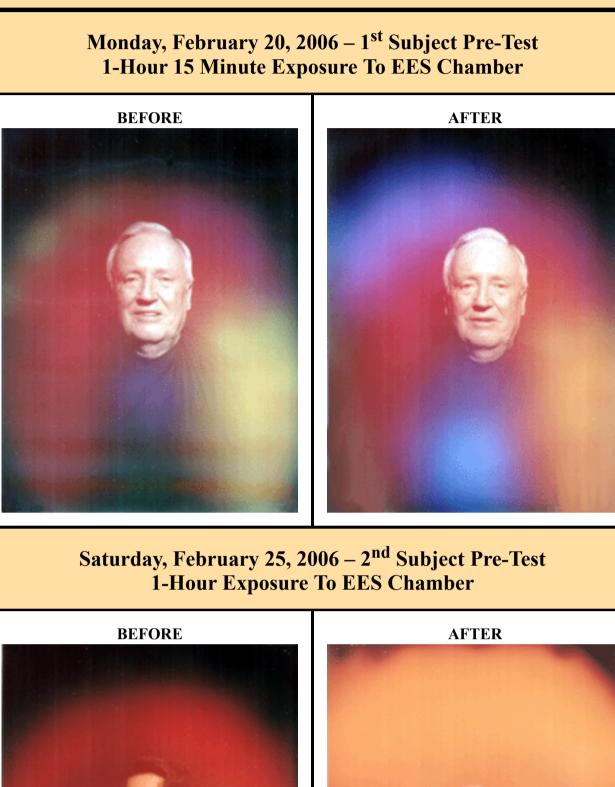

The first before and after aura photo test was done on Monday, February 20, 2006 on Ken Austin, owner of Videosynergy® Studio II, LLC, DBA Paradise Aura Co., as a preliminary orientation to the process of taking an aura photo before sitting in the EES Chamber in the home of Dr. Sandra Rose Michael in Honolulu for a one-hour and fifteen minutes session and then taking another aura photo soon after the exposure session. These aura photos were taken at Videosynergy® Studio II, LLC in Honolulu at the Paradise Aura Co. Aura Photo Station.

Elizabeth Reveley, co-founder and director of The American Institute of Massage Therapy in Kailua, Hawaii, where an EES Chamber has been recently purchased and installed, sponsored a special introductory EES CHAMBER EXPERIENCE event by invitation only on Saturday, February 25, 2006. Dr Sandra Rose Michael, the system developer, gave a PowerPoint presentation on this technological breakthrough. Videosynergy® Studio II operated the Paradise Aura Co. Portable Aura Photo Station on site at this event.

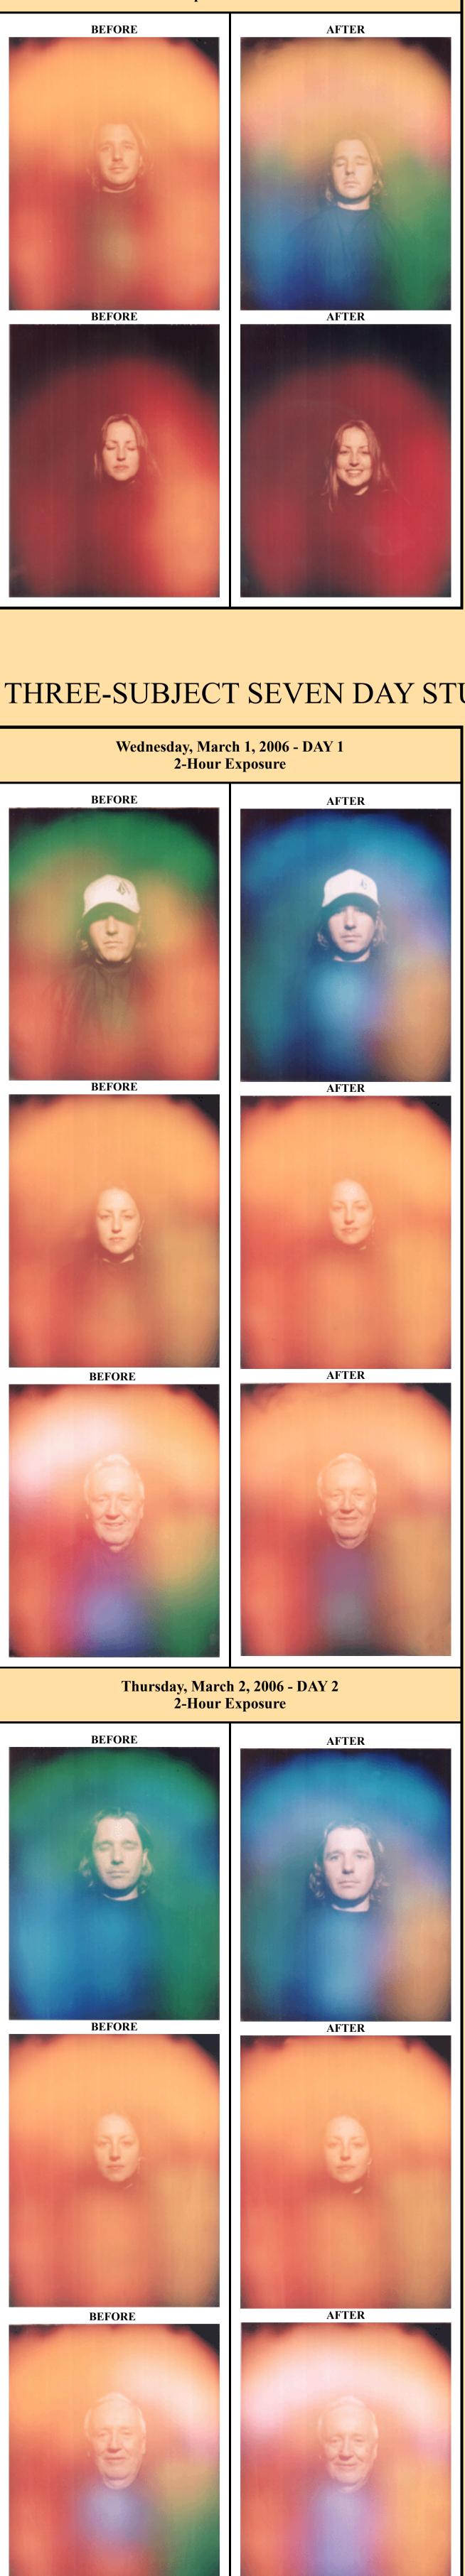

A single, divorced female who had experienced a one-hour exposure in the EES Chamber during this event was the first subject of the three pre-test before and after aura photo sequences taken at the event. She had no prior exposure experience with this system. The other two people who opted to do before and after aura photos were a couple who have been in a monogamous love relationship for several months and experienced only twenty minutes of exposure in the in the EES Chamber on this occasion They had no prior experience with exposure in the EES Chamber. This couple elected to participate in the seven consecutive days before and after aura photo study after seeing the changes in their auras from this brief encounter.

The three-subject study group was comprised of Ken Austin and the above-mentioned couple. They sat together in the chamber for the same period of time each day. The seven consecutive days of twohour exposure sessions per day for the three study subjects were all done in the EES Chamber at the home of Dr Sandra Rose Michael in Honolulu. The before and after aura photos were taken at Videosynergy® Studio II, LLC in Honolulu at the Paradise Aura Co. Aura Photo Station.

## THE FOUR-SUBJECT PRE-TEST

Saturday, February 25, 2006 – 3rd & 4th Subjects Pre-Test **20-Minute Exposure To EES Chamber** 

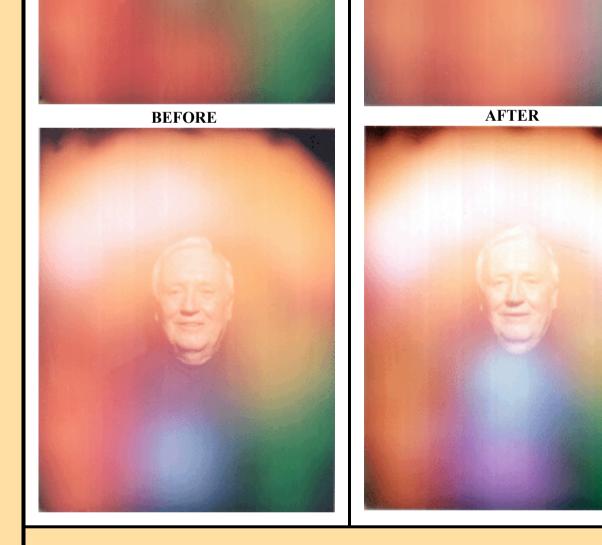

## THE THREE-SUBJECT SEVEN DAY STUDY

Friday, March 3, 2006 - DAY 3 **2-Hour Exposure** 

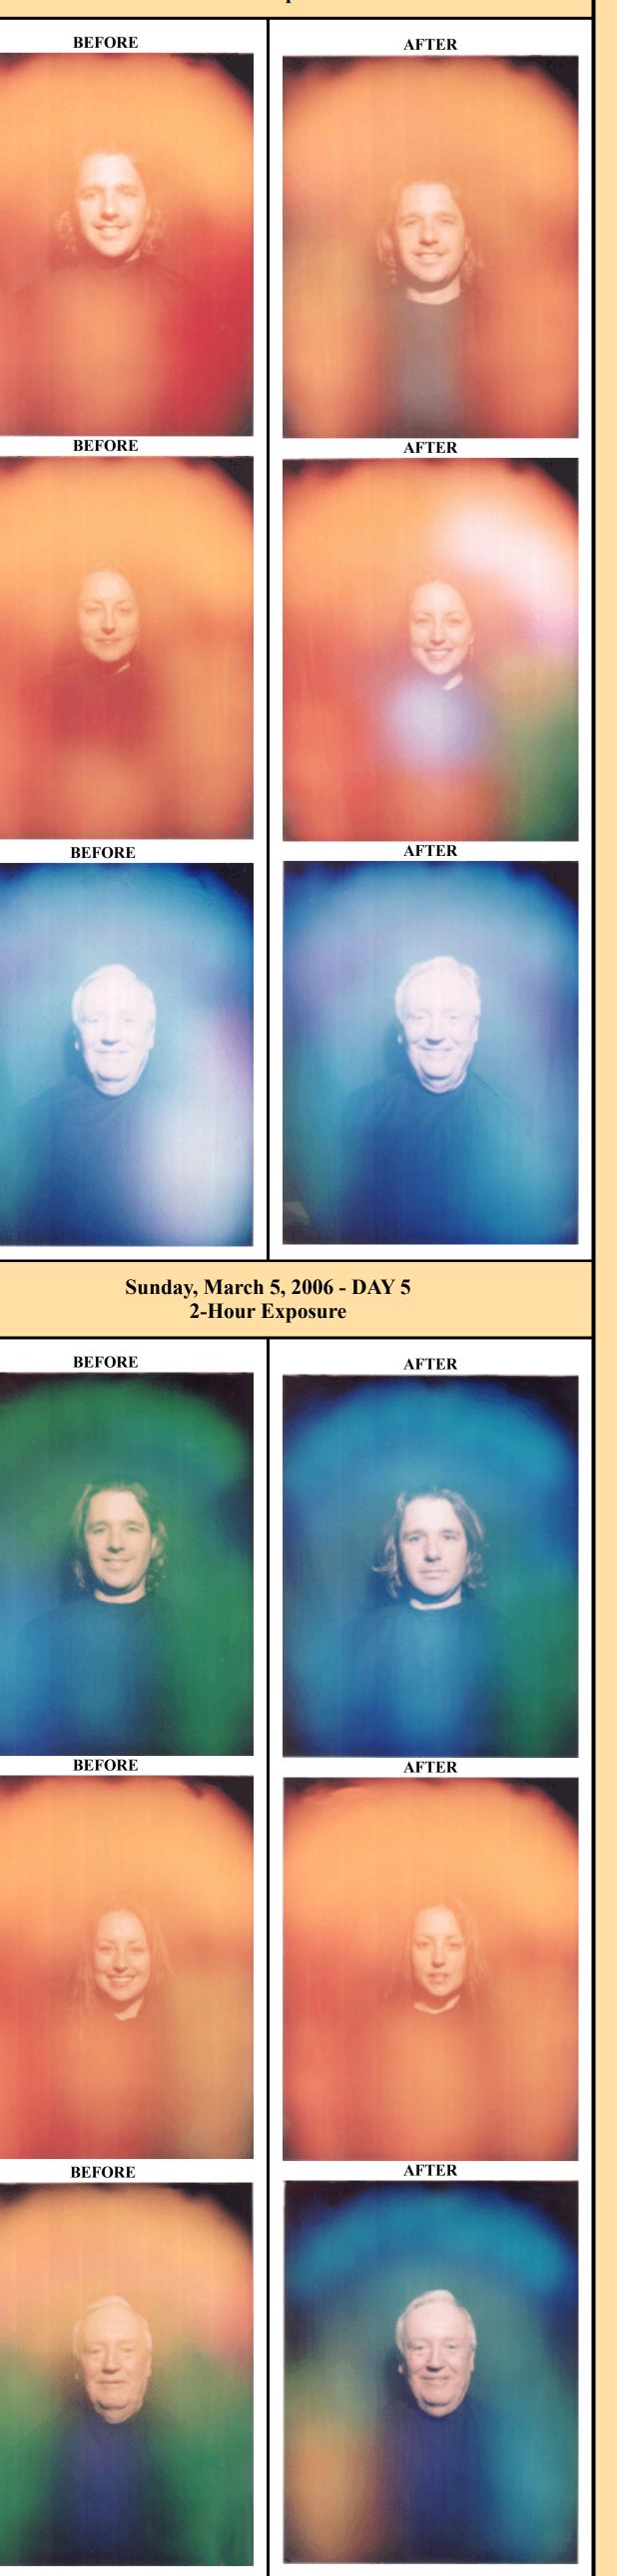

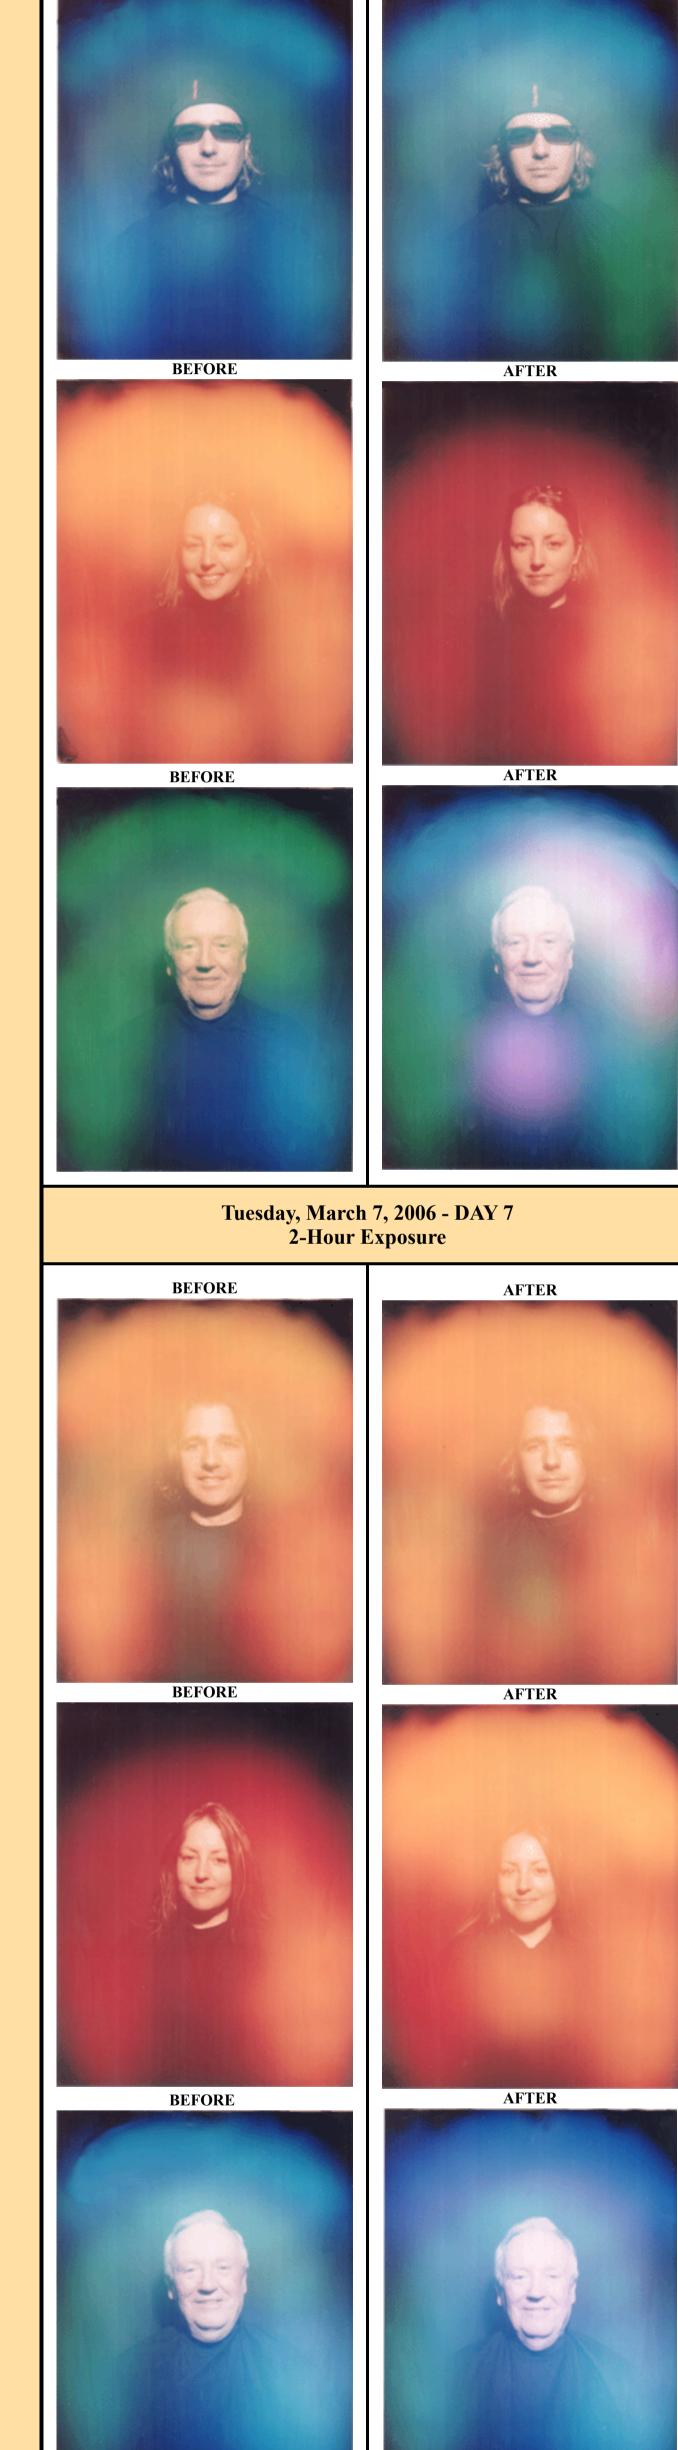

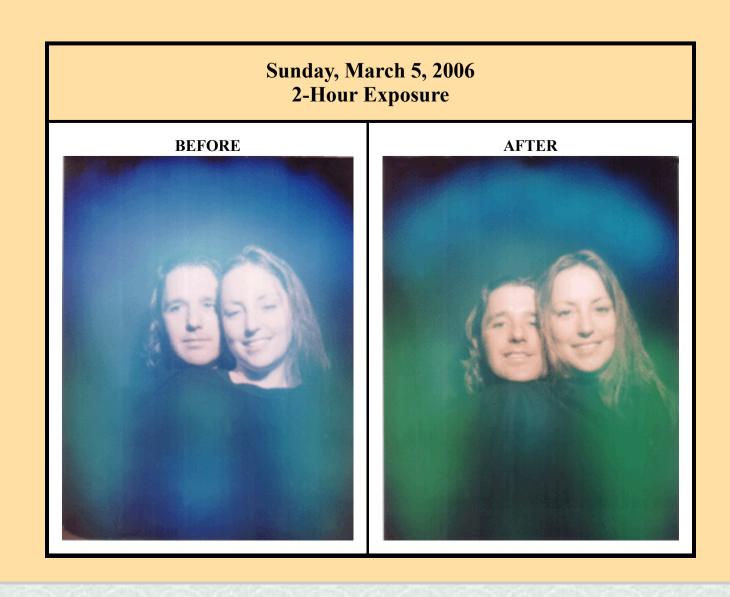

Monday, March 6, 2006 - DAY 6 **2-Hour Exposure**
