

Fatty Acid Perturbation of Cell Function

"A tyrosine phosphorylation requirement for cytotoxic T lymphocyte degranulation." Anel A, Richieri V, Kleinfeld AM. J Biol Chem 269, 9506-9513 (1994) PN16582.

"Tyrosine phosphorylation of a 100-kDa protein is correlated with cytotoxic T-lymphocyte function. Evidence from cis unsaturated fatty acid and phenylarsineoxide inhibition." Anel A, Kleinfeld AM. J Biol Chem 268, 17578-17587 (1993) PN15211.

" Activated adhesion of CTL to MHC class I but not fibronectin is inhibited by cis unsaturated fatty acid and PAO." Anel A, Mescher MR and Kleinfeld AM. The Journal of Immunology 155:1039-1046,1995

"Palmitate-induced apoptosis in neonatal cardiomyocytes is not dependent on the generation of ROS." Hickson-Bick DL, Sparagna GC, Buja LM and McMillin JB. Am J Physiol Heart Circ Physiol 282: H656-H664, 2002.
