

## INTERFAITH EARTHKEEPERS MINUTES 3/10/21

Present: Ron H, Katharine H, Merrily S, Betsy H. Dennis R., Bob F., Penney P, Rouanna G. Keith O. Sue

Brief Check in by all.

Penney will present a short, 10 min. educational segment from Drawdown next session. We will have today's session at the end of the meeting.

We will present the Movie "Kiss the Ground" on Earth Day, 7 pm. April 22, 2021.

Sue will organize a brief rehearsal for those involved, and for those who will be part of the Question and answer session at the end.

Please ...send out the Poster which you can find on our website. Rouanna has sent it out previously, and will send again.

Many at this meeting agreed to take the PR on the road, and send to many other groups.

Katharine and Ron will present, or arrange for several Farmers to present after the movie.

We had information from Merrily on movies that might be appropriate for Ocean Day.

A discussion followed with Keith leading as to where we want to go with this program. It may happen in June, or we may want to work on it for later.

It was felt that Keith, with lots of help from us, would like it organized to have Youth present with adult support.

Ron suggested that we make it positive to show what can be brought about to help our Ocean.

Rouanna presented some of the info from the EV event with Congressman DeFazio. All very positive.

Thank you Rouanna, for all the help in finding excellent info for our Website. Also thanks to Ron and Phyllis H. for the Facebook page that we now have. Ron has had fun responding to some of the negative comments.

Dennis spoke of the group in Eugene, working to reduce fossil fuel use. Presently the City Council is on the path of non-renewal of NW Natural contract.

We are hoping to push to keep out any new infrastructure for Natural Gas.

Dennis told of HB 2488 which is an excellent bill on land use to help reduce the problems that marginalized people face.

We briefly discussed with Merrily solar projects and how different utility companies treat solar.

Merrily and Amelia will be meeting to discuss various ways we can be involved with Amelia's work at U of O.

Merrily presented on the Oregon Wave Energy Project gets federal go-ahead; info. on website
